About this product and manual

Thank you very much for purchasing this Yamaha product. This product is a network-compatible Receiver (2-channel stereo amplifier) which lets you play music content from the radio or a network in your home as well as analog and digital audio inputs. With the YPAO function which optimizes the sound field automatically, you can enjoy the sound that best matches your room.

This manual (guide) is organized as follows. Please be sure to read each of the guides that came with the product and keep them handy for easy reference.

Safety Guide (Included with the Product)

Lists important safety precautions that should be read prior to use.

Quick Guide (Included with the Product)

This guide explains things from basic connections up through playing Internet radio.

User Guide (This Guide)

This provides explanations of all functions, such as information that is not addressed in the Quick Guide.

• In the User Guide, iPhone and iPad are referred to collectively as “iPhone”. Unless indicated within an explanation, references to “iPhone” mean iPhone and iPad.

• Symbols used in the User Guide

  • CAUTION is used with information about potential injuries.
  • NOTICE is used with information for preventing product failure, damage or malfunction, and/or loss of data.
  • NOTE is used with supplementary information that is helpful to know.
  • [Search tag] are keywords for searching.

You can download the latest manuals from the following website.
https://download.yamaha.com/
Terminology and technical explanations

Following are explanations of terminology used in this guide.

USB DAC
The USB DAC converts digital audio signals, sent via a USB cable connected to a computer, into an analog audio signal, which allows it to be played. This makes it possible for computer applications to play high-quality audio.

YPAO (Yamaha Parametric room Acoustic Optimizer)
This is a proprietary Yamaha technology that automatically optimizes for room acoustics. A special YPAO microphone is used to detect speaker connections and measure the distance from them to the listening position. It measures the acoustic characteristics of the space and automatically adjusts parameters such as volume balance and frequency characteristics.

Bi-wiring Connections
When connecting an amplifier to speakers, this connection method uses separate wires for the low-frequency speaker unit (woofer) and the mid-high frequency speaker unit (tweeter). This method of connection is possible if the speakers are bi-wiring compatible (if they have terminals for both low-frequencies and mid/high frequencies).

Loudness
This function makes it easier to hear bass and treble even at low volumes. It allows the listener to enjoy natural sound even at low volumes by compensating for the human auditory characteristic that makes it difficult to hear bass and treble at low volumes.

Please refer to the following website for other terms and technical explanations. It explains terms and technologies related to Yamaha AV products in general, not just for this product.
https://manual.yamaha.com/av/cm/glossary/
Input sources playable with this product

Compatible input sources

As illustrated below, this product supports playing a variety of input sources.

Related links (for connection)
- “Connecting external devices” (p.25)
- “Connecting radio antennas” (p.34)
- “To make a network connection” (p.37)

Related links (for playback)
- “Selecting an input source” (p.53)
- “Listening to the radio” (p.60)
- “Playing via a Bluetooth® connection” (p.69)
- “Listening to music via AirPlay” (p.72)
- “Listening to internet radio” (p.73)
- “Listening to streaming services” (p.74)
- “Playing songs on media servers (PC/NAS)” (p.75)
- “Playing audio from your computer (USB DAC)” (p.77)
Compatibilty with MusicCast

This product is compatible with MusicCast. This makes it possible to share music with MusicCast-compatible devices located in multiple rooms. Its dedicated app, “MusicCast Controller”, is easy to use and allows users to enjoy music from smartphones, media servers (PC/NAS), Internet radio and streaming services from anywhere in the home.

For details on MusicCast and compatible devices, please visit the Yamaha website. For more information about the app, search “MusicCast Controller” in the App Store or Google Play.
Checking the accessories

This product comes with the following accessories. Check and make sure that you have all of the included accessories.

☐ Power cord

☐ YPAO microphone

☐ DAB/FM antenna (Models for U.K., Europe, Russia and Australia)

☐ AM antenna (Models for U.S.A., Canada, China, Korea, Asia, Taiwan and for Central and South America)

☐ FM antenna (Models for U.S.A., Canada, China, Korea, Asia, Taiwan and for Central and South America)

* One of the above is supplied depending on the region of purchase.

NAMES OF PARTS AND THEIR FUNCTIONS

Front panel

The following are the names of parts on the front of the unit and an explanation of their functions.

1. (Power) Switch

   Turns the power of the product ON ( ) / OFF ( ) (p.41).

   With the power ON, press the (Power) key on the remote control to switch the power between ON and Standby. This product also goes into Standby in the following situations.

   - When the Auto Power Standby function is active (p.104)

   **NOTE**

   The remote control does not work if the power is OFF. This product cannot also be linked with a Bluetooth device, a network device, or MusicCast Controller App.

2. Power Indicator

   Lights up as follows to indicate the state of power.

   - Power ON: Indicator lights up.
   - Power in Standby: Indicator is faintly lit.
   - Power OFF: Indicator is off.

   **NOTE**

   When the indicator is flashing, it means the protective circuit has been activated and the power will not turn ON, in order to protect the product. Please contact an authorized Yamaha service center to have it repaired.

3. SPEAKERS

   Switches the speakers connected to the SPEAKERS L/R A and B jacks on the rear panel (p.52).
INPUT
Selects the input source (p.53).

BASS
Adjusts the volume of the low-frequency range (p.57).

TREBLE
Adjusts the volume of the high-frequency range (p.57).

BALANCE
Adjusts the left/right balance of the volume (p.58).

LOUDNESS
Adjusts to make it easier to hear bass and treble even at low volumes (p.59). If the YPAO Volume function (p.102) is enabled, LOUDNESS adjustment cannot be used.

SELECT (PUSH-ENTER)
Used for things like operating the menus on the front display. Turn this to select an item, and press it to confirm the selection.

PURE DIRECT/Indicator
Switches the Pure Direct function ON/OFF (p.56). When this is ON, the indicator lights up, and the front display turns off.

VOLUME
Adjusts the volume.

PHONES jack
For plugging in headphones (compatible with standard stereo phone plugs).

NOTE
Audio cannot be output to speakers connected to this product when headphones are plugged in. Also, output from the PRE OUT jack turns OFF.

YPAO MIC jack
For connecting the included YPAO microphone (p.44).

Remote control signal receiver
Receives the signal (infrared) from the remote control (p.24).

Front Display
Displays various information and menus (p.16).

PRESET
Used for recalling registered (preset) radio stations (p.63) and registered songs/Internet radio stations (p.90).

RETURN/CONNECT
Used for things like operating the menus on the front display. Also used when registering this product on the MusicCast Network (p.43).
NAMES OF PARTS AND THEIR FUNCTIONS > Unit

- **Wireless LAN indicator**
  Lights up when this product is connected to a wireless network (p.134).

- **Bluetooth indicator**
  Lights up when a Bluetooth device is connected (p.69).

**Related links**
“Taking care of this product” (p.133)
Front display

The following is an explanation of what is shown on the front display.

Basic indication

This indication is shown during playback. What is shown differs depending on the current input source. The following is an example of the indication during playback of a media server.

1. **Play status icon**
   - Shown according to the playback status of the song/station (radio station).
   - **Repeat All/1 Song ( )**
     - Shown when the input is “Server” and Repeat play is set. Please note that it may not be shown when playing music on a smartphone or tablet, since it depends on the status of the device.
   - **Play/Pause ( )**
     - Shown when the input is “Server” or “Bluetooth” and it is playing or paused.
     - Play icon is also shown when the input is “AirPlay” or “Net Radio” and it is playing.
   - **Shuffle ( )**
     - Shown when the input is “Server” and Shuffle play is set. Please note that it may not be shown when playing music on a smartphone or tablet, since it depends on the status of the device.

2. **-∞ (When at minimum volume) /MUTE**
   - When the volume is at the minimum, “-∞” is shown flashing. When muted, “MUTE” is shown flashing.
Information area

The following information is shown depending on the selected input.

When selecting CD, PHONO, LINE1, LINE2, OPTICAL1, OPTICAL2, COAXIAL1, COAXIAL2 or a music streaming service

The input name is displayed.

When selecting USB DAC

The audio format and sampling frequency of the playback signal is displayed.

When selecting Server or Net Radio

The information of the current song or station is displayed. To switch the displayed item, press the DISPLAY key on the remote control.

When selecting AirPlay or Bluetooth

The information of the current song or the input name is displayed. To switch the displayed item, press the DISPLAY key on the remote control.

When selecting TUNER

The frequency is displayed. The information of Radio Data System (models for U.K., Europe and Russia) or DAB (models for U.K., Europe, Russia and Australia) is also displayed. To switch the displayed item, press the DISPLAY key on the remote control.

NOTE

Some text characters may not be available, and “_” is displayed.

Browse indication

This indication is shown only when the input source is “Server” or “Net Radio” and you are selecting the desired song or station.

1. Operation direction indicator

Available browse direction(s) are shown.

2. File information icon

The type of content currently being shown is indicated by this icon.

When Server is selected

- Indicates a music file.
  
  Music files in formats not supported by this product may also be shown (p.139).

- Indicates a folder.

- Indicates a file that cannot be played.

When Net Radio is selected

- Indicates a folder.

- Indicates a radio station that can be selected.
Warming up indication

This indication is shown immediately after this product is turned ON. Icons are shown to indicate the temperature condition of the amp. Use this as an estimate of the time until the sound quality will stabilize.

NOTE

The brightness of the display is dimmed to protect the display unit when the product is not operated for a certain amount of time. The display returns to its normal brightness when the remote control or front panel is operated.

- When PURE DIRECT is ON, the front display turns OFF. After turning OFF, the display comes back ON when the remote control or front panel is operated.
- The basic indication turns off if no operations are performed for a certain amount of time. The time until the display turns off can be changed on the Setup menu.
- The maximum number of text characters for displaying content information (names of stations/songs, etc.) on the basic indication or browse indication varies depending on the selected input and the type of characters.

Related links

“Configuring the front display” (p.106)
Rear panel

The following are the names of parts on the rear of the unit and an explanation of their functions.

1. **CD IN jacks**
   For connecting to the analog audio OUT of devices like CD players (p.25).

2. **OPTICAL 1-2 IN jacks**
   For connecting to external devices with an optical digital output (p.25).

3. **COAXIAL 1-2 IN jacks**
   For connecting to external devices with a coaxial digital output (p.25).

4. **USB port**
   For connecting to computers (p.26). Compatible with USB type B connectors.

5. **NETWORK jack**
   For connecting a network cable when connecting this product to a wired network (p.38).

6. **Wireless antenna**
   For connecting this product to a wireless network (Wi-Fi) (p.39). It is also used for Bluetooth connections (p.69).

7. **SERVICE ports**
   These are service ports that are used when performing repairs, etc. Do not plug anything into them.

8. **AC IN jack**
   For connecting the included power cord (p.40).

9. **LINE 1-2 IN jacks**
   For connecting to external devices with analog audio OUT (p.25).
PHONO IN jacks
GND jack
For connecting to a turntable (record player) (p.25).

PRE OUT jacks
Outputs the same audio signal that is output to the SPEAKERS L/R jacks (p.25).

ANTENNA jack
For connecting to a radio antenna (p.34).

TRIGGER OUT jack
For connecting to external devices that support the trigger function (p.33).

SUBWOOFER OUT jack
For connecting to a subwoofer with a built-in amplifier (p.32).

SPEAKERS L/R jacks
For connecting to speakers (p.28).
Remote control signal transmitter

Sends the remote control signal (infrared).
NAMES OF PARTS AND THEIR FUNCTIONS > Remote control

2. SPEAKERS A and B keys
For switching the output speakers. Toggles Speakers A or B ON/OFF each time it is pressed (p.52).

3. Input source selection keys
Selects the input source to play (p.53).

   NOTE
Pressing the NET key repeatedly switches between the network sources.

4. DISPLAY key
Switches the display between different kinds of information (p.16).

   MEMORY key
For registering radio stations (presets) (p.67). It can also be used for registering songs on media servers or Internet radio stations (p.88).

   PRESET keys
Used for recalling registered (preset) radio stations (p.63) and registered songs/Internet radio stations (p.90).

5. 1/2/3 keys
For registering and recalling your favorite radio stations or network content to separate presets (p.88).

6. HOME key
Goes to the very top level when selecting music files, folders, etc.

7. SETUP key
Opens the Setup menu (p.94).

8. NOW PLAYING key
Shows info about the currently playing network content.

9. (Power) key
Switches the power of this product between ON and Standby (p.41).

10. SLEEP key
Sets the sleep timer (p.92).

11. Menu operation keys
   ▲▼◄► (cursor keys), ENTER, and RETURN
For operating the menus.

12. OPTION key
Opens the Option menu (p.78).

13. MUTE key
Mutes the sound. Pressing it again returns the volume to its previous level.

14. VOLUME +/- keys
Adjusts the volume (p.54).
Playback keys

REPEAT key, ▶/■ (Play/Pause) key, SHUFFLE key, ◁/icie (Skip/Rewind) key, ■ (Stop) key, ▶▶/▶▶l (Fast-Forward/Skip) key

For operating playback, such as a media server, Internet radio, or Bluetooth.
PREPARATION

Preparing the remote control

How to insert batteries, and its operating range

Put the included batteries into the remote control facing the correct way (+/-).

The operating range of the remote control is as illustrated.

Point the remote control at the remote control signal (infrared) receiver when operating it.
Connecting audio devices

This explains connecting audio devices, such as a CD player, to the product. Use the type of cable appropriate for the jacks of the device to be connected, such as an RCA cable, optical fiber cable, or coaxial cable, which are commercially available.

**NOTE**
- The DIGITAL IN jacks of this product are only compatible with PCM signal (2-channel).
- The PHONO jacks of this product are compatible with MM cartridges. Use a step-up transformer or the like when connecting a turntable (record player) equipped with an MC (low-output) cartridge.
- For some turntables, connecting to the GND terminal of this product may reduce noise. However, there are also some turntables that have less noise if they are not connected to the GND jack.
- The GND terminal is not an electrical ground for safety purposes.

“Rear panel” (p.19)
Connecting to your computer (USB DAC function)

This product is equipped with a USB DAC function. If you connect the USB port of this product to a computer, you can enjoy the high quality sound of music files on the computer, thanks to the analog conversion process used by the DAC device of this product. In order to use this function, first install the dedicated drivers (computer software) provided by Yamaha onto the computer, and then connect the computer to this product.

■ Compatible operating systems

The following computer operating systems (OS) are supported. (As of May 2023)

- Windows 10/11
- macOS 13/12/11/10.15/10.14/10.13

■ About the drivers (computer software)

If the OS of the computer is Windows, it is necessary to install the dedicated driver, “Yamaha Steinberg USB Driver”. If your computer’s OS is macOS, its standard drivers work, so no special driver needs to be installed.

**NOTE**

- Services may not work even on a “compatible OS” due to the computer’s configuration, the environment, and/or version updating of the OS.
- Install the driver on your computer before connecting this product to it. If you connect it before installing the software, it may not work properly.

■ Installing the dedicated driver (Windows only)

Before connecting this product to your computer, install the dedicated driver onto the computer.

1. **Access the following URL and search for “Yamaha Steinberg USB Driver”.

   Software downloads page
   URL: https://download.yamaha.com/

2. **Download the latest driver.**

3. **Extract (uncompress) the downloaded files.**

4. **Install the driver onto your computer.**

   To install the driver, follow the installation guide that came with the driver when you downloaded it.

5. **When installation is complete, close all applications that are running.**

**NOTE**

If an old version of the driver is already on your computer, uninstall it and then install the new driver.
PREPARATION > Connecting external devices

- **Connect your computer**

Connect a USB cable (commercially available) to this product and your computer. The USB port of this product is compatible USB Type B connectors.

![USB connection diagram]

**NOTE**

- After checking what kind of USB port your computer uses, get the appropriate USB cable (commercially available).
- Use a USB cable of less than 3 meters.

**Related links**

“Playing audio from your computer (USB DAC)” (p.77)
Connecting speakers

Use speaker cable (commercially available) to connect speakers to the product.

About speaker impedance

- Use the speakers with an impedance of at least 4-ohm.
- Use the speakers with an impedance of at least 8-ohm in the following case.
  - When connecting 2 sets of speakers (Speaker A and Speaker B), and outputting from both the A and B jacks (selecting the output speaker to A+B).
  - When connecting 4-ohm (4-ohm or more but less than 8-ohm) speakers, change the speaker impedance on the Advanced Setup menu.

Related links

- “Selecting the output speakers” (p.52)
- “Switching speaker impedance” (p.113)
1. Peel off about 10 mm of insulation on the end of the speaker cable and twist its core tightly.

2. Turn the knob of the speaker jack to the left to loosen it, then insert the core of the speaker cable into the hole in the jack.

3. Turn the knob back to the right to tighten it.

**NOTICE**
- When preparing the speaker cable, do so far away from the product. Pieces of the core wires of the speaker cable may fall inside the product and cause a short circuit, resulting in malfunction.
- Do not allow the core wires of a speaker cable to touch the core wires of another speaker cable or any metal parts of the product. Doing so may damage the product and/or the speakers.

**NOTE**
Be sure to connect to the jacks correctly: left channel (L), right channel (R) and + (red), - (black). If connected incorrectly, no audio may be output from the speakers. Also, if the polarity is wrong, the audio may sound strange.

**Connecting via banana plug (Models for U.S.A., Canada, China, Taiwan and for Central and South America)**
When using a banana plug, tighten the knob of the speaker terminal and insert a banana plug into the end of the terminal.
PREPARATION > Connecting speakers

![Banana plug](image)

**Related links**
- “Making bi-wiring connections” (p.31)
- “Connecting a subwoofer” (p.32)
- “Switching speaker impedance” (p.113)
Making bi-wiring connections

Bi-wiring allows output to the speaker woofers (low frequency) and the tweeter/mid-range (mid to high-frequency) to be split and driven separately. Speakers compatible with bi-wiring are required for these connections.

1. **Remove the short bar or bridge attached to the jacks of the speakers.**

2. **Connect the product and the speakers as illustrated.**
   
The illustration shows connecting the left channel. Connect the right channel in the same way. Swapping the connections between speaker jacks A and B is OK.

   ![Diagram of speaker connections]

   **Rear panel**

**NOTE**

- If the system is connected with bi-wiring, turn ON both Speakers A and B by pressing the SPEAKERS A and SPEAKERS B keys when the power is ON.
- Use speakers with an impedance of at least 4 Ω and that are compatible with bi-wiring connections.

**Related links**

- “Selecting the output speakers” (p.52)
Connecting a subwoofer

To use a subwoofer, connect it to the product with a monaural pin cable (RCA) (commercially available).

Subwoofer (with built-in amplifier)
Trigger connection

Connecting a trigger-connection compatible Yamaha device

The trigger function allows external devices to be controlled linked with the operation (power ON/OFF) of this product. If you are using a Yamaha subwoofer that supports system connections, or a device with a Trigger IN jack, you can use the trigger function by connecting it to a TRIGGER OUT jack of this product via a mono mini-plug cable.

When this product is turned ON, it outputs a signal (12 V, 0.1 A) from the TRIGGER OUT jacks, linking them.

NOTE
On some Yamaha subwoofers, the trigger connection may be called “System Connection”.
Connecting radio antennas

Connecting an FM antenna

Model For
U.S.A., Canada, China, Korea, Asia, Taiwan, Central and South America

Connect the included FM antenna to the product.
After connecting the FM antenna, secure it to a wall.
**Connecting an AM antenna**

**Model For**
U.S.A., Canada, China, Korea, Asia, Taiwan, Central and South America

Connect the included AM antenna to the product.
Put the AM antenna in a flat location after connecting it.

![AM antenna connection](image)

**Assembly and connection of the AM antenna**

![Assembly and connection steps](image)

**NOTE**
- Only unwind as much wire from the antenna unit as is required for wiring.
- The cord of the AM antenna does not have polarity.
Connecting a DAB/FM antenna

Model For
U.K., Europe, Russia and Australia

Connect the included DAB/FM antenna to the product.
Fix the antenna ends to a wall.

NOTE
- The antenna should be stretched out horizontally.
- If you cannot obtain good reception on the radio, adjust the height, direction or placement of the DAB/FM antenna.
Preparing a network connection

To make a network connection

This product supports both wired and wireless connections. Select the connection method according to your network environment.

Connecting to a network allows you to play Internet radio stations and music files stored on media servers such as computers or network-attached storage (NAS).

NOTICE

- When connecting the product to the Internet, be sure to connect via a router to ensure security. Set up an appropriate password for the router that it goes through. Do not connect directly to communication lines (including public LANs) of telecommunications carriers (mobile communication companies, fixed-line providers, Internet providers, etc.).

Related links

- “Connecting a network cable (wired connection)” (p.38)
- “Preparing the wireless antenna (wireless connection)” (p.39)
Connecting a network cable (wired connection)

Use a network cable (CAT-5 or higher straight cable) (commercially available) to connect the product to the router.

If the router is compatible with DHCP servers, network settings do not have to be configured for this product.

**NOTE**

- If the router is not compatible with DHCP servers, or if you want to configure the network parameters manually, you must configure the network settings.
- Use STP (Shielded Twisted Pair) cable to prevent electromagnetic interference.

**Related links**

“Configuring a network” (p.96)
Preparing the wireless antenna (wireless connection)

To use a wireless or Bluetooth connection, flip up the wireless antenna.

NOTICE
- Do not exert excessive force on the wireless antenna. Doing so may damage it.

Related links
- “Registering with the MusicCast network” (p.43)
- “Selecting the wireless method of connecting to the network” (p.134)
Turning the product ON

Connecting the power cord

After making all the connections, connect the included power cord.

Rear panel

Connect to a power outlet

NOTE

Be sure to unplug this product from the power outlet when it will not be used for a long time. This product consumes a small amount of electricity even when its power is in Standby.
PREPARATION > Turning the product ON

# Turning the power ON

Turn the product ON.

1. **Press the (Power) Switch on the front panel.**
   
The power comes ON and the Power Indicator lights up.

2. **When the following message is shown on the front display, press RETURN on the front panel.**
   
   When you connect this product to the router with a network cable (wired connection), this operation is skipped.
   
   It may take about 30 seconds for the message to be shown. The portion marked with “*” varies depending on the device.

   ![Front panel](image)

---

41
“Wireless WAC” Display

- The WAC (Wireless Accessory Configuration) function is for applying the wireless settings of an iOS device to another device and wirelessly connecting to the network. The steps for connecting to a network using MusicCast Controller are explained in the chapter “PREPARATION”. Therefore, how to cancel WAC is explained here.
- The WAC message is displayed the first time you use the product and after it is initialized.

NOTE

- It takes several seconds from turning the power ON until audio is played.
- After turning the power OFF, do not try to turn it ON again for at least 10 seconds. Doing so may generate some noise.

“Making a wireless connection with your iPhone (WAC)” (p.136)

### Operating the power with the remote control

When the (Power) Switch on the front panel is ON, the product switches between ON/Standby each time the (Power) key on the remote control is pressed.

NOTE

When the product’s power is in Standby, to turn the power ON without using the remote control, press the (Power) Switch to turn it OFF momentarily, and then press it again to turn it ON again.
Configuring MusicCast settings (connecting to a network)

Registering with the MusicCast network

Register the product to the MusicCast network. You can configure network connection settings for the product at the same time. The dedicated app “MusicCast Controller” for mobile devices is required for making settings. Find “MusicCast Controller” (free) in the App Store or Google Play and install it.

1. Start “MusicCast Controller” on your mobile device(s) and tap “Setup”.
2. Follow the instructions provided by “MusicCast Controller”.

NOTE

- To connect to the network wirelessly, ensure that you have the SSID and security key of the wireless LAN router (access point) you wish to use.
- To configure a second and subsequent MusicCast-compatible devices, tap “Settings” > “Add New Device” in “MusicCast Controller”.

“Configuring a network” (p.96)
Automatic adjustment of speaker settings (YPAO)

Running YPAO

To run YPAO, the included YPAO microphone must be used.

YPAO is a function that adjusts acoustic characteristics such as volume balance by detecting speaker connections and the distance between your listening position and the speakers. This function can be applied either to speakers directly connected to the speaker jacks of this product, or to speakers driven by an external amp connected to the PRE OUT jacks.

NOTE
- YPAO makes loud sounds while it is running. The volume cannot be adjusted.
- To ensure correct YPAO adjustment, pay attention to the following while it is running.
  - Do not make any loud noises.
  - Do not get in between the speakers and the YPAO microphone.
  - Do not plug in headphones.
- If you change the speaker's configuration, such as replacing a speaker or adding/removing a subwoofer, be sure to run YPAO again.

1 On the front panel, check the following before running YPAO.
   - BASS and TREBLE are in their center positions.
   - BALANCE is in its center position.
   - LOUDNESS is in its center position (FLAT).
   - PURE DIRECT is OFF.

2 Press the SPEAKERS A key and/or SPEAKERS B key to select the speakers to use.
   - If they are connected with bi-wiring, turn ON both Speakers A and B (A+B).
   - When using an amplifier connected to the PRE OUT terminal, turn OFF both Speakers A and B.

   NOTE
   This operation can be done also with SPEAKERS on the front panel.

3 If a subwoofer will be used, turn its power ON and adjust the volume to its midpoint.

   If the crossover frequency can be adjusted, set it to the maximum.

   If a subwoofer will not be used, go to the next step.

   NOTE
   The actual subwoofer volume and crossover frequency are set by the YPAO function of this product. However, during Pure Direct playback, they follow the subwoofer's setting. When using Pure Direct, adjust the subwoofer volume and crossover frequency to your favorite value, and then run YPAO.
4  **Put the included YPAO microphone in the listening position (ear height).**

Secure the YPAO microphone in place so it does not move. If a camera tripod is used for the microphone, its screws can be used to secure the microphone.

5  **Plug the YPAO microphone into the YPAO MIC jack on the front panel.**

The following message appears on the front display.

![YPAO Start](image)

**NOTICE**

- Be careful not to stumble on the YPAO microphone cable. Doing so may damage the YPAO microphone.
6 Press the ENTER key to start YPAO making the automatic adjustments of speaker settings.

Adjustments start automatically after about 10 seconds. It takes about one minute.

NOTE
To cancel the operation before starting the YPAO function, unplug the YPAO microphone. After YPAO has started, press the RETURN key.

7 Check the results on the front display.

After all adjustments are complete, the results are shown on the front display. Follow the instructions and press the ENTER key to complete the adjustments.

8 Unplug the YPAO microphone from the YPAO MIC jack.

This completes the automatic adjustments of speaker settings via YPAO.

NOTICE
- The YPAO microphone is sensitive to heat, so avoid hot places (such as on top of an external device) or places in direct sunlight when storing it.

NOTE
- Running YPAO automatically enables the YPAO Volume function, which is linked to the volume and automatically adjusts the bass/treble balance. This allows you to enjoy a natural balance in sound quality, even at low volumes.
- Run the YPAO process for each set of speakers that will be used. Speaker settings are saved individually for each of the speakers used (A, B, A+B and Off).
- Error messages may be displayed during auto-adjustment, and/or warning messages may appear in the results.
- You can use the dedicated app “MusicCast Controller” to check the results of YPAO measurements and change the speaker settings.
PREPARATION > Automatic adjustment of speaker settings (YPAO)

Related links

## Error and warning messages

When error or warning messages are displayed, resolve the cause based on the following table and measure again.

### Error Messages

<table>
<thead>
<tr>
<th>Error Messages</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>E-1: Noisy</td>
<td>Measure again after making the room quiet.</td>
</tr>
<tr>
<td>E-2: No Signal</td>
<td>Plug the YPAO microphone securely into the YPAO MIC jack and measure again. If this error occurs frequently, contact the outlet where you bought this product, or the authorized Yamaha service center.</td>
</tr>
<tr>
<td>E-3: No MIC</td>
<td>Plug the YPAO microphone securely into the YPAO MIC jack and measure again.</td>
</tr>
<tr>
<td>E-4: User Cancel</td>
<td>Depending on your purpose, measure again or close YPAO.</td>
</tr>
<tr>
<td>E-5: Headphone plugged</td>
<td>Unplug the headphones and then measure again.</td>
</tr>
<tr>
<td>E-10: Internal Err.</td>
<td>After finishing YPAO, turn this product OFF and back ON. If this error occurs frequently, contact the outlet where you bought this product, or the authorized Yamaha service center.</td>
</tr>
<tr>
<td>E-20: No Speakers</td>
<td>Select the speakers to use (A, B, A+B or Off) and then measure again. If the same error message appears again, exit YPAO, turn OFF this product, and check the speaker and/or PRE OUT jack connections. If using an external amp, check its connections and power.</td>
</tr>
<tr>
<td>E-21: Control Knob</td>
<td>Make sure the controls on the front panel, BASS, TREBLE, BALANCE and LOUDNESS, are in the center or FLAT positions, and then measure again.</td>
</tr>
<tr>
<td>E-22: Pure Direct</td>
<td>Turn PURE DIRECT on the front panel OFF (indicator not lit) and then measure again.</td>
</tr>
</tbody>
</table>

**NOTE**

- To exit YPAO in order to resolve the cause, press the ENTER key and then use the cursor keys (▲/▼) to select “Cancel” and press the ENTER key.
- To measure again, press the ENTER key and then use the cursor keys (▲/▼) to select “Retry” and press the ENTER key.

### Warning Messages

Even when a warning message is displayed, the measurement results can still be saved. However, to get the best speaker settings, we recommend resolving the cause and running the measurements again.
## Warning Messages

<table>
<thead>
<tr>
<th>Warning Messages</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>W-1: Out of Phase</strong></td>
<td>Check the cable connections (+ &amp; -) of the corresponding speakers.</td>
</tr>
<tr>
<td><strong>If connected incorrectly:</strong></td>
<td>Reconnect the speaker cables.</td>
</tr>
<tr>
<td><strong>If connected correctly:</strong></td>
<td>This message may appear even when everything is connected correctly, depending on the kind of speakers and installation environment. Save the settings and use the system as-is. (This message prompts you to check the system and it does not affect playing this product if used as-is.)</td>
</tr>
<tr>
<td><strong>W-2: Over Distance</strong></td>
<td>Check the distance between the listening position and the corresponding speakers.</td>
</tr>
<tr>
<td><strong>W-3: Level Error</strong></td>
<td>Correct the connections or placement of the corresponding speakers. Use the same or similar speakers with similar performance if possible. If there is a problem with a subwoofer, check that its volume is appropriate.</td>
</tr>
</tbody>
</table>

### NOTE

Turn OFF this product before reconnecting or relocating speakers.
Using the app to check YPAO measurements and change settings

You can use the dedicated app “MusicCast Controller” to check the results of YPAO measurements and change the settings. Use a mobile device with “MusicCast Controller” installed on it to perform these steps. The screens shown in the following steps are examples when “Living Room” is set to the name of the room in which this product is installed.

1. Start “MusicCast Controller” on your mobile device(s), select the room in which this product is installed, and then tap the settings icon.

![Image of the settings screen]

2. Tap the room in which this product is installed from “Room Settings” on the Settings screen.

3. Tap “Speaker Setup” under “YPAO” on the room screen (this product).

4. Confirm the YPAO measurement results on the Speaker Settings screen.

You can also change the settings from the Speaker Settings screen.

“Registering with the MusicCast network” (p.43)
PLAYBACK

Basic operations

Selecting the output speakers

Press the SPEAKERS A key and/or SPEAKERS B key to select the speakers to output to.

Switches Speakers A or B ON/OFF each time it is pressed. You can check which speakers are selected on the front display.

- A: Outputs from Speakers A.
- B: Outputs from Speakers B.
- A+B: Outputs from both Speakers A and Speakers B.
- Off: Does not output from either Speakers A or B.

NOTE

- This operation can be done also with SPEAKERS on the front panel.
- Regardless of the speaker selection, audio is always output to the PRE OUT jacks.
- If the speakers are connected with bi-wiring, select A+B.
- When headphones are connected, no audio is output from the speakers or PRE OUT jacks.
Selecting an input source

To play music, select the desired input source.

1. Turn ON an external device.

2. Press an input source selection key to select an input source.

   Selects the input source from the following.
   - PHONO key: audio from turntable (record player) input via the PHONO jacks.
   - LINE 1/2 keys: audio input via the LINE 1/2 jacks.
   - CD key: audio input via the CD jacks.
   - USB DAC key: computer audio input via the USB port.
   - OPT 1/2 keys: audio input via the OPTICAL 1/2 jacks.
   - COAX 1/2 keys: audio input via the COAXIAL 1/2 jacks.
   - TUNER key: audio from a radio station.
   - BLUETOOTH key: audio from a device, such as a smartphone, connected via Bluetooth.
   - NET key: audio input via the NETWORK jack or wirelessly.

3. Operate an external device to start playback, or select a radio station with this product.

NOTE
- You can also turn INPUT on the front panel to select the input source.
- For information on operating your external device, refer to its operating manual.
Adjusting the volume

Press the VOLUME +/- keys to adjust the volume.

NOTE

- You can also turn VOLUME on the front panel to adjust it.
- Pressing the MUTE key mutes the sound. Pressing it again returns the volume to its previous level.
- You can adjust the sound to your preference with BASS, TREBLE, BALANCE and LOUDNESS on the front panel.

Related links

- “Adjusting bass and treble (BASS/TREBLE)” (p.57)
- “Adjusting left/right volume balance (BALANCE)” (p.58)
- “Making it easier to hear bass and treble at low volumes (LOUDNESS)” (p.59)
**Switching the front display**

The information shown on the front display can be changed depending on the current input source. Repeatedly press the DISPLAY key of the remote control to select the desired display item.

The selected information is displayed after 3 seconds.

The following display items are available.

<table>
<thead>
<tr>
<th>Currently input source</th>
<th>Displayed item</th>
</tr>
</thead>
</table>
| **TUNER (FM/AM)**      | Frequency  
  (Models for U.K., Europe, and Russia) Radio Data System data is also available when this product is tuned into a Radio Data System broadcasting station. For details, see the following:  
  • “Displaying the Radio Data System information” (p.64) |
| **TUNER (DAB)**        | Frequency  
  (Models for U.K., Europe, Russia, and Australia)  
  For details, see the following:  
  • “Displaying the DAB information” (p.65) |
| **Server**             | Track, Artist, Album, Time                                   |

| **Net Radio**          | Track, Album, Time, Station                                  |
| **Bluetooth**          | Track, Artist, Album                                         |
Adjusting the sound to your preference

Enjoying Pure Direct playback (PURE DIRECT)

Pure Direct stops various processes and circuitry except for the basic ones for playback, letting you enjoy higher quality sound with reduced noise.

Press PURE DIRECT to turn it ON, and the indicator lights up.

NOTE

- When using Pure Direct, the following functions are disabled.
  - The various adjustment functions: BASS, TREBLE, BALANCE, and LOUDNESS
  - Settings made via YPAO
  - Operation of Option menu and Setup menu
  - Indications on the front display (when no operations performed)
- When using Pure Direct, transmissions to the MusicCast Network are not available, except the audio of network content and Bluetooth devices.

Related links

“Using the app to check YPAO measurements and change settings” (p.50)
PLAYBACK > Adjusting the sound to your preference

**Adjusting bass and treble (BASS/TREBLE)**

You can adjust the level of high-frequency range (Treble) and low-frequency range (Bass) individually.

### Adjusting the bass

When the bass feels too weak, turn BASS to the right to increase it. When it feels too strong, turn BASS to the left to reduce it.

It has flat characteristics when set to the middle.

Setting range: -10 dB to 0 to +10 dB (20 Hz)

### Adjusting the treble

When the treble feels too weak, turn TREBLE to the right to increase it. When it feels too strong, turn TREBLE to the left to reduce it.

It has flat characteristics when set to the middle.

Setting range: -10 dB to 0 to +10 dB (20 kHz)

**NOTE**

When Pure Direct is used, the settings are disabled (left and right channels are fixed at 0 dB).
Adjusting left/right volume balance (BALANCE)

Any unbalance in volume due to positioning of the speakers and/or conditions in the room can be corrected by adjusting the balance of the volume between the left and right speakers.

![BALANCE diagram]

Turn BALANCE left or right to adjust the left channel (L) or the right channel (R). When turned all the way to the left or right, it mutes the opposite channel.

**NOTE**

When Pure Direct is used, the setting is disabled (left and right channels are fixed at 0 dB).
Making it easier to hear bass and treble at low volumes (LOUDNESS)

It lowers the volume of the midrange and allows the listener to enjoy natural sound even at low volumes by compensating for the human auditory characteristic that makes it difficult to hear bass and treble at low volumes.

CAUTION

- If you enable Pure Direct after adjusting LOUDNESS, the input signal bypasses the loudness adjustment function and the volume increases suddenly. To protect your ears and the speakers from damage, always check the state of LOUDNESS before enabling Pure Direct, and if it is set to any position other than FLAT, lower the volume.

1. Put LOUDNESS to the FLAT position.
2. Turn VOLUME up to the maximum level at which you normally listen to music.
3. Turn LOUDNESS counterclockwise to a moderate volume.

NOTE

- If the YPAO Volume function is enabled, loudness adjustment cannot be used.
- When Pure Direct is used, the settings are disabled (equivalent to the FLAT position).
- After making the settings, if the loudness effect is too strong (or weak) when played at your desired volume, adjust it again.
Listening to the radio

Preparing to listen to the radio

Setting the frequency steps

Model For
Asia, Taiwan, Central and South America

Set the radio tuning frequency steps of this product depending on your country or region. At the factory, the frequency step setting is set to 50 kHz for FM and 9 kHz for AM. Depending on your country or region, set the frequency steps to 100 kHz for FM and 10 kHz for AM.

1. Push the (Power) Switch on the front panel to turn the power OFF.
2. While pressing RETURN on the front panel, push the (Power) Switch.
3. Turn SELECT on the front panel to choose “Frequency Step” and press SELECT.
4. Turn SELECT to choose “FM100/AM10” and press SELECT.
5. Push the (Power) Switch to turn it OFF.
6. Push the (Power) Switch again to turn it back ON.

This completes the settings.

NOTE
Preset (registered radio stations) and frequency will be initialized if you change the radio tuning frequency steps.

Related links
“Changing the FM/AM tuning frequency setting” (p.111)
Preparing the DAB tuning

Model For
U.K., Europe, Russia and Australia

Before listening to DAB (Digital Audio Broadcasting) radio, perform an initial scan to register the DAB radio stations automatically.

1. **Switch the input to “TUNER”**.
2. **Press the TUNER key to select the DAB band**.

   ![DAB Initiate Scan]

   After 3 seconds, the initial scan starts. When the initial scan finishes, this product automatically tunes in to the first DAB radio station in order by frequency.

**NOTE**
- DAB uses digital signals for clearer sound and more stable reception compared to analog signals. This product can also receive DAB+ (an upgraded version of DAB) that allows for more stations using MPEG-4 HE-AAC v2 audio codec, which has a more efficient transmission method.
- Be sure to check the DAB coverage in your area in that not all areas are currently being covered. For a list of nationwide DAB statuses and worldwide DAB frequencies, check WorldDMB online at [http://www.worlddab.org/](http://www.worlddab.org/).
- If no DAB radio stations are found by an initial scan, the front display will change to “Off Air”.
- To perform an initial scan again after some DAB radio stations are stored, select “Init Scan” in the Option menu. If you perform an initial scan again, the DAB radio stations currently registered to the preset numbers will be cleared.
- You can check reception strength of each DAB channel label. Select “Tune AID” in the Option menu.

**Related links**
- “Checking reception strength of each DAB channel label” (p.84)
- “Performing an initial scan for DAB radio reception” (p.83)

Selecting a radio station

You can use the this product’s built-in tuner to listen to the radio.

1. **Switch the input to “TUNER”**.
   
The currently selected frequency is shown on the front display.

   ![FM 95.10MHz]

2. **Press the TUNER key to switch to the next reception band**.
   
   - FM/AM (Models for U.S.A., Canada, China, Korea, Asia, Taiwan and for Central and South America)
   - DAB/FM (Models for U.K., Europe, Russia and Australia)

3. **Select a radio station**.
   
   - To specify a frequency and select a radio station, press the cursor keys (◄/►) repeatedly. You can also search for stations automatically by long-pressing the cursor keys (◄/►).
   - To select a registered radio station, press the PRESET key and choose the desired preset number. To go back to selecting stations via frequency, press the RETURN key.

**NOTE**

- The FM radio reception mode (stereo/mono) can be set via “FM Mode” in the Option menu. When reception of an FM radio is unstable, it may help to switch to mono reception.
- You can check reception strength of each DAB channel label. Select “Tune AID” in the Option menu.

Displaying the Radio Data System information

Model For
U.K., Europe and Russia

Radio Data System is a data transmission system used by FM stations. This product can receive various types of data, such as “Program Service”, “Program Type”, “Radio Text” and “Clock Time”, when it is tuned in to a Radio Data System broadcasting station.

1 Tune in to the desired Radio Data System broadcasting station.

2 Press the DISPLAY key on the remote control to select between the various display items.

The information appears on the front display.

| Frequency | Frequency
|-----------|-----------|
| Program Service | Program service name
| Program Type | Current program type
| Radio Text | Information on the current program
| Clock Time | Current time

NOTE
- “---” is displayed in “Program Service”, “Program Type”, “Radio Text”, and “Clock Time” if the radio station does not provide the Radio Data System service.
- We recommend using “Auto Preset” to tune in to the Radio Data System broadcasting stations.

Auto-registering FM radio stations (auto preset)

This function automatically registers the FM stations with the strongest signal to preset numbers.

1. Switch the input to “TUNER”.
2. Switch the reception band to FM.
3. Press the OPTION key.
4. Select “Auto Preset” with the cursor keys (▲/▼) and then press the ENTER key.
5. Use the cursor keys (▲/▼) to select a preset number for starting the auto preset process.
6. Press the ENTER key.

Auto presetting begins and “Searching” is shown during the auto preset process.

Once auto preset is complete, “Finished” is displayed and the Option menu closes automatically.

NOTE
- A maximum of 40 radio stations can be registered.
- To cancel auto preset, press the RETURN key.
- (Models for U.K., Europe and Russia) Only Radio Data System broadcasting stations are registered automatically by the Auto Preset function.

Related links

Registering radio stations manually

You can select a radio station and register it manually to a preset number.

1. Select a radio station.
2. Press the MEMORY key.

```
FM 95.10MHz
^01:Empty
```
3. Press the PRESET key and select the preset number to register.
4. Press the MEMORY key.

```
Memorized
^01:FM 95.10MHz
```

This completes the registration.

**NOTE**
- A maximum of 40 radio stations can be registered.
- To register a radio station to the next empty number from the previously preset number, press the MEMORY key for 3 seconds or so while on the desired radio station.
- To go back to the original screen without registering, press the RETURN key.
- After 30 seconds of inactivity, the display automatically returns to the previous screen.

Removing the registration of a radio station

This explains how to remove the registration of a preset radio station.

1. Switch the input to “TUNER”.

2. Press the OPTION key.

3. Select “Clear Preset” with the cursor keys (▲/▼) and then press the ENTER key.

4. Press the PRESET key, select the preset number to remove, and then press the ENTER key.

   Once the registration is removed, “Cleared” is displayed and the next registered preset number is displayed.

5. To remove another preset number, repeat step 4.

6. Press the OPTION key.

This completes removal of the registration.
Playing via a Bluetooth® connection

Playing the audio of a Bluetooth device on this product (audio reception)

This product can play music files and the like saved on a Bluetooth device (such as a smartphone).

CAUTION

- If you adjust the volume on the Bluetooth device, it may get unexpectedly loud and cause damage to your hearing and/or equipment. If the volume becomes too loud during playback, stop playback immediately.

1. **Switch the input to “Bluetooth”**.

2. **Select this product (network name of this product) on the Bluetooth device.**
   - If a passkey is required, enter the number “0000”.

3. **Play the audio of the Bluetooth device.**

NOTE

- If a paired Bluetooth device is detected, the input switches and the device is connected automatically. To connect to a different Bluetooth device, first disconnect the current connection.
- Use the playback keys on the remote control to control playback on the Bluetooth device.
- The volume on this product can be controlled from the Bluetooth device while it is playing (some Bluetooth devices may not be possible to control the volume).
- To disconnect the Bluetooth device, do any of the following.
  - Perform a disconnect operation on the Bluetooth device.
  - Press the BLUETOOTH key for 3 seconds (it may take some time to disconnect).
  - Switch the input of this product to anything other than “Bluetooth”.
  - Switch “Bluetooth” on the Setup menu to “Off”.
- The Bluetooth indicator on the front panel lights up when a Bluetooth device is connected.
- You can switch the playback information shown on the front display by repeatedly pressing the DISPLAY key while it is playing.

Playing this product’s audio through Bluetooth speakers/headphones (audio transmission)

You can output the audio playing on this product to Bluetooth speakers/headphones. Only connect to Bluetooth speakers/headphones that have volume adjustment. This product cannot adjust their volume.

1. Select an input other than “Bluetooth”.
2. Put the Bluetooth speakers/headphones that you wish to connect into pairing mode.
3. Select the input source with the MusicCast Controller app.
4. Tap the Settings icon on the playback screen.
5. Tap “Bluetooth Transmission” on the Sound Settings screen.
6. Turn “Bluetooth transmission” on from the Bluetooth Transmission settings screen.
7. Select the Bluetooth speakers/headphones to send to.

Once the connection is complete, audio is output from the Bluetooth speakers/headphones.

NOTE
- Adjust the volume on the connected Bluetooth device.
- The audio being played is also output from the speakers connected to this product.
- AirPlay, DSD, and PCM audio exceeding 192 kHz cannot be transmitted.
- When using Pure Direct, audio of input sources other than network content cannot be transmitted.
- Audio cannot be sent and received at the same time via the Bluetooth function.
- To disconnect the Bluetooth device, do any of the following.
  - Perform a disconnect operation on the Bluetooth device.
  - Switch the input of this product to “Bluetooth”.
  - Switch “Bluetooth” on the Setup menu to “Off”.
- The Bluetooth indicator on the front panel lights up when a Bluetooth device is connected.

Listening to internet radio

Selecting an internet radio station

When this product is connected to a network, you can select and play Internet radio stations.

1. **Press the NET key on the remote control repeatedly to switch the input to “Net Radio”**.
   
The browse indication is shown on the front display.

2. **Select the content with the cursor keys and press the ENTER key**.
   
   It starts playing.

**Explanation of key operations: playback keys**

- ▶/■ (Play/Pause) key: starts playback (cannot pause).
- ■ (Stop) key: stops playback.

**Explanation of key operations: playback info**

- NOW PLAYING key: shows playback information for the Internet radio station on the front display.
- DISPLAY key: press repeatedly during playback to switch the playback information shown on the front display.

**Explanation of key operations: content-related**

- Cursor keys: for selecting the Internet radio station, folders, etc. Pressing them during playback changes the front display to the browse indication, allowing other content to be selected.
- ENTER key: press when a folder is selected to move one level down. Press when an Internet radio station is selected to start playing it.
- RETURN key: displays one level up.
- HOME key: displays the very top level. Pressing this during playback changes the front display to the top level in the browse indication, allowing other content to be selected.

**NOTE**

- You can register your favorite content to presets and then recall it easily.
- Some Internet radio stations may not be available at all times.
- This function uses the airable.Radio service. airable is a service provided by the company airable GmbH. This service is subject to change, suspension, or termination without notice. Please note that the Yamaha Corporation is in no way responsible for this.

Playing songs on media servers (PC/NAS)

When this product is connected to a network, it can play music files saved on a media server connected to the same server.

NOTE
It is necessary to enable the media sharing setting on each device or media server software ahead of time. For more details, refer to the user’s manual of each device and software.

1. **Press the NET key on the remote control repeatedly to switch the input to “Server”**.
   The browse indication is shown on the front display.

2. **Select a media server with the cursor keys and then press the ENTER key**.

3. **Select the content with the cursor keys and press the ENTER key**.
   Once you select a song, it starts playing.

Explanation of key operations: playback keys
- ▶/■ (Play/Pause) key: starts or pauses playback.
- ■ (Stop) key: stops playback.
- ◄◄/◄◄ (Skip/Rewind) key: skips to the beginning of the current song (continuous press to the previous song).
- ►►/►►! (Fast-Forward/Skip) key: skips to the beginning of the next song.
- REPEAT key: changes the playback mode to Repeat. Check the settings on the front display.
  - Off: disables Repeat mode.
  - One: plays the current song repeatedly.
  - All: plays all the songs on the album (or in the folder) repeatedly.
- SHUFFLE key: changes the playback mode to Shuffle. Check the settings on the front display.
  - Off: disables Shuffle mode.
  - On: plays all the songs on the album (or in the folder) in random order.

Explanation of key operations: playback info
- NOW PLAYING key: shows playback information on the front display for the song that is playing.
- DISPLAY key: press repeatedly during playback to switch the playback information shown on the front display.

Explanation of key operations: content-related
- Cursor keys: for selecting music files, folders, etc. Pressing them during playback changes the front display to the browse indication, allowing other content to be selected.
PLAYBACK > Playing songs on media servers (PC/NAS)

• ENTER key: press when a folder is selected to move one level down. Press when a music files is selected to start playing it.
• RETURN key: displays one level up.
• HOME key: displays the very top level. Pressing this during playback changes the front display to the top level in the browse indication, allowing other content to be selected.

NOTE
• You can configure it so this product turns ON automatically when you start playing music on the media server.
• If the audio is cut off when connected to a wireless network, connect to a wired network.
• Playback can be controlled from a digital media controller (DMC).
• You can register your favorite content to presets and then recall it easily.
• When playing music on a device such as a smartphone or tablet, the settings of the device for repeat, shuffle, etc. are followed, so setting these features on the product may not have an effect.

Playing audio from your computer (USB DAC)

Playing music that is on your computer

When this product is connected to a computer via USB cable, it can play music that is on the computer.

NOTE
It may be necessary to install drivers when connecting this product to a computer.

1 Switch the input to “USB DAC”.

2 Set the audio output destination of the computer to “Yamaha USB DAC”.
   - For Windows OS:
     Start menu → Settings → System → Sound [Output]
   - For macOS:
     System Preferences → Sound → [Output] tab
     The method of configuration varies depending on the version of the OS.

3 Play music on your computer.
   Confirm that audio is being output from this product.

NOTE
- Some computer applications have independent settings for the output destination. In such case, check the settings of the application.
- Signal format information is displayed on the front display during playback. “---” is displayed when not playing or if the signal format is not supported.

Adjusting the volume

For better sound quality, set the volume on your computer to its maximum, and then gradually increase the volume on this product from the minimum until it reaches your desired level.

NOTE
- During playback, do not disconnect the USB cable, turn off this product, or switch the input. Doing so may result in product malfunction.
- If you wish to mute the sounds of your computer’s interface when playing music, change the settings of your computer.
- Music stored on your computer cannot be controlled via this product or its remote control. To control music saved on your computer, operate the computer.

USEFUL FUNCTIONS

Preset functions

Registering your favorite content to presets

Registering your favorite content (media server songs, Internet radio stations, etc.) to presets or the 1/2/3 keys makes it easy to recall it later.

Preset registration

“TUNER”, “Server”, “Net Radio” and some streaming services can be registered.

1 Select the radio stations you want to register, or play songs or Internet radio stations.

2 Press the MEMORY key.

3 Press the PRESET key and select the preset number to register.

4 Press the MEMORY key.

The preset number and content to register are shown on the front display. “Empty” is shown if not registered.

This completes the registration.

NOTE

- By pressing the MEMORY key for 3 seconds or longer, you can register empty preset numbers automatically.
- To go back to the original screen without registering, press the RETURN key.
- A total of 80 pieces of content can be registered: 40 for “TUNER” and 40 for network content such as “Server”, “Net Radio”, etc.
- The type of content that can be registered may vary for streaming services and “Net Radio” according to the selected radio station or the service.
Registering a favorite (1/2/3 keys)
“TUNER”, “Server”, “Net Radio” and some streaming services can be registered.

1. Select the radio stations you want to register, or play songs or Internet radio stations.

2. Press a numeric key (either 1/2/3) for 3 seconds or longer.

   If a favorite is already registered, it is overwritten.

   This completes the registration.

NOTE
- In addition to presets, favorites can be registered to each numeric key.
- If they cannot be registered, “Not Available” is shown on the front display.
Recalling content registered to a preset

Select the content you want to listen to from the content (songs from a media server or Internet radio) registered to presets and/or the 1/2/3 keys.

Recalling a preset

1. Press the TUNER key or the NET key.

2. Press the PRESET key and select the content you want to listen to.

3. Press the ENTER key.

The selected content starts playing.

NOTE
- If no presets at all have been registered, “No Presets” is displayed on the front display.
- You can use MusicCast Controller to view a list of or delete registered content (song name or radio station name).
- “TUNER” presets can only be recalled when the input is on “TUNER”. Some presets, such as “Server”, “Net Radio” and/or streaming services, can only be recalled if the input is on “NET” (which can be selected by the NET key).
- Presets can only be recalled when the power is turned ON.
USEFUL FUNCTIONS > Preset functions

■ Recalling a favorite (1/2/3 keys)

If you press a numeric key (either 1/2/3), the selected content starts playing.

NOTE

- When the power is in Standby and a number key is pressed, the power of this product turns ON and playback begins. To play content other than “TUNER” at this time, set “Network Standby” to “Auto” or “On” ahead of time, in “Network” in the Setup menu.
- The content can be recalled regardless of the selected input.

Correcting the knobs

You can correct the deviation of the control knobs on the front panel, such as BASS, TREBLE and BALANCE from the center positions, and LOUDNESS from the FLAT position. You may perform this calibration, for example, when the error message “E-21:Control Knob” is displayed during the YPAO measurements.

Advanced Setup menu

“Control Knob”

1. Press SELECT.

   “Start Calibration” is shown on the front display.

2. Adjust the control knob positions correctly.

   Make sure BASS, TREBLE and BALANCE are in the center positions, and LOUDNESS is in the FLAT position.

3. Press SELECT.

   Calibration is performed automatically, and once the process is complete, “Completed” is displayed on the front display.

   This completes the configuration.

■ In case of error

If “Err: Not Center” and “Error: ***” are displayed on the front display after the calibration, the related knob shown as “***” is out of position. Press RETURN, and repeat the process from step 2 again.

UPDATING

Checking the version of firmware

The version of this product’s firmware can be checked from the Setup menu. Do so as follows.

1. Press the SETUP key.
2. Select “Network” with the cursor keys (▲/▼) and then press the ENTER key.
3. Then select “Network Update” and press the ENTER key.
4. Check “Firmware Version”.

   The version of firmware appears on the front display.
   To close the Setup menu, press the SETUP key.

NOTE
The version of firmware can also be checked from the MusicCast Controller menu.

Related links
- “Configuring a network” (p.96)
- “Updating the firmware” (p.116)
Updated firmware is provided to add functionality to this product and/or resolve problems. For details about firmware, please visit the Yamaha website. Firmware can be updated via the Internet.

Related links
“Updating the firmware via your network” (p.117)
Updating the firmware via your network

If this product is connected to the Internet and it is ready for a new firmware update, the following message appears when you turn this product ON.

Update the firmware over the network from this screen.

**NOTICE**
- Do not operate the product or unplug its power cord or network cable during the updating process. If the process is interrupted, this product may become unusable. If that happens, please contact an authorized Yamaha service center to have it repaired.

1. **Press the ENTER key.**
   - “Perform Update” is displayed on the next screen.

2. **Press the ENTER key.**
   - The screen turns off and the firmware update begins.

3. **Once “Update Success” and “Please ... Power OFF!” are shown on the front display, press the unit’s (Power) Switch.**
   - This completes the firmware update.

**NOTE**
- It takes about 20 minutes to update the firmware.
- You can check whether there are any new firmware updates by selecting the following menu items in order: Setup menu > “Network” > “Network Info” > “New Firmware”.
- If new firmware is available, you can update it via “Network Update” in the “Network” on the Setup menu.

**Related links**

If you think there is a problem, the 1st step is checking the following

If the product stops working normally while you are using it, check the following items first.

- The power plugs of the product and audio device(s) (CD player, etc.) are firmly plugged into their outlets.
- The power of the product, the subwoofer and audio devices (CD player, etc.) is turned on.
- The cables between devices are securely plugged into the jacks.
Troubleshooting > If you think there is a problem

Problems with power, system, and/or remote control

Power fails to turn ON

* The protective circuit has been activated 3 times in a row.
  
  If the Power Indicator on the front panel flashes when you try to turn the power ON, it fails to come on in order to protect the product. Please contact an authorized Yamaha service center to have it repaired.

Power fails to turn OFF

* The built-in microcomputer has frozen due to an external electrical shock (such as from lightning or excessive static electricity) or a drop in electrical voltage.
  
  Turn OFF the power using the (Power) Switch on the front panel, wait at least 15 seconds, then turn the power ON.

Power turns OFF right away

* You may be trying to turn ON the power while the speaker cables are shorted.
  
  Firmly twist the core wires of each of the speaker cables and then reconnect them to this product and the speakers. For more details, refer to the following.
  
  • “Connecting speakers” (p.28)

Power switches to standby automatically

* The sleep timer activated.
  
  Turn the power back ON and start playback. For more details, refer to the following.
  
  • “Configuring the time for the sleep timer” (p.92)

* The Auto Power Standby function was activated as the set period of time elapsed without operating the product.
  
  To disable the Auto Power Standby function, set “Auto Power Stdby” to “Off” from the Setup menu. For more details, refer to the following.
  
  • “Configuring auto power standby” (p.104)

* Due to a short in the speaker cables, the protective circuit was activated.
  
  Firmly twist the core wires of each of the speaker cables and then reconnect them to this product and the speakers. For more details, refer to the following.
  
  • “Connecting speakers” (p.28)

* The volume was increased too high, activating the protective circuit.
  
  Lower the volume.

The product does not respond to controls

* The built-in microcomputer has frozen due to an external electrical shock (such as from lightning or excessive static electricity) or a drop in electrical voltage.
  
  Turn OFF the power using the (Power) Switch on the front panel, wait at least 15 seconds, then turn the power ON.
This product cannot be operated with the remote control

- **The (Power) Switch on the front panel is OFF.**
  
  Turn the (Power) Switch on the front panel ON.

- **It is outside the operating range.**
  
  Try using it within the operating range. For more details, refer to the following.
  - “How to insert batteries, and its operating range” (p.24)

- **Its batteries are dead.**
  
  Replace with new batteries.

- **Strong light or sunlight is hitting the remote control signal receiver on the main unit.**
  
  Change the lighting or the orientation of the unit.

- **The IDs of the main unit and the remote control do not match.**
  
  Change the ID of the main unit or of the remote control. For more details, refer to the following.
  - “Configuring the Remote ID” (p.110)

**The front display is OFF**

- **Pure Direct is ON.**
  
  When using Pure Direct, the front display turns OFF. After turning OFF, the display comes back ON when the remote control or front panel is operated.

- **The front display is set to turn OFF automatically.**
  
  Set “Display Sleep Time” to “Off” from the Setup menu. For more details, refer to the following.
  - “Configuring the front display” (p.106)
Problems with the audio

No sound

● A different input is selected.
  Use the input source selection key to select the correct input. For more details, refer to the following.
  • “Selecting an input source” (p.53)

● The product is receiving an input signal that it cannot play.
  This product cannot play some digital audio formats. Make sure the signal is in a format that this product
can play. See the following for information on supported file formats and decoding formats.
  • “Supported file formats on this product (network)” (p.139)
  • “Specifications” (p.142)

● A cable connecting this product and an audio device is damaged.
  If you check the connections and they seem fine, replace the cable with a different one.

● The output speakers are not set correctly.
  Press the SPEAKERS A key and/or SPEAKERS B key corresponding to the jacks to which the speakers are
connected to turn their output ON. For more details, refer to the following.
  • “Selecting the output speakers” (p.52)
  If using an external amp, check its connections and power.

● The audio is muted.
  Press the MUTE key to cancel muting.

● Headphones are plugged into the PHONES jack.
  Unplug the headphones.

● This product was put into Standby by the Auto Power Standby function.
  Set “Auto Power Stdby” to “Off” from the Setup menu. For more details, refer to the following.
  • “Configuring auto power standby” (p.104)

Volume cannot be increased

● The maximum volume is set too low.
  Adjust the maximum with “Max Volume” on the Setup menu. For more details, refer to the following.
  • “Configuring the volume” (p.103)

● The power of the external device connected to the output jacks of this product is OFF.
  Turn all corresponding devices ON.

● The volume interlocks between each device and this product have not been configured for
  Bluetooth/AirPlay playback from a Bluetooth device or AirPlay device.
  Configure the volume interlocks of each device via “Volume Interlock” on the Option menu. For more
details, refer to the following.
  • “Setting volume interlock with this product when playing an AirPlay/Bluetooth device” (p.85)

● LOUDNESS is set too low.
  First, lower the volume with VOLUME, then return LOUDNESS to the FLAT position and readjust the
volume.
TROUBLESHOOTING > If you think there is a problem

No sound is output from a particular speaker

- **BALANCE is set to the maximum for either left or right.**
  Adjust BALANCE so sound comes out of the left and right speakers.

- **A cable connecting this product and the corresponding speaker is damaged.**
  Check the connections of each jack on the speaker(s) and this product, and if no problem exists with the connections, the cable may be broken. Replace the cable with a different one.

- **The corresponding speaker may be damaged.**
  You can check this by replacing it with a different speaker that is functioning normally. If sound does not come from the replacement speaker either, this product may be faulty.

No sound is output from the subwoofer

- **Output to the subwoofer is disabled.**
  Run the YPAO function. For more details, refer to the following.
  - “Running YPAO” (p.44)
  Check the setting of subwoofer. For more details, refer to the following.
  - “Using the app to check YPAO measurements and change settings” (p.50)

- **The volume of the subwoofer is extremely low.**
  Adjust the volume on the subwoofer itself.

- **The auto standby function of the subwoofer (automatically turning the power OFF) was activated.**
  Disable auto-standby or adjust its operating sensitivity on the subwoofer itself.

Noise is being output

- **Digital and/or high frequency equipment is located near this product.**
  Increase the distance between this product and such devices.

- **A cable connecting this product and an audio device is damaged.**
  If you check the connections and they seem fine, replace the cable with a different one.

Sound is distorted

- **The power of an external amplifier, etc. connected to the PRE OUT jacks of this product is OFF.**
  Turn all corresponding devices ON.

- **The volume is too loud.**
  Lower the volume.

The subwoofer volume feels too strong during Pure Direct playback

- **The subwoofer volume and crossover frequency are not adjusted.**
  After adjust the subwoofer’s settings of the volume and crossover frequency to your favorite value during Pure Direct playback, run the YPAO function. For more details, refer to the following.
  - “Running YPAO” (p.44)
Problems with FM radio

Radio reception is poor or has noise

- **It is receiving multipath (multiple reflections) or other interference.**
  Change the height, orientation, and/or location of the FM antenna.
- **The radio station is being received from a distant region.**
  Switch to monoaural reception via “FM Mode” on the Option menu. For more details, refer to the following.
  - “Setting the reception mode (stereo/mono) for FM radio” (p.82)

Automatic selection of FM radio stations is not possible

- **The FM radio stations are being received from distant regions.**
  Manually select stations. For more details, refer to the following.
  - “Selecting a radio station” (p.63)
  Alternatively, use an outdoor antenna (commercially-available).

Cannot select radio stations by pressing the PRESET key

- **No radio stations are registered.**
  If no radio stations at all have been registered, “No Presets” is displayed on the front display when the PRESET key is pressed. Register radio stations to preset numbers. For more details, refer to the following.
  - “Registering radio stations manually” (p.67)
  Auto presets can also be used for FM radio stations. For more details, refer to the following.
  - “Auto-registering FM radio stations (auto preset)” (p.66)
  If the signals of FM radio stations are weak, no stations at all may be registered when auto preset is performed. In that case, register them manually.

- **The input is on something other than “TUNER”**.
  Press the TUNER key. “TUNER” presets can only be recalled when the input is on “TUNER”.
Problems with AM radio

AM radio reception is poor or has noise

● **It is picking up noise from sources like fluorescent lights, motors, etc.**
  It is difficult to completely eliminate noise from the environment. However, using a commercially-available outdoor antenna may help reduce the noise.

Automatic selection of AM radio stations is not possible

● **The AM radio signal is weak.**
  Change the direction of the AM antenna.
  Manually select stations. For more details, refer to the following.
  • “Selecting a radio station” (p.63)

Cannot register (preset) any AM radio stations

● **The auto registration function (auto preset) is being used.**
  Auto preset only works with FM radio stations. Please register AM radio stations manually. For more details, refer to the following.
  • “Registering radio stations manually” (p.67)

Cannot select radio stations by pressing the PRESET key

● **No radio stations are registered.**
  If no radio stations at all have been registered, “No Presets” is displayed on the front display when the PRESET key is pressed. Register radio stations to preset numbers. For more details, refer to the following.
  • “Registering radio stations manually” (p.67)

● **The input is on something other than “TUNER”.**
  Press the TUNER key. “TUNER” presets can only be recalled when the input is on “TUNER”.

TROUBLESHOOTING > If you think there is a problem
Problems with DAB radio

No DAB radio reception

- An initial scan has not been performed.
  Perform an initial scan to receive DAB radio. For details, see the following:
  - “Preparing the DAB tuning” (p.61)

No DAB radio reception even after performing an initial scan

- Reception strength of DAB radio is poor.
  Check reception strength via “Tune AID” on the Option menu, and adjust the antenna height or orientation, or place it in a different location. For details, see the following:
  - “Preparing the DAB tuning” (p.61)
- There is no DAB coverage in your area.
  Check with your dealer or WorldDMB online at “http://www.worlddab.org” for a listing of the DAB coverage in your area.

DAB radio reception is poor or has noise

- There is multi-path interference.
  Check reception strength via “Tune AID” on the Option menu, and adjust the antenna height or orientation, or place it in a different location. For details, see the following:
  - “Preparing the DAB tuning” (p.61)
- Your area is too far from the DAB station transmitter.
  Use an outdoor antenna. We recommend using a sensitive multi-element antenna.

DAB information is not available or is inaccurate

- The selected DAB radio station may be temporarily out of service or may not provide information.
  Contact the DAB broadcaster.

No DAB radio sound

- The selected DAB radio station may be temporarily out of service.
  Try the station later or select another station.
Problems with USB DAC

This product is not recognized by the PC
- **The product is connected to a PC that is running an OS that is not guaranteed to work with it.**
  
  Connect the product to a PC that is running an OS that is guaranteed to work with it.

- **The USB cable is not connected correctly.**
  
  Plug the USB cable back in correctly.

- **The dedicated “Yamaha Steinberg USB Driver” is not installed (Windows only).**
  
  Install “Yamaha Steinberg USB Driver”. For more details, refer to the following.
  - “Connecting to your computer (USB DAC function)” (p.26)

USB DAC stops working normally
- **This product is connected to your PC via a USB hub.**
  
  Connect the product to your PC directly without using a USB hub.

- **USB DAC does not work normally due to USB version compatibility or other effects.**
  
  Connect the USB cable to another port of your PC and check whether USB DAC is back to normal.
  Furthermore, try connecting to a USB 2.0 port.

There is noise or interruption when playing music files on the PC
- **Another application on the PC was started while it was playing a music file.**
  
  The audio may be interrupted or have noise when you start another application on your PC while playing a music file. Do not start other applications while playing a music file.

- **Setting for the buffer size of the dedicated “Yamaha Steinberg USB Driver” is incorrect (Windows with ASIO compatible software only).**
  
  Try the following steps to change “Yamaha Steinberg USB Driver” setting, and check whether the sound improves.
  1. Open the Control Panel of “Yamaha Steinberg USB Driver”.
  2. Start menu ➔ Yamaha Steinberg USB Driver ➔ Control Panel
  3. Select “ASIO” tab and increase the value for “Buffer Size”.
  4. Restart the music software on your PC.

Cannot play music files that are on the computer (no sound is output from this product)
- **The audio output of the PC and/or application is set to mute.**
  
  Cancel the mute setting on the PC and/or in the application.

- **The dedicated “Yamaha Steinberg USB Driver” settings were changed.**
  
  Restart the music software on your PC.

- **The USB connection was cut off while playing a music file.**
  
  Turn this product OFF and then turn it ON. After that, restart the music software on your PC and play music files.
If you think there is a problem

- **While the PC was running music software and the power of this product was ON, you connected your PC to this product, and you switched the product’s input to “USB DAC”**.
  
  Close the music software and then, try the following steps:
  1. After turning this product OFF, connect your PC to the product.
  2. Turn the product ON.
  3. Switch the product’s input source to “USB DAC”.
  4. Start the music software on your PC and play music files.

- **The audio output device of your computer and/or application are not configured correctly**.
  
  Check the settings of the audio output device of your computer and/or application. For more details, refer to the following.
  - “Playing music that is on your computer” (p.77)

- **An audio signal is being input that this product does not recognize**.
  
  Input an audio signal in a format and sampling rate that this product can play. For more details, refer to the following.
  - “Playable formats using USB DAC” (p.140)
Problems with network

Network functions cannot be used

- **Network information (IP address) was not acquired properly.**
  
  Enable the DHCP server function of the router. Set “DHCP” to “On” from the Setup menu of this product. For more details, refer to the following.
  
  - “Configuring a network” (p.96)
  
  If you configure the network information manually instead of using the DHCP server, make sure the IP address of this product is not the same as any other network devices.

- **It is connected to an IPv6 type of router.**

  Some network functions of this product are not supported in IPv6 networks. Connect to an IPv4 network.

Cannot connect to the Internet via a wireless LAN router (access point)

- **The power of the wireless LAN router is OFF.**
  
  Turn the wireless LAN router ON.

- **This product is too far from the wireless LAN router.**
  
  Move the wireless LAN router and/or this product closer to each other.

- **There is an obstacle between this product and the wireless LAN router.**
  
  Remove the obstacle between this product and the wireless LAN router.

- **The wireless LAN router (access point) is configured to use Channel 14.**
  
  Change the wireless LAN router (access point) settings so it uses one of the channels between 1 and 13.

- **The MAC address filter of the wireless LAN router (access point) is enabled.**
  
  Set the MAC address filter of the wireless LAN router (access point) to disabled.

Cannot find the wireless network

- **Electromagnetic waves from a microwave oven or other wireless devices are interfering with wireless communication.**
  
  Turn those devices OFF, or move them away from this product and the wireless LAN router. Also, if your wireless LAN router supports the 5 GHz frequency band, switch the connection to the 5 GHz band.

- **Access to the network is restricted by the firewall settings of the wireless LAN router.**
  
  Check the firewall settings of your wireless LAN router.

Cannot detect a media server (PC/NAS)

- **The share settings of the media server are not correct.**

  Change the share settings of the media server so this product can access the folders on the media server.

- **Access to the media server is restricted by security software settings, etc.**

  Check the security software settings of the media server and/or router.

- **This product is not connected to the same network as the media server.**

  Check the network connections and/or the router settings, and connect this product with the media server over the same network (router).
TROUBLESHOOTING > If you think there is a problem

Media server (PC/NAS) files will not display (or play)
- **This product or the media server are using unsupported file format(s).**
  - Use file formats that are supported by both this product and the media server. Refer to the following for the music file formats supported by this product.
    - “Supported file formats on this product (network)” (p.139)

Media server (PC/NAS) content cannot be played when its preset number is selected
- **The power is OFF.**
  - Make sure the power of the media server (PC/NAS) is ON.
- **Not connected to the network.**
  - Check the network connections and/or the router settings.
- **The registered content (files) was moved to a different folder.**
  - Register the content again.
- **Other music files were added to or deleted from the folder.**
  - It may not be possible to recall registered content. Register the content again.

Cannot play Internet radio
- **Not connected to the Internet.**
  - In order to use Internet radio, this product must be connected to the Internet. Check and make sure the network information (IP address) was acquired properly. For more details, refer to the following.
    - “Configuring a network” (p.96)
- **The selected Internet radio station service is not currently available.**
  - It may not be possible to receive the radio station due to a network error on the radio station side, or the service may currently be stopped. Wait for a while and try playing it again, or select a different radio station.
- **The selected Internet radio station is broadcasting silence.**
  - Some radio stations broadcast silence at some times. In such a case, no sound plays even if the station is being received. Wait for a while and try playing it again, or select a different radio station.
- **Access to the network is restricted by the firewall settings of the router or network devices.**
  - Check the firewall settings. Note that Internet radio can only be played via the port specified by each radio station. The port number differs depending on the radio station.

When using AirPlay, this product is not detected by the iPhone
- **You are using a router that supports multi SSID.**
  - The network isolating function of your wireless LAN router (access point) may be preventing access to this product. When connecting your iPhone, use an SSID that allows access to this product (try connecting to the primary SSID).

Music doesn’t play via AirPlay
- **You are trying to listen to music that cannot be played on your iPhone.**
  - Make sure the files are playable. If you cannot play it even on your iPhone itself, the music data and/or storage area may be damaged.
This product is not detected by the dedicated app on the mobile device

- **This product is not connected to the same network as the mobile device.**
  Check the network settings and/or the router settings and connect to the same network.

- **You are using a router that supports multi SSID.**
  The network isolating function of your wireless LAN router (access point) may be preventing access to this product. When connecting your mobile device, use an SSID that allows access to this product (try connecting to the primary SSID).

Unable to update the firmware via the network

- **Your network connection is poor.**
  Wait a while and try again.
Problems with Bluetooth

Cannot connect with a Bluetooth device

● The wireless antenna of this product is not up.
   Stand the wireless antenna upright.

● The Bluetooth function of this product is disabled.
   Enable the Bluetooth function with “Bluetooth” on the Setup menu. For more details, refer to the following.
   • “Configuring Bluetooth” (p.101)

● The Bluetooth function of the Bluetooth device is OFF.
   Turn ON the Bluetooth function of the Bluetooth device.

● This product is connected to a different Bluetooth device.
   Terminate the current Bluetooth connection and connect to the desired Bluetooth device. For more details, refer to the following.
   • “Playing via a Bluetooth® connection” (p.69)

● This product and the Bluetooth device are too far apart.
   Move this product and the Bluetooth device closer together.

● Interference from device(s) (microwave oven, wireless LAN, etc.) using the 2.4 GHz frequency band is impeding wireless communications.
   Move this product and/or the Bluetooth device away from those devices. Also, if your wireless LAN router supports the 5 GHz frequency band, switch the connection to the 5 GHz band.

● The Bluetooth device you are using does not support the A2DP and/or AVRCP profiles.
   Use a Bluetooth device that supports the A2DP and/or AVRCP profiles.

● The connection information registered to the Bluetooth device is not functioning properly for some reason.
   Delete the connection information of the Bluetooth device and then reconnect this product to the Bluetooth device. For more details, refer to the following.
   • “Playing via a Bluetooth® connection” (p.69)

When connected via Bluetooth®, there is no sound, or the sound is intermittently disrupted

● The volume of the Bluetooth device is too low.
   Turn up the volume of the Bluetooth device.

● The output-switching of the Bluetooth device is not set to this product.
   Set the output-switching of the Bluetooth device to this product.

● The Bluetooth connection was cut off.
   Reconnect the Bluetooth. For more details, refer to the following.
   • “Playing via a Bluetooth® connection” (p.69)

● They are too far apart.
   Move the Bluetooth device closer to this product.
When an error is shown on the front display, check it in the following table.

| Update Failed            | Error in updating the firmware.                       | Update the firmware again.                                                                |
APPENDIX

Product care

Taking care of this product

Check the following before cleaning the product.

- Do not use chemicals such as benzene, thinner, or rubbing alcohol on the product. To avoid scratching the surface, wipe it dry with a soft cloth.
Making wireless network connections

Selecting the wireless method of connecting to the network

Select the connection method suiting your network environment.

1. Press the SETUP key.
2. Select “Network” with the cursor keys (▲/▼) and then press the ENTER key.
3. Then select “Connection” and “Wireless (Wi-Fi)” in that order and press the ENTER key.

Select the method of setting up a wireless connection from the following.
- “Using the WPS button to make a wireless connection” (p.135)
- “Making a wireless connection with your iPhone (WAC)” (p.136)
- “Making a wireless connection manually” (p.137)

NOTE
Network settings can also be made when registering this product to the MusicCast Network. We recommend this method when using MusicCast.

Related links
“Registering with the MusicCast network” (p.43)
Using the WPS button to make a wireless connection

Pressing the WPS button on your wireless LAN router is a simple way to configure a wireless connection.

Setup menu
“Network” > “Connection” > “Wireless (Wi-Fi)”

1 Select “WPS” with the cursor keys (▲/▼).

2 Follow instructions on the front display to make the wireless connection.

During the process, pressing the WPS button on your wireless LAN router is needed.

Once the connection is established, “Completed” is displayed and the Wireless LAN indicator on the front panel lights up.

If “Not connected.” is displayed, either repeat the process from step 1 or try a different connection method.

This completes the wireless connection process.

NOTE
This product cannot connect to a wireless LAN router (access point) using the WEP encryption method. In such case, try a different connection method.

What is WPS?
WPS (Wi-Fi Protected Setup) is a standard developed by the Wi-Fi Alliance. WPS make it easy to set up a wireless network.

Related links
“Selecting the wireless method of connecting to the network” (p.134)
Making a wireless connection with your iPhone (WAC)

Apply the network settings of your iPhone (iOS device) to this product to set up a wireless connection. Before starting setup, check and make sure your iPhone is connected to the wireless LAN router (access point).

Setup menu
“Network” > “Connection” > “Wireless (Wi-Fi)”

1. Select “Share Wi-Fi (iOS)” with the cursor keys (▲/▼).

2. While the Wi-Fi indicator is flashing, enter the Wi-Fi Settings screen of your iOS device, and set this product to the AirPlay speaker.

3. Select the wireless network (access point) which is shared with this product.

After the sharing operation is complete, this product will connect automatically to the selected wireless network (access point).

And the Wireless LAN indicator on the front panel will light up.

This completes the wireless connection process.

NOTE
- The following settings are initialized.
  - Network settings
  - Bluetooth settings
  - Content registered to presets (songs from a media server, Internet radio stations, etc.)
  - Account information of the various music services
  - Repeat/shuffle settings
- This product cannot connect to a wireless LAN router (access point) using the WEP encryption method. In such case, try a different connection method.
- A warning message is displayed if a network cable is connected to this product. Unplug the network cable before operating the product.
- If an AirPlay password has been set up, cancel it temporarily and connect using WAC.

Related links
“Selecting the wireless method of connecting to the network” (p.134)
Making a wireless connection manually

Enter the required information and set up a wireless connection. You will have to configure the SSID (network name), encryption method and security key manually.

Setup menu
“Network” > “Connection” > “Wireless (Wi-Fi)”

1. Select “Manual Setting” with the cursor keys (▲/▼).

2. Enter the necessary information as indicated on the front display to make the wireless connection.

To enter text, use the cursor keys (◀/▶) to move the cursor, and then the cursor keys (▲/▼) to change the character. Press the MEMORY key to delete the character to the left of the cursor. Press the PRESET key to insert a new character one character before the character to the left of the cursor.

Once the connection is established, “Completed” is displayed and the Wireless LAN indicator on the front panel lights up.

If “Not connected.” is displayed, either repeat the process or try a different connection method.

This completes the wireless connection process.

Supported Bluetooth devices

Check the following for the Bluetooth devices that can connect to this product.

- Bluetooth devices that support A2DP and AVRCP profiles can be connected.
- Connection to all Bluetooth devices is not guaranteed.
Supported file formats on this product (network)

Of all the audio formats that may be received over the network, the following file formats can be played on this product.

<table>
<thead>
<tr>

</table>

* linear PCM format only. Files in 32-bit float cannot be played.

- The file formats that can be played vary with the server software installed on the media server (PC/NAS). For more details, refer to the user's manual of the server software.
- Files protected by DRM (Digital Rights Management) cannot be played.
Playable formats using USB DAC

The following are the signal formats and sampling frequencies that can be played the USB DAC function.

- **Compatible formats and sampling frequencies**
  - PCM 2-ch: 44.1 kHz/48 kHz/88.2 kHz/96 kHz/176.4 kHz/192 kHz/352.8 kHz/384 kHz (16-bit/24-bit/32-bit)
  - DSD 2-ch: 2.8 MHz (DSD64)/5.6 MHz (DSD128)/11.2 MHz (DSD256), compatible with ASIO Native and DoP

Concerning the file formats that can be played, check the formats supported by the applications used on your computer.
Trademarks

The trademarks used in this manual are as follows.

**Works with Apple AirPlay**

This Receiver is compatible with AirPlay 2. iOS 11.4 or later is required.

Use of the Works with Apple badge means that an accessory has been designed to work specifically with the technology identified in the badge and has been certified by the developer to meet Apple performance standards.

Specifications

The specifications of this unit are as follows.

Input jacks

**Analog Audio**
- Audio x 4 (including PHONO)

**Digital Audio**
- Optical x 2 (PCM only) (Supported frequencies: 32 kHz/44.1 kHz/48 kHz/88.2 kHz/96 kHz/176.4 kHz/192 kHz)
- Coaxial x 2 (PCM only) (Supported frequencies: 32 kHz/44.1 kHz/48 kHz/88.2 kHz/96 kHz/176.4 kHz/192 kHz)

**Other jacks**
- USB x 1 (USB Type B)
- NETWORK (Wired) x 1 (100Base-TX/10Base-T)

Output jacks

**Analog Audio**
- Speaker Out x 4 (A L/R, B L/R)
- Pre Out x 1 (L/R)
- Subwoofer Out x 1 (monaural)
- Headphone x 1

**Other jacks**
- YPAO MIC x 1
- TRIGGER OUT x 1

TUNER

**Analog Tuner**
- [Models for U.K., Europe and Russia]
  DAB/FM with Radio Data System x 1 (TUNER)
- [Model for Australia]
  DAB/FM x 1 (TUNER)
- [Models for other areas]
  FM/AM x 1 (TUNER)

USB DAC

**Audio Format**
- PCM 2-ch (44.1 kHz/48 kHz/88.2 kHz/96 kHz/176.4 kHz/192 kHz/352.8 kHz/384 kHz (16-bit/24-bit/32-bit))
- DSD 2-ch (2.8 MHz (DSD64)/5.6 MHz (DSD128)/11.2 MHz (DSD256), compatible with ASIO Native and DoP)
Bluetooth

Sink Function
- Source Device to this product (ex. Smartphone/Tablet)
- Supported profile
  - A2DP v1.3, AVRCP v1
- Supported codec
  - SBC, AAC

Source Function
- This product to Sink Device (ex. Bluetooth Headphone)
- Supported profile
  - A2DP v1.3
- Supported codec
  - SBC
- Capable of Play/Stop Operation from Sink Device

Bluetooth version
- Ver. 4.2

Wireless output
- Bluetooth Class 2

Network

media servers (PC/NAS)

AirPlay 2

Internet Radio

music streaming service

MusicCast
- Controlled by MusicCast Controller App.
- MusicCast Link function*
  * The following audio distribution is restricted.
  - PCM (352.8 kHz/384 kHz) and DSD
  - AirPlay

Wi-Fi function
- Capable of WPS by PIN Method and Push-Button-Method
- Available Security Method: WEP, WPA2-PSK (AES), Mixed Mode
- Wireless LAN Standards: IEEE 802.11 a/b/g/n/ac*
  * 20 MHz channel bandwidth only
- Radio Frequency: 2.4/5 GHz
### Audio Section

#### Rated Output Power (2-channel driven)
(20 Hz to 20 kHz, 0.07% THD)
- **8 Ω**
  - 100 W + 100 W

#### Dynamic power (IHF)
- **8 Ω**
  - 140 W + 140 W
- **6 Ω**
  - 170 W + 170 W
- **4 Ω**
  - 220 W + 220 W
- **2 Ω**
  - 290 W + 290 W

#### IEC Output Power (1kHz, 0.07% THD, 8 Ω)
- [Models for U.K. and Europe]
  - 115 W + 115 W

#### Maximum Effective Output Power (JEITA, 1 kHz, 10% THD)
- [Models for U.S.A., Canada, China, Korea, Australia, U.K., Europe, Russia and for Central and South America]
  - **8 Ω**
    - 145 W + 145 W

#### Power Bandwidth (2-channel driven, 0.06% THD, 40 W/8 Ω)
- 10 Hz to 50 kHz

#### Damping Factor (1 kHz, 8 Ω)
- 240 or more

#### Input Sensitivity / Input Impedance (1 kHz, 100 W/8 Ω)
- **PHONO (MM)**
  - 3.5 mVrms/47 kΩ
- **CD/LINE1/LINE2**
  - 200 mVrms/47 kΩ

#### Maximum Input Signal Voltage (1 kHz, 0.5% THD)
- **PHONO (MM)**
  - 50 mVrms
- **CD/LINE1/LINE2**
  - 2.8 Vrms

#### Rated Output Voltage / Output Impedance
- **PRE OUT**
  - 1.0 Vrms/1.2 kΩ
- **SUBWOOFER OUT (30 Hz)**
  - 4.3 Vrms/1.2 kΩ

#### Headphone Jack Rated Output Power (1 kHz, 8 Ω)
- 27 mW

#### Frequency Response
- **20 Hz to 20 kHz (CD etc.)**
  - 0±0.5 dB
- **10 Hz to 100 kHz (CD etc., Pure Direct ON)**
  - 0±1.0 dB

#### RIAA Equalization Deviation (Pure Direct ON)
- **PHONO**
  - ±0.5 dB

#### Total Harmonic Distortion Plus Noise (2-channel driven) (Pure Direct ON)
- **PHONO to PRE OUT (1.0 Vrms)**
  - 0.04%
- **CD/LINE1/LINE2 to SP OUT (50 W/8 Ω)**
  - 0.019%
APPENDIX > Specifications

Signal to Noise Ratio (IHF-A Network) (Pure Direct ON)
- PHONO (MM) 82 dB
- CD/LINE1/LINE2 100 dB

Residual Noise (IHF-A Network) (Pure Direct ON)
- SP OUT 70 μVrms

Channel Separation (JEITA, 1 kHz/10 kHz) (Pure Direct ON)
- CD/LINE1/LINE2 65 dB/50 dB or more

Tone Control Characteristics
- Bass Boost/Cut 20 Hz/±10 dB
- Bass Turnover Frequency 300 Hz
- Treble Boost/Cut 20 kHz/±10 dB
- Treble Turnover Frequency 3.0 kHz

Continuous Loudness Control (Attenuation 1 kHz) -30 dB

FM Section

Tuning Range
- [Models for U.S.A. and Canada] 87.5 MHz to 107.9 MHz
- [Models for Asia, Taiwan and for Central and South America] 87.5/87.50 MHz to 108.0/108.00 MHz
- [Models for other areas] 87.50 MHz to 108.00 MHz

50 dB Quiet Sensitivity (IHF, 1 kHz, 100% MOD.)
- Monaural 3 μV (20.8 dBf)

Signal to Noise Ratio (IHF)
- Monaural 69 dB
- Stereo 68 dB

Harmonic Distortion
- Monaural 0.5%
- Stereo 0.6%

Antenna Input 75 Ω unbalanced

AM Section (Models for U.S.A., Canada, China, Korea, Asia, Taiwan and for Central and South America)

Tuning Range
- [Models for U.S.A. and Canada] 530 kHz to 1710 kHz
- [Models for Asia, Taiwan and for Central and South America] 530/531 kHz to 1710/1611 kHz
- [Models for China and Korea] 531 kHz to 1611 kHz
APPENDIX - Specifications

### Antenna Input

| Loop Antenna |

### DAB Section (Models for U.K., Europe, Russia and Australia)

| Tuning Range | 174.928 MHz to 239.200 MHz (Band III) |
| Support Audio Format | MPEG 1 Layer II/MPEG-4 HE-AAC v2 (aacPlus v2) |

| Antenna Input | 75 Ω unbalanced |

### General

#### Power Supply

- [Models for U.S.A. and Canada] AC 120 V, 60 Hz
- [Models for Taiwan and for Central and South America] AC 110 V, 60 Hz
- [Model for China] AC 220 V, 50 Hz
- [Model for Korea] AC 220 V, 60 Hz
- [Model for Australia] AC 230 to 240 V, 50 Hz
- [Models for U.K., Europe and Russia] AC 230 V, 50 Hz
- [Model for Asia] AC 220 to 240 V, 50/60 Hz

#### Power Consumption

| 250 W |

- *This product in Standby may download the new firmware via the network. In this case, the standby power consumption is increased than the shown value.*

| 450 W |

- [Models for Taiwan and for Central and South America] 450 W

### Dimensions (W x H x D)

| 435 x 151 x 395 mm |
| (17-1/8" x 6" x 15-1/2") |
APPENDIX > Specifications

Reference Dimensions (with wireless antenna upright)
* Including legs and protrusions

435 x 232 x 395 mm
(17-1/8” x 9-1/8” x 15-1/2”)

Weight

11.4 kg (25.2 lb)

* The contents of this manual apply to the latest specifications as of the publishing date. To obtain the latest manual, access the Yamaha website then download the manual file.
