Violin

Introducing a new kind of electric violin, inspired by the organic beauty of wood, the simplicity of clean lines and the comfort of light weight. Featuring innovative Yamaha sound, these four- and five-string models are gorgeous live-performance instruments.

“I can close my eyes and it feels like my acoustic violin.”

Body

Maple, mahogany and spruce woods produce a rich, strong tone as the bow grips the string.

Frame

Walnut brings an ideal blend of flexibility and strength in a five-layer wood design that is not only striking but also contributes to natural resonance vibration when played with a bow.

Pickup

The professional-grade bridge pickup, carried over from the Silent Violin Pro series, captures the instrument's attack and the player's expressive bowing nuances while effectively picking up the sound of the entire instrument.

The natural touch points and curves allow the player to effortlessly move between the YEV and a standard acoustic violin. The instrument's shape allows for most standard shoulder rests, chin rests and tailpieces.

"It feels so natural."
