

RX-V367/HTR-3063 How to program remote control codes For TV Control Key Operations

TRANSMIT LIGHT

NOTE: The following steps must be completed within 1 minute. Settings will be automatically stopped after 1 minute passes since the last operation and steps 2 through 4 will have to be repeated.

1 Use the remote codes listed in this document to find your TV manufacturer code.

2 Press the Code Set button on the remote using a small pointed object such as a ball point pen or small paper clip.

3 Press the TV Power button on the remote.

4 Enter in your TV remote control code using the Numeric Keys on the remote control.

Once the remote control code is registered successfully the Transmit light will blink twice. If the Transmit light blinks more than twice the code registration has failed. Steps 2 through 4 will need to be repeated.

If multiple control codes exist, start with the first one on the list. If it does not work, cross it off and try the next code until one works.

List of remote control codes

TV		Baird	0282	Condor	0161, 0277, 0320, 0323, 0342, 0350, 0351	Elite	0320, 0340, 0350

Note:

If the codes are not available in this code list for your product then the receiver remote will not be able to control it. If it is a CD player you may be able to get it to work by trying the same manufacture DVD player codes. All the IR information on third party products is integrated at the time of manufacture and the Yamaha universal remotes are not re-programmable, meaning that their internal code libraries cannot be updated.
