

DW/DWX

Nothing can compare to that big robust sound that a dreadnought produces. The DW/DWX series acoustic and acoustic/electric models produce a well-balanced tone, from solid lows to crystal clear highs, over the instrument's entire range. Select woods are finely crafted, with our craftsmen's expertise, into beautiful bodies and full-scale necks. Advanced electronics and piezo pickups in the electric/acoustic models accurately reproduce the powerfully rich tone of these fine instruments.

DW20

Top: Solid Spruce
Back & Sides: Rosewood
Neck: Nato
Fingerboard: Rosewood
Bridge: Rosewood
Body Depth: 100–125mm
 (4-1/16"–5-1/16")
String Scale: 650mm (25-9/16")
Tuning Machines: Diecast Gold
Finish: Natural

DW10

Top: Solid Spruce
Back & Sides: Rosewood
Neck: Nato
Fingerboard: Rosewood
Bridge: Rosewood
Body Depth: 100–125mm
 (4-1/16"–5-1/16")

Headstock

The DW/DWX series guitars feature beautiful mother of pearl inlays on their headstocks.

Bracing

The bracing configuration found on the DW series is specially adapted for use on dreadnoughts from a design used on our LA series guitars. Along with excellent sound quality these instruments offer a powerful sound.

Controls

The electronics section features a three band equalizer with an adjustable midrange frequency for added control of the overall sound of the guitar. The Mid Shape Switch offers a choice between Natural and Hard tone settings. The Hard setting boosts Mid and Low frequencies producing a powerful sound.
