BALL MOUNT & CLAMP

Yamaha's legendary ball mount & clamp has been providing drummers with extremely flexible and stable tom placement for over 30 years. Consisting of a large resin ball and wing bolt, this ingenious system incorporates an internal retaining plate to deliver maximum stability that will withstand the very rigorous performance.

SCB12HW : BTT612U CS755 x 2 HS740A SS740A FP7210A

YESS

Providing minimum mount to shell contact, the Yamaha Enhanced Sustain System (YESS) delivers increased resonance plus maximizes dynamic range and sustain. Mounts are attached at the drum's nodal point where shell vibration is least effected. A nylon bushing in the rod clamp offers enhanced stability. This system is also used on our floor tom brackets to deliver maximum sustain.

SAPPHIRE BLUE (SB)

SCB2FS51 : BBD622U BFT616 BTT610U BSD0655 TH945B

COATED HEADS (SCB8F3 ONLY)

Coated heads are chosen for their tight sound with excellent projection. The heads deliver a mild tone with a powerful core that offers great expressive playability.

100% Birch Shell Stage Custom has evolved again

As with the introduction of Stage Custom in 1995 YAMAHA once again sets the standards of value and sound.

By borrowing from our legendary Recording Custom drums, we are proud to introduce new 100% Birch Shell Stage Custom

Shell

The shell is a key factor in a drum's ability to "rumble," or resonate. Accordingly, the Stage Custom employs 100% birch - a classic in the realm of high-class drum kits. Moreover, with its six-ply structure the Stage Custom accurately conveys the vibrations produced at the impact surface, achieving performance that overwhelms anything in its class.

Snare

The snare drum--a critical element in any rhythm--is also made of 100% birch material. Various types of snare drums are available to suit a wide range of genres. Choose from the standard size and/or two types of small-diameter snares suitable for use as sub-snares. YAMAHA also offers two metal snares, each with a different depth.

Hardware (SCBHW12)

- 1 Boom Cymbal Stands adopt a new boom tilter design for improved stability and adjustability.
- 2 A center tilter that can be set for highly accurate cymbal positioning and player articulation
- 3 The YESS specification floor-tom bracket, incorporating a wing bolt
- 4 Improved snare basket mechanism.
