

The Clavinova is the world's favorite digital piano, winning numerous awards and being the instrument of choice at prestigious music schools everywhere.

**USA**

Clavinova Digital Pianos were chosen 2004 Home Digital Piano Line Of The Year in the Musical Merchandise Review's "Dealer's Choice Awards."

The Clavinova line has received an annual award from MMR eight times in the past ten years, including "Product of the Year" in 2000.

**Canada**

The First Choice of the Royal Conservatory of Music.

**UK**

The Royal Academy of Music has been using Yamaha Clavinova digital pianos since 1991.

**France**

CLP-880 earned highest marks from 2 major specialist music magazines, Diapason in October 1998 and Le Monde de la Musique in March 1999.

**Japan**

CVP-98 received the Good Design Award from the Ministry of International Trade and Industry.

*Welcome to a new, expressive musical world*

# Clavinova®

# THE ULTIMATE IN PIANO ENJOYMENT

## Authentic sound, elegant expressiveness

Unmistakably grand, the new CVP-400 Series Clavinova puts the luscious, expressive sound of a real acoustic grand piano at your fingertips. The amazingly authentic piano sounds at the heart of this instrument were sampled from a full concert grand piano smoothly blended for the most natural dynamic changes. Special care was also taken to accurately reproduce the complex sound nuances when the damper mutes vibrating strings when keys are released (Key Off), the rich sound when the damper pedal is pressed (Sustain), and even the special phenomenon when the hammer hitting the strings of one key causes the strings of other keys to vibrate (String Resonance).

## UNSURPASSED BEAUTY AND ELEGANCE

Every bit as beautiful as it sounds, the Clavinova radiates the dignified, commanding presence of a grand piano with its solid, finely finished cabinetry. The Polished Ebony finish recreates the formal elegance and high-class appearance of a concert grand, while the Polished Mahogany model has a warm, natural wood grain to complement and attractively furnish any interior.

**New panel**  
for a true piano appearance.

## Real grand piano key touch and response

The Natural Wood (NW) keyboard on the CVP-409/407 uses real-wood white keys to reproduce as closely as possible the experience of playing an actual grand piano—including the authentic touch and feel of the keys, the weight balance between key and hammer, and the weight gradation between low and high keys. This specially crafted keyboard lets you use techniques possible only on real grand pianos, such as having successive notes blend smoothly even without pressing the damper pedal, or playing the same key repeatedly and quickly with perfectly natural articulation. The CVP-409 also has Synthetic Ivory keytops that feature a soft and slightly porous surface, giving the keys added grip and a natural friction for improved ease in playing. Yamaha's famed Graded Hammer 3 (CVP-405/403) and Graded Hammer (CVP-401) technologies give those respective keyboards a remarkably natural piano touch and expressive response.

*Beauty and elegance  
that radiates  
from within*

YAMAHA  
Clavinova

## RESONANT, RICHLY TEXTURED PIANO SOUND

### iAFC (CVP-409/407)

The sound of a grand piano is one of the most complex in the world of acoustic instruments. Each key has its own string or strings, and when the damper pedal is pressed, the vibrations of just one of the strings cause all other strings to resonate as well. The large soundboard of the piano also resonates, amplifying and spreading these rich harmonic textures in the performance space. The sound is gorgeous, but nearly impossible to recreate on a digital instrument.

Enter Yamaha's Instrumental Active Field Control (iAFC) technology. The iAFC is an elegant and effective solution that uses built-in microphones and speakers, and makes acoustic adjustments to the sound to create a virtual soundboard and resonant cabinet in the Clavinova. The iAFC actually takes the sound, "feels" the room the piano is in, and then sends the sound out of the speakers to effectively reproduce the complex sonic textures of a real acoustic grand piano.

### Record your performance—and singing!

The USB Audio Recorder features of the CVP-409/407/405/403 let you record your performance as audio data directly to a USB storage device (such as a thumb drive or memory stick). In addition to your keyboard playing, you can connect a microphone or guitar to record your singing voice or another instrumentalist. Naturally, you can use the Style parts of the instrument or even songs you've recorded with the built-in 16-track MIDI recorder to accompany your performance. Bring the storage device to your computer and share your recordings with your friends via e-mail, record your own CDs, or upload the audio to websites for many others to enjoy.

# YOUR INNER MUSICIAN

Musical talent is within you—  
it merely needs the right instrument  
to bring it out and let it flow.

The new CVP-400 Series Clavinova is  
just that instrument.

With its exceptionally realistic Voices, dynamic  
backing Styles, wonderful expressiveness,  
comprehensive features and stunning sound—  
the Clavinova helps you tap into  
your inner musician,  
and fully develop the musical talent  
you know is deep inside.

## Authentic accompaniment for your performance—Styles

The newly improved auto accompaniment Styles of the CVP make music so much  
more enjoyable and open up a whole new world of performance possibilities.

The wide range of Styles include dynamic backing band parts for pop, R&B, rock,  
Latin, jazz, movie music and classical—letting you play like a pro, in absolutely  
every genre. The authentic accompaniment of these Styles has been meticulously  
crafted by top musicians worldwide and refined by pro studio engineers for  
the best possible quality. Moreover, these Styles utilize the ultra-realistic Super  
Articulation Voices (CVP-409/407/405) and Mega Voices (CVP-409/407/405/403)  
to create the most authentic and dynamic accompaniment you've ever heard.

## Super Articulation Voices (CVP-409/407/405)

This innovative Voice technology from Yamaha takes your keyboard playing  
to a completely new level of sonic realism and expressiveness.

Featuring a variety of realistic acoustic instruments and incorporating  
the unique performance characteristics of each instrument, these Super  
Articulation Voices are perfect for playing solo passages and melodies.

When you play, the Super Articulation technology monitors your playing and  
changes the sound accordingly—for amazingly natural and expressive sound.  
For example, when you play the Tenor Sax Voice in legato, the melody sounds  
smoothly with faint key noises. Or when you play the Acoustic Guitar Voice,  
realistic guitar playing techniques such as hammer-ons, pull-offs and slides  
are blended into your performance—not at random, but based intelligently  
on the pitch intervals of your playing.

## Mega Voices (CVP-409/407/405/403)

The Mega Voices feature various playing techniques and performance sounds  
that are designed specifically to enhance the playback of your recorded Songs  
and the built-in accompaniment Styles. These include, for example,  
the sounds of finger slides and fret noise on Guitar Voices, making your music  
sound astonishingly realistic and expressive. Special MEGAEnhancer  
software is available for automatically converting conventional MIDI song  
data to most effectively take advantage of the Mega Voice capabilities.

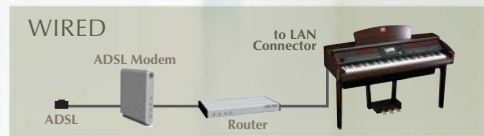

# DISCOVER A NEW WORLD OF MUSIC ONLINE!

## Connect to the Internet —right from your Clavinova!

Use your Clavinova to log onto Yamaha's special IDC website —without a computer!

With the Internet Direct Connection (IDC) service, you can access the Internet right from the LCD display of the instrument and directly download styles or song files from our site. Once they're downloaded, you can immediately play these style and song files on your Clavinova!

All you need is an appropriate high-speed Internet connection (not dial-up) and network, and you will have full access to the convenient Internet Direct Connection services.

## Download. Learn. Play. Your one-stop source for music!

Digital Music Notebook is a convenient multimedia Internet service that lets you preview, purchase, download and print learn-to-play music books and sheet music.

If you want to play along, sing along, or just listen —Digital Music Notebook has a huge and growing variety of titles that help you get the most out of your Clavinova. From scales and chords to your favorite riffs and songs, DMN is packed with everything you need to master your instrument. Add accompaniments, record your performance, mix parts in the music as you want, sing karaoke with friends, learn new techniques—Digital Music Notebook has all the tools you need to bring out your musical talent and make music come alive!

## Putting it all together with Music Finder+

You want to play a certain song, but you might wonder: What Style should I use? What Voices should I select? The Music Finder+ feature puts it all together for you. It's like having a professional music producer on hand, one who knows just what instruments to use for every kind of music, one who knows just how to arrange parts for the kind of music you want to play. Music Finder+ features literally thousands of preset records—each with its own specially selected Style, Voice and effect settings.

## What's new in Music Finder+?

Music Finder+ takes the original Music Finder feature and expands it with the power of the Internet. Music Finder+ provides access to a huge online library of song setups that you can download directly to your Clavinova (using the Internet Direct Connection service). The setups are free and available individually as "Records" or conveniently grouped into "Collections." Musical styles grow and change constantly, and the extensive Music Finder+ library—with 5,000 Records and growing—is an ideal way to keep pace with those changes. The Music Finder+ also has useful "Performance Guides" that contain digital sheet music to help you learn how to play and get the most out of your Music Finder Records.

In April, 2007,  
5,000 Records  
500 Performance Guides  
will be available.

## Demos

The Demos on the instrument are more than just example pieces of music—they also provide helpful, easy-to-understand introductions to the features and operations of the instrument. In that sense, the Demos are a handy, interactive 'mini-manual' to the CVP—complete with sound demonstrations and text showing what it can do for you.

## LCD Display

The extra-large LCDs—including full color on the CVP-409/407/405—give you complete, at-a-glance view of all main settings, and make operation wonderfully easy. These Clavinovas have also been designed with one-function/one-button convenience, so that you can easily call up the feature or operation you want without having to wade through multiple menus!

## Internet Direct Connection (IDC)

With the IDC service, you can access Yamaha's special IDC website directly from the instrument and download styles or your favorite song files from our site—without a computer! Once downloaded, these song and style files can be immediately be played on the CVP! All you need is an appropriate high-speed Internet connection (not dial-up) and network, and you have full access to the convenient Internet Direct Connection services.

## Songs

The Clavinova comes with an extensive variety of pre-programmed Songs with complete rhythmic backing and accompaniment—a total of 120 preset Songs (61 on the CVP-401). Notation for each Song appears in the display and special Guide Lamps light to show you which keys to play. The instrument also features comprehensive recording features, allowing you to craft complex, multi-instrument compositions and arrangements.

## Styles

The Auto Accompaniment and Style playback features of the Clavinova automatically produce full backing parts that you can play along with and perform over. It's like having an expert band behind you, following your every move and every chord change. The enormous range of Styles encompass virtually every musical genre and are newly improved as well, utilizing realistic Voices to create the most authentic and dynamic accompaniment to make you sound like a pro!

## Music Finder

If you want to play a certain type of music or a specific song and don't know which Style to choose, the powerful Music Finder feature can help. Simply select a song title or keyword, all appropriate panel setting are reconfigured to match the genre, including the appropriate Voices, Style and effects. Music Finder+ also works with the IDC feature, giving you instant access to additional free Music Finder records and collections to help when your favorite song or music isn't on the instrument.

## Vocal Harmony

The Clavinova features an input jack that lets you connect a microphone to sing along with your keyboard performance. Better yet, there's a Vocal Harmony effect (with 60 presets) that creates automatic vocal harmony backing parts for your singing—perfectly pitched, matching the type of music, and based on the chords you play!

## Voices

Whatever type of music you play, the Clavinova series ensures you'll always have the right Voice to perform with. Hundreds upon hundreds of authentic, powerful and dynamic Voices built into the instrument that cover virtually every instrument category. Additional Super Articulation Voices (CVP-409/407/405) and Mega Voices (CVP-409/407/405/403) incorporate unique performance characteristics of each instrument for maximum realism.

## Organ Flutes Voices

These special Voices give you that vintage organ sound heard in Gospel, Blues, Jazz and Rock music. Onscreen virtual tone bars let you adjust the individual footages and percussive sound, just as on an actual organ, while a realistic rotary speaker effect gives you the richly textured, animated effect of a rotating speaker.
