

YDP-323

Superior piano sound,
natural acoustic-like expressiveness in
a sophisticated digital instrument

The True Sound of a Concert Grand Piano

Just like Yamaha's finest digital pianos, the YDP-323 uses Yamaha's renowned AWM (Advanced Wave Memory) tone generation technology and stereo sampling. When you play a key, what you hear is a digital recording, of the same note on a high quality concert grand piano. This exceptionally realistic, natural acoustic sound makes the YDP-323 a pleasure to listen to even for the acoustic piano aficionado.

GH Keyboard for Exceptionally Realistic Touch

Besides outstanding sound, the YDP-323 offers an incredibly natural touch. Applying the know-how acquired from over 100 years of crafting fine acoustic pianos, Yamaha created the highly acclaimed GH (Graded Hammer

effect) keyboard. Unlike conventional digital piano keyboards that use springs or dampers to simulate piano feel, the GH keyboard uses weights and mechanical linkages to provide a new level of realism. You'll notice the difference it makes as soon as you start playing.

Beautiful, Transportable, and Always in Tune

The beautifully traditional wood grain body, with sliding protective key cover, tastefully complements virtually any decor. What's more, the YDP-323 is lightweight compared with the cast-iron plates of acoustic pianos so it's easy to move. But the real value comes when you account for scheduled maintenance... of which there is none. Because the sound is produced digitally, similar to that of an audio CD, it's impossible for it to go out of tune.

Three Pedals

To let you enjoy more expressive piano performances, the YDP-323 also features damper, soft and sostenuto pedals. If the acoustic grand piano at your recital has three pedals, shouldn't the one you're practicing on as well?

Versatile Selection of Voices

For even more performance versatility, the YDP-323 offers a choice of 10 voices including electric piano, organ, strings and harpsichord... all digital recordings of the real instruments. Using Dual Mode, you can even combine voices to give your playing a completely original sound. Repetitive practicing of a single piece of music doesn't have to sound the same each time you play it.

Built-in Piano Music Library

The Yamaha YDP-323 comes with a built-in music library of 50 popular piano pieces. These can either be used as practice aids, or simply for your listening pleasure. Mute the recorded hands independently, allowing you to play one hand while your piano plays the other. You can even adjust the tempo as you progressively improve your performance.

Capture Your Own Masterpiece

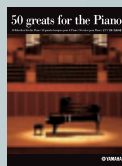

The built-in, 1-song performance memory allows you to record anything you can play. Listen back to your creations for study or choose another voice and accompany yourself with a completely different sound! There's also a built-in metronome to help you keep perfect time..

Spacious Digital Reverb

No matter how big your room is, whether you have hardwood floors or the thickest carpeting, digital reverb puts your YDP-323 center stage in a variety of different listening environments. Choose the best reverb setting for the type of room you're playing in.

Variable Touch Sensitivity

You can even adjust the responsiveness of the keys to the type of musician sitting at the bench. Heavy-handed players will appreciate the Hard setting that allows them to play naturally and still remain expressive. But when switched to Soft, life can spring from the performances of even the most timid beginner.

Music Book Included

Sheet music for the 50 built-in demonstration songs is included with the YDP-323.

Specifications

KEYBOARD		GH Keyboard
TONE GENERATION	Polyphony	64
	Piano Voice	AWM with Stereo Sampling
	No. of Dynamic Steps	1
	No. of Sampling Banks	30
	No. of Voices	10
	ROM Size (Piano/All)	5MB/16MB
