Mode D'emploi  
Manual de instrucciones**

# SPECIAL MESSAGE SECTION

This product utilizes batteries or an external power supply (adapter). DO NOT connect this product to any power supply or adapter other than one described in the manual, on the name plate, or specifically recommended by Yamaha.

This product should be used only with the components supplied or; a cart, rack, or stand that is recommended by Yamaha. If a cart, etc., is used, please observe all safety markings and instructions that accompany the accessory product.

## **SPECIFICATIONS SUBJECT TO CHANGE:**

The information contained in this manual is believed to be correct at the time of printing. However, Yamaha reserves the right to change or modify any of the specifications without notice or obligation to update existing units.

This product, either alone or in combination with an amplifier and headphones or speaker/s, may be capable of producing sound levels that could cause permanent hearing loss. DO NOT operate for long periods of time at a high volume level or at a level that is uncomfortable. If you experience any hearing loss or ringing in the ears, you should consult an audiologist.

**IMPORTANT:** The louder the sound, the shorter the time period before damage occurs.

## **NOTICE:**

Service charges incurred due to a lack of knowledge relating to how a function or effect works (when the unit is operating as designed) are not covered by the manufacturer's warranty, and are therefore the owners responsibility. Please study this manual carefully and consult your dealer before requesting service.

## **ENVIRONMENTAL ISSUES:**

Yamaha strives to produce products that are both user safe and environmentally friendly. We sincerely believe that our products and the production methods used to produce them, meet these goals. In keeping with both the letter and the spirit of the law, we want you to be aware of the following:

### **Battery Notice:**

This product MAY contain a small non-rechargeable battery which (if applicable) is soldered in place. The average life span of this type of battery is approximately five years. When replacement becomes necessary, contact a qualified service representative to perform the replacement.

This product may also use "household" type batteries. Some of these may be rechargeable. Make sure that the battery being charged is a rechargeable type and that the charger is intended for the battery being charged.

When installing batteries, do not mix batteries with new, or with batteries of a different type. Batteries MUST be installed correctly. Mismatches or incorrect installation may result in overheating and battery case rupture.

### **Warning:**

Do not attempt to disassemble, or incinerate any battery. Keep all batteries away from children. Dispose of used batteries promptly and as regulated by the laws in your area. Note: Check with any retailer of household type batteries in your area for battery disposal information.

### **Disposal Notice:**

Should this product become damaged beyond repair, or for some reason its useful life is considered to be at an end, please observe all local, state, and federal regulations that relate to the disposal of products that contain lead, batteries, plastics, etc. If your dealer is unable to assist you, please contact Yamaha directly.

## **NAME PLATE LOCATION:**

The name plate is located on the bottom of the product. The model number, serial number, power requirements, etc., are located on this plate. You should record the model number, serial number, and the date of purchase in the spaces provided below and retain this manual as a permanent record of your purchase.

# PLEASE KEEP THIS MANUAL

## FCC INFORMATION (U.S.A.)

### 1. IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!

This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.

**2. IMPORTANT:** When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product **MUST** be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.

**3. NOTE:** This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15 for Class "B" digital devices. Compliance with these requirements provides a reasonable level of assurance that your use of this product in a residential environment will not result in harmful interference with other electronic devices. This equipment generates/uses radio frequencies and, if not installed and used according to the instructions found in the users manual, may cause interference harmful to the operation of other electronic devices. Compliance

with FCC regulations does not guarantee that interference will not occur in all installations. If this product is found to be the source of interference, which can be determined by turning the unit "OFF" and "ON", please try to eliminate the problem by using one of the following measures:

Relocate either this product or the device that is being affected by the interference.

Utilize power outlets that are on different branch (circuit breaker or fuse) circuits or install AC line filter/s.

In the case of radio or TV interference, relocate/reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to co-axial type cable.

If these corrective measures do not produce satisfactory results, please contact the local retailer authorized to distribute this type of product. If you can not locate the appropriate retailer, please contact Yamaha Corporation of America, Electronic Service Division, 6600 Orangethorpe Ave, Buena Park, CA90620

The above statements apply **ONLY** to those products distributed by Yamaha Corporation of America or its subsidiaries.

\* This applies only to products distributed by YAMAHA CORPORATION OF AMERICA.

(class B)

### OBSERVERA!

Apparaten kopplas inte ur växelströmskällan (nätet) så länge som den är ansluten till vägguttaget, även om själva apparaten har stängts av.

**ADVARSEL:** Netspændingen til dette apparat er IKKE afbrudt, så længe netledningen sidder i en stikkontakt, som er tændt — også selvom der er slukket på apparatets afbryder.

**VAROITUS:** Laitteen toisiopiiriin kytketty käyttökytkin ei irroita koko laitetta verkosta.

(standby)

### Entsorgung leerer Batterien (nur innerhalb Deutschlands)

Leisten Sie einen Beitrag zum Umweltschutz. Verbrauchte Batterien oder Akkumulatoren dürfen nicht in den Hausmüll. Sie können bei einer Sammelstelle für Altbatterien bzw. Sondermüll abgegeben werden. Informieren Sie sich bei Ihrer Kommune.

(battery)

# PRECAUTIONS

## PLEASE READ CAREFULLY BEFORE PROCEEDING

\* Please keep this manual in a safe place for future reference.

### WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

#### Power supply/AC power adaptor

- Only use the voltage specified as correct for the instrument. The required voltage is printed on the name plate of the instrument.
- Use the specified adaptor (PA-3C or PA-3B or an equivalent recommended by Yamaha) only. Using the wrong adaptor can result in damage to the instrument or overheating.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- Do not place the AC adaptor cord near heat sources such as heaters or radiators, and do not excessively bend or otherwise damage the cord, place heavy objects on it, or place it in a position where anyone could walk on, trip over, or roll anything over it.

#### Do not open

- Do not open the instrument or attempt to disassemble the internal parts or modify them in any way. The instrument contains no user-serviceable parts. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

#### Water warning

- Do not expose the instrument to rain, use it near water or in damp or wet conditions, or place containers on it containing liquids which might spill into any openings.
- Never insert or remove an electric plug with wet hands.

#### Fire warning

- Do not put burning items, such as candles, on the unit. A burning item may fall over and cause a fire.

#### If you notice any abnormality

- If the AC adaptor cord or plug becomes frayed or damaged, or if there is a sudden loss of sound during use of the instrument, or if any unusual smells or smoke should appear to be caused by it, immediately turn off the power switch, disconnect the adaptor plug from the outlet, and have the instrument inspected by qualified Yamaha service personnel.

### CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the instrument or other property. These precautions include, but are not limited to, the following:

#### Power supply/AC power adaptor

- When removing the electric plug from the instrument or an outlet, always hold the plug itself and not the cord.
- Unplug the AC power adaptor when not using the instrument, or during electrical storms.
- Do not connect the instrument to an electrical outlet using a multiple-connector. Doing so can result in lower sound quality, or possibly cause overheating in the outlet.

#### Battery

- Always make sure all batteries are inserted in conformity with the +/- polarity markings. Failure to do so might result in overheating, fire, or battery fluid leakage.
- Always replace all batteries at the same time. Do not use new batteries together with old ones. Also, do not mix battery types, such as alkaline batteries with manganese batteries, or batteries from different makers, or different types of batteries from the same maker, since this can cause overheating, fire, or battery fluid leakage.
- Do not dispose of batteries in fire.

- Do not attempt to recharge batteries that are not intended to be charged.
- When the batteries run out, or if the instrument is not to be used for a long time, remove the batteries from the instrument to prevent possible leakage of the battery fluid.
- Keep batteries away from children.
- If the batteries do leak, avoid contact with the leaked fluid. If the battery fluid should come in contact with your eyes, mouth, or skin, wash immediately with water and consult a doctor. Battery fluid is corrosive and may possibly cause loss of sight or chemical burns.

#### Location

- Do not expose the instrument to excessive dust or vibrations, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day) to prevent the possibility of panel disfiguration or damage to the internal components.
- Do not use the instrument in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the instrument, TV, or radio may generate noise.

## Connexions

- Avant de raccorder l'instrument à d'autres éléments électroniques, mettre ces derniers hors tension. Et avant de mettre sous/hors tension tous les éléments, toujours ramener le volume au minimum. En outre, veillez à régler le volume de tous les composants au minimum et à augmenter progressivement le volume sonore des instruments pour définir le niveau d'écoute désiré.

## Entretien

- Utiliser un linge doux et sec pour le nettoyage de l'instrument. Ne jamais utiliser de diluants de peinture, dissolvants, produits de nettoyage, ou tampons nettoyeurs à imprégnations chimiques.

## Précautions d'utilisation

- Ne pas glisser vos doigts ou votre main dans les fentes de l'instrument.
- N'insérez jamais d'objets en papier, métalliques ou autres dans les fentes du panneau ou du clavier. Si c'est le cas, mettez immédiatement l'appareil hors tension et débranchez le cordon d'alimentation de la prise secteur. Faites ensuite contrôler l'appareil par un membre qualifié du service Yamaha.
- Ne pas déposer d'objets de plastique, de vinyle, ou de caoutchouc sur l'instrument, ce qui risque de décolorer le panneau ou le clavier.
- Ne pas s'appuyer sur l'instrument, ni y déposer des objets pesants. Ne pas manipuler trop brutalement les boutons, commutateurs et connecteurs.
- Ne pas jouer trop longtemps sur l'instrument à des volumes trop élevés, ce qui risque d'endommager durablement l'ouïe. Si l'on constate une baisse de l'acuité auditive ou des sifflements d'oreille, consulter un médecin sans tarder.

## Sauvegarde des données

### Sauvegarde des données

Les données sauvegardées peuvent être perdues à la suite d'une défectuosité ou d'une opération incorrecte. Sauvegardez toutes les données importantes sur un support externe tel que l'archiveur de données MIDI Yamaha MDF3.

Yamaha n'est pas responsable des détériorations causées par une utilisation impropre de l'instrument, ou par des modifications apportées par l'utilisateur, pas plus qu'il ne peut couvrir les données perdues ou détruites.

Toujours laisser l'appareil hors tension lorsqu'il est inutilisé.

Lors de l'utilisation de l'adaptateur secteur, même lorsque le commutateur est en position « STANDBY », une faible dose d'électricité circule toujours dans l'instrument. Lorsque vous n'utilisez pas l'instrument pendant une longue période, veillez à débrancher l'adaptateur secteur de la prise murale.

Veillez à éliminer les piles usées selon les règlements locaux.

Les illustrations et écrans LCD de ce mode d'emploi sont fournis à titre d'information uniquement et peuvent être différents de ceux apparaissant sur votre instrument.

*Congratulations on your purchase of the Yamaha PSR-292 PortaTone!*

*You now own a portable keyboard that combines advanced functions, great sound and exceptional ease-of-use in a highly compact package. Its outstanding features also make it a remarkably expressive and versatile instrument.*

*Read this Owner's Manual carefully while playing your new PSR-292 in order to take full advantage of its various features.*

---

## Main Features

---

The PSR-292 is a sophisticated yet easy-to-use keyboard with the following features and functions:

■ **Stereo Sampled Piano** ..... **page 20**

The PSR-292 has a special Portable Grand Piano Voice — created by state-of-the-art stereo sampling technology and using Yamaha's sophisticated AWM (Advanced Wave memory) tone generation system.

■ **Touch Response** ..... **page 30**

The exceptionally natural Touch Response feature, with a convenient front panel on/off switch, gives you maximum expressive level control over the voices. It also works in conjunction with the Dynamic Filter, which dynamically adjusts the timbre or tone of a voice according to your playing strength — just a like a real musical instrument!

■ **Yamaha Education Suite** ..... **pages 43, 45, 61**

The PSR-292 features the new Yamaha Education Suite — a set of learning tools that utilize the latest technology to make studying and practicing music more fun and fulfilling than ever before!

■ **One Touch Setting** ..... **page 28**

The One Touch Setting feature lets you automatically call up an appropriate voice for playing with the selected style. Each style has memory space for two One Touch Settings, and you can change them to your own desired voice setting — letting you save your custom panel settings for instant recall.

■ **Powerful Speaker System**

The built-in stereo amplifier/speaker system of the PSR-292 — with a special Bass Boost feature — provides exceptionally powerful, high-quality sound, letting you hear the full dynamic range of the PSR-292's authentic voices.

■ **Music Database** ..... **page 48**

The PSR-292 has an advanced, easy-to-use Music Database feature that automatically selects the style, voice, and effect settings for playing in a specific type of music. This can be a big help if you know what genre of music you want to play, but you don't know what settings to make. Just select the genre, and the PSR-292 takes care of the rest!

■ **GM System Level 1**

"GM System Level 1" is an addition to the MIDI standard which ensures that any GM-compatible music data can be accurately played by any GM-compatible tone generator, regardless of manufacturer. The GM mark is affixed to all software and hardware products that support GM System Level.

■ **XGlite**

As its name implies, "XGlite" is a simplified version of Yamaha's high-quality XG tone generation format. Naturally, you can play back any XG song data using an XGlite tone generator. However, keep in mind that some songs may play back differently compared to the original data, due to the reduced set of control parameters and effects.

# Panel Controls and Terminals

## ■ Front Panel

### 1 Power switch ([STANDBY/ON])

2 [MASTER VOLUME] dial  
This determines the overall volume of the PSR-292.

### 3 [TOUCH] button

This turns the Touch function on and off. (See page 30.)

### 4 [HARMONY] button

This turns the Harmony effect on and off. (See page 31.)

### 5 [DUAL] button

This turns the Dual voice on or off. (See page 26.)

### 6 [SPLIT] button

This turns the Split voice on and off. (See page 27.)

### 7 [DICTIONARY] button

This calls up the Dictionary function (page 45).

### 8 [DJ] button

This instantly calls up a special DJ voice and style.

### 9 [PC] Button

This exceptionally convenient control lets you store and instantly call up the specified MIDI settings for optimum use with a connected computer or other MIDI device. (See page 73.)

### 10 LESSON [L] (Left) and [R] (Right) buttons

These call up the Lesson exercises for the corresponding hand (left or right) for the selected song. (See page 62.)

### 11 [METRONOME] button

This turns the metronome on and off. (See page 20.)

### 12 [PORTABLE GRAND] button

This instantly calls up the Grand Piano voice. (See page 12.)

### 13 [DEMO] button

This is used to play the Demo song. (See page 14.)

### 14 [FUNCTION] Button

This calls up the Function mode and stores the specified panel setting to the flash memory (see pages 74, 78).

### 15 [SONG] button

This is for enabling song selection. (See page 51.)

### 16 [STYLE] button

This is for enabling style selection. (See page 35.)

### 17 [VOICE] button

This is for enabling voice selection. (See page 23.) Holding down this button calls up the Melody Voice Change function. (See page 55.)

### 18 [M.D.B.] (MUSIC DATABASE) button

This calls up the optimum panel settings for selected music genre. (See page 48.)

### 19 Dial, CATEGORY [▲]/[▼] buttons, SELECT [▲]/[▼] buttons

This dial is used to select the number of the desired song, voice, style or M.D.B.. (See page 24.) This also used to set the Tempo and Function value. The CATEGORY [▲]/[▼] buttons are used to select

the category of songs, voices, styles, M.D.B. or Functions. Pressing the buttons steps through the various categories.

The SELECT [▲]/[▼] buttons are used to decrease or increase the number of the desired song, voice, style, M.D.B., or specific Function, as well as to adjust certain settings.

## 20 Numeric keypad, [+ / YES] and [- / NO] buttons

These are used for selecting songs, voices, and styles. (See pages 24.) They are also used for adjusting certain settings and answering certain display prompts.

## 21 [ACMP] / [A-B REPEAT] button

When the Style mode is selected, this turns the auto accompaniment on and off. (See page 36.) In the Song mode, this calls up the A-B Repeat function. (See page 54.)

## 22 [SYNC STOP] button

This turns the Sync Stop function on and off. (See page 40.)

## 23 [SYNC START] / [PAUSE] button

This turns the Sync Start function on and off. (See page 37.) In the Song mode, it is used to temporarily pause song playback. (See page 53.)

## 24 [INTRO ENDING] / [REW ◀◀] button

When the Style mode is selected, this is used to control the Intro and Ending functions. (See page 36.) When the Song mode is selected, this is used as a

“rewind” control, or move the song playback point back toward the beginning.

## 25 [MAIN/AUTO FILL] / [FF ▶▶] button

When the Style mode is selected, these are used to change auto accompaniment sections and control the Auto Fill function. (See page 42.) When the Song mode is selected, this is used as a “fast forward” control, or move the song playback point toward the end.

## 26 [START/STOP] button

When the Style mode is selected, this alternately starts and stops the style. (See page 36.) In the Song mode, this alternately starts and stops song playback. (See page 54.)

## 27 [TEMPO/TAP] button

This button is used to call up the Tempo setting, letting you set the Tempo with the dial, numeric keypad or [+]/[-] buttons. (See page 20.) It also allows you to tap out the tempo and automatically start a selected song or style at that tapped speed. (See page 37.)

## 28 ONE TOUCH SETTING buttons

These buttons ([MEMORY], [1], [2]) are used to select the One Touch Setting registrations. (See page 28.)

## 29 SONG MEMORY buttons

These buttons ([REC], [1] - [5], [A]) are used for song recording, letting you record up to six different tracks of a song (including a special Chord track). (See page 57.)

## ■ Rear Panel

## 30 MIDI IN, OUT terminals

These are for connection to other MIDI instruments and devices. (See page 67.)

## 31 SUSTAIN jack

This is for connection to an optional FC4 or FC5 Footswitch for control over sustain, just like the damper pedal on a piano. (See page 11.)

## 32 PHONES/OUTPUT jack

This is for connection to a set of stereo headphones or to an external amplifier/speaker system. (See page 11.)

## 33 DC IN 12V jack

This is for connection to a PA-3C or PA-3B AC power adaptor. (See page 10.)

# Setting Up

This section contains information about setting up your PSR-292 for playing. Make sure to read this section carefully before using the instrument.

## Power Requirements

Although the PSR-292 will run either from an optional AC adaptor or batteries, Yamaha recommends use of an AC adaptor whenever possible. An AC adaptor is more environmentally friendly than batteries and does not deplete resources.

### **CAUTION**

- Never interrupt the power supply (e.g. remove the batteries or unplug the AC adaptor) during any PSR-292 record operation! Doing so can result in a loss of data.
- Never attempt to turn the power off when a "WRITING!" message is shown in the display. Doing so can damage the internal flash memory and result in loss of data.

### ■ Using an AC Power Adaptor

- ① Make sure that the [STANDBY/ON] switch of the PSR-292 is set to STANDBY.
- ② Connect the AC adaptor (PA-3C, PA-3B, or other adaptor specifically recommended by Yamaha) to the power supply jack.
- ③ Plug the AC adaptor into an AC outlet.

### **WARNING**

- Use ONLY a Yamaha PA-3C or PA-3B AC Power Adaptor (or other adaptor specifically recommended by Yamaha) to power your instrument from the AC mains. The use of other adaptors may result in irreparable damage to both the adaptor and the PSR-292.
- Unplug the AC Power Adaptor when not using the PSR-292, or during electrical storms.

### ■ Using Batteries

For battery operation the PSR-292 requires six 1.5V "D" size, R20P (LR20) or equivalent batteries. (Alkaline batteries are recommended.) When the batteries need to be replaced, the volume may be reduced, the sound may be distorted, and other problems may occur. When this happens, turn the power off and replace the batteries, as described below

- ① Open the battery compartment cover located on the instrument's bottom panel.
- ② Insert the six new batteries, being careful to follow the polarity markings on the inside of the compartment.
- ③ Replace the compartment cover, making sure that it locks firmly in place.

### **CAUTION**

- When the batteries run down, replace them with a complete set of six new batteries. NEVER mix old and new batteries.
- Do not use different kinds of batteries (e.g. alkaline and manganese) at the same time.
- If the instrument is not to be in use for a long time, remove the batteries from it, in order to prevent possible fluid leakage from the battery.

## Turning On the Power

With the AC power adaptor connected or with batteries installed, simply press the power switch until it locks in the ON position. When the instrument is not in use, be sure to turn the power off. (Press the switch again so that it pops up.)

■ STANDBY  
■ ON

### CAUTION

- Even when the switch is in the "STANDBY" position, electricity is still flowing to the instrument at the minimum level. When you are not using the PSR-292 for a long time, make sure you unplug the AC power adaptor from the wall AC outlet, and/or remove the batteries from the instrument.
- Never attempt to turn the power off when a "WRITING!" message is shown in the display. Doing so can damage the internal flash memory and result in loss of data.

## Accessory Jacks

### Using Headphones

For private practicing and playing without disturbing others, connect a set of stereo headphones to the rear panel PHONES/OUTPUT jack. Sound from the built-in speaker system is automatically cut off when you insert a headphone plug into this jack.

### Connecting a Keyboard Amplifier or Stereo System

Though the PSR-292 is equipped with a built-in speaker system, you can also play it through an external amplifier/speaker system. First, make sure the PSR-292 and any external devices are turned off, then connect one end of a stereo audio cable to the LINE IN or AUX IN jack(s) of the other device and the other end to the rear panel PHONES/OUTPUT jack on the PSR-292.

### CAUTION

- To prevent damage to the speakers, set the volume of the external devices at the minimum setting before connecting them. Failure to observe these cautions may result in electric shock or equipment damage. Also, be sure to set the volumes of all devices at their minimum levels and gradually raise the volume controls while playing the instrument to set the desired listening level.

### Using a Footswitch

This feature lets you use an optional footswitch (Yamaha FC4 or FC5) to sustain the sound of the voices. The footswitch functions the same way as a damper pedal on an acoustic piano — press and hold down the footswitch as you play the keyboard to sustain the sound.

### NOTE

- Make sure that the footswitch plug is properly connected to the SUSTAIN jack before turning on the power.
- Do not press the footswitch while turning the power on. Doing this changes the recognized polarity of the footswitch, resulting in reversed footswitch operation.

### Using the MIDI Terminals

The PSR-292 also features MIDI terminals, allowing you to interface the PSR-292 with other MIDI instruments and devices. (For more information, see page 67.)

### Playing the Piano

Simply by pressing the [PORTABLE GRAND] button, you can automatically select the Grand Piano voice.

- 1 Press the [PORTABLE GRAND] button.

- 2 Play the keyboard.

Want to find out more? See page 20.

### Playing along with the Metronome

- 1 Press the [METRONOME] button.

Want to find out more? See page 20.

## Selecting and Playing Other Voices

The PSR-292 has a huge total of 605 dynamic and realistic instrument voices. Let's try a few of them out now...

### 1 Press the [VOICE] button.

### 2 Select a voice.

NOTE

- You can also select the appropriate category by using the [▲]/[▼] buttons.

### 3 Play the keyboard.

Want to find out more? See page 23.

## Playing with the DJ Feature

The exciting new DJ feature gives you a full variety of dance and DJ sounds — letting you create your own real-time mixes and groove along with various contemporary rhythms.

### 1 Press the [DJ] button.

### 2 Play the DJ style.

The DJ starts as soon as you play keys in the accompaniment area of the keyboard.

### 3 Play the DJ voices.

### 4 Stop the DJ style.

Want to find out more? See page 22.

### Playing the Songs

The PSR-292 is packed with a total of 100 songs, including one Demo song — which has been specially created to showcase the rich and dynamic sounds of the instrument. There are also 99 additional songs, designed to be used with the educational Lesson feature.

You can also play songs loaded to the PSR via MIDI. The songs can be stored to song numbers 101-199. (See page 71.)

#### Playing the Demo song

Let's play the Demo song now, Repeating with #001.

##### 1 Start the Demo song.

You can also play back songs of other categories. Simply select the appropriate number of the desired song during playback.

##### 2 Stop the Demo song.

#### NOTE

- The PSR-292 also has a Demo and DJ Cancel function that allows you to disable Demo song and DJ function. Set Demo and DJ Cancel in the Function mode (page 76).

#### Playing a single song

Naturally, you can also individually select and play back the PSR-292's songs (001 - 205).

##### 1 Press the [SONG] button.

##### 2 Select a song.

#### NOTE

- You can also select the appropriate category by using the [▲]/[▼] buttons.

##### 3 Start (and stop) the song.

Want to find out more? See page 51.

## Recording Your Own Song

Much like a multi-track tape recorder, the PSR-292 lets you play and record the individual parts of your own song in real time.

### 1 Select the desired User song (201 - 205) for recording.

#### NOTE

- You can also select the appropriate category by using the [▲]/[▼] buttons.

### 2 Simultaneously hold down the [REC] button and press the desired track number button ([1] - [5]).

### 3 Start recording by playing a melody on the keyboard.

The PSR-292 starts recording as soon as you play the first note on the keyboard.

### 4 To stop recording, press the [START/STOP] button.

Want to find out more? See page 56.

## Song List

No.	Song Name	No.	Song Name	No.	Song Name	No.	Song Name
<b>Demo</b>							
001	Just The Way You Are	023	Progrès	051	Muss I Denn	077	Close Your Hands, Open Your Hands

		050	Jingle Bells				

## Music Database

Here's a convenient feature that lets you instantly reconfigure the PSR-292 for playing in different music styles. If you want to perform in a certain genre but don't know what settings to make, simply select the genre from the Music Database — and the PSR-292 makes all the right settings for you!

Left hand + Right hand

**Auto accompaniment**  
(for example,  
bass + guitar + drums)

**Melody**

**NOTE**

- For more information on playing proper chords for the auto accompaniment, see "Using Auto Accompaniment — Multi Fingering" on page 43 and "Looking up Chords in the Dictionary" on the next page.

**1** Press the [M.D.B.] (MUSIC DATABASE) button.

**2** Select a Music Database.

Refer to the Music Database List on page 91.

**NOTE**

- You can also select the appropriate category by using the [▲]/[▼] buttons.

## Looking up Chords in the Dictionary

The convenient Dictionary function teaches you how to play chords by showing you the individual notes. In the example below, we'll learn how to play a GM7 chord...

### Learning how to play a specific chord

1 Press the [DICTIONARY] button.

2 Specify the root note of the chord (in this case, G).

3 Specify the chord type of the chord (in this case, M7).

4 Play the notes of the chord as indicated in the keyboard diagram in the display. The chord name flashes when the chord is played properly.

5 To leave the Dictionary function, press the [DICTIONARY] button again

Want to find out more? See page 45.

3 Play a chord with your left hand.

The style starts as soon as you play the keyboard, letting you play the melody along with accompaniment. For more on chords, see "Looking up Chords in the Dictionary" above.

4 Stop the style.

Want to find out more? See page 48.

# Indications de l'écran

Le PSR-292 est doté d'un grand écran multifonctions qui affiche tous les réglages importants de l'instrument. La section qui suit décrit brièvement les différents icônes et autres indications apparaissant sur cet écran.

## 1 Notation / 2 Clavier

Ces deux parties de l'écran sont très pratiques pour l'indication de notes. Lorsqu'un morceau est reproduit, elles montrent la mélodie et les notes successives de l'accord. Lorsque vous jouez au clavier, l'écran affiche les notes que vous êtes en train d'interpréter.

### NOTE

- Il est possible que certaines notes n'apparaissent pas dans la section notation de l'écran mais cela ne concerne qu'un nombre limité d'accords spécifiques. C'est dû à une limitation de l'espace disponible sur l'écran.

## 3 Indications des temps

Ces indications (une grande et trois petites) clignotent en séquence et en mesure avec le morceau ou le style. La grande flèche indique le premier temps de la mesure.

## 4 Nom et numéro du morceau, de la voix, du style ou de la base de données musicale

Cette partie de l'écran affiche le nom et le numéro du morceau, de la voix, du style ou de la base de données musicale qui est actuellement sélectionné. Elle affiche également le nom de la catégorie lorsque vous utilisez la touche Category, ou le nom et le réglage/la valeur actuel(le) d'autres fonctions, en plus d'autres messages importants liés aux opérations.

## 5 Indicateur Touch

Cet indicateur apparaît à l'écran lorsque la fonction Touch est activée. (Voir page 30.)

## 6 Indicateur Harmony

Cet indicateur apparaît à l'écran lorsque l'effet Harmony est activé. (Voir page 31.)

## 7 Indicateur Dual

Cet indicateur apparaît à l'écran lorsque la fonction Dual est activée. (Voir page 26.)

## 8 Indicateur Split

Cet indicateur apparaît à l'écran lorsque la fonction Split est activée. (Voir page 27.)

## 9 Indicateur Accompagnement On

Cet indicateur apparaît à l'écran lorsque l'accompagnement automatique est activé. (Voir page 36.)

### ⑩ Indicateur Sync Stop

Cet indicateur apparaît à l'écran lorsque la fonction Sync Stop est activée. (Voir page 40.)

### ⑪ Mesure et tempo

Ces valeurs indiquent la mesure appliquée pendant la reproduction d'un morceau ou d'un style et la valeur actuelle du tempo d'un morceau ou d'un style.

### ⑫ Accord

Cette valeur indique la note fondamentale de l'accord et son type lors de la reproduction d'un morceau (avec accords). Elle indique également les accords qui sont joués dans la section ACMP du clavier lorsque le mode Style et l'accompagnement automatique sont activés.

### ⑬ Indicateurs des pistes du morceau

Lors de l'enregistrement et de la reproduction de morceaux, ces indicateurs montrent l'état actuel des pistes. (Voir page 57.)

### ⑭ Indicateur d'octave

Lorsque les données de note dépassent les limites d'affichage des notes, l'indication « 8va » apparaît à l'écran.

### Pupitre à musique

Introduisez le bord inférieur du pupitre dans la rainure située sur la partie supérieure arrière du panneau de commandes du PSR-292.

# Portable Grand

This convenient function lets you instantly call up the Grand Piano voice.

## Playing the Portable Grand

Press the [PORTABLE GRAND] button.

PORTABLE GRAND

Doing this automatically selects the special “Stereo Sampled Piano” Grand Piano voice.

## Using the Metronome

### 1 Call up the Tempo setting.

Press the [TEMPO/TAP] button.

TEMPO / TAP

Current Tempo value

### 2 Change the value.

Use the dial or numeric keypad to set the desired Tempo value, or use the [+]/[-] buttons to increase or decrease the value.

or

NO

YES

### Restoring the Default Tempo Value

Each song and style has been given a default or standard Tempo setting. If you've changed the Tempo, you can instantly restore the default setting by pressing both [+]/[-] buttons simultaneously (when Tempo is selected).

You can also restore the default Tempo easily by simultaneously holding the [TEMPO/TAP] button and moving the dial.

### 3 Turn on the Metronome.

Press the [METRONOME] button.

METRONOME

Indicates the beat number in the measure.

To turn the Metronome off, press the [METRONOME] button again.

#### Setting the Metronome Time Signature

The time signature of the Metronome can be set to various quarter-note based meters.

*The Time Signature can be set in the Function mode (page 76).*

- The time signature changes automatically when a style or song is selected.

Numeric keypad	Time signature
01	1/4 — Plays only “1” beats (all high clicks)
02	2/4
03	3/4
04	4/4
:	:
15	15/4
0	Plays no “1” beats (all low clicks)

Indicates current beat number.

#### Adjusting the Metronome Volume

You can adjust the volume of the Metronome sound in the *Function mode (page 76)*. The volume range is 000 - 127.

This exciting feature lets you instantly call up a dynamic DJ voice and style for playing contemporary dance music.

## Playing the DJ

**1** Press the [DJ] button.

**NOTE**

• The PSR-292 has a Demo song and DJ Cancel function that allows you to disable Demo song and DJ function. Set Demo and DJ Cancel in the Function mode (page 76).

Doing this automatically resets the entire instrument for playing the specially programmed DJ voice.

**2** Play the DJ style.

Play keys in the accompaniment area of the keyboard.

**NOTE**

• When the DJ style is selected, the accompaniment is triggered by only the root of the chord, letting you play with one finger.

**3** Play the DJ voices.

Play the upper area of the keyboard.

**4** Stop the DJ style.

● For example, when 601 “DJ Set 1” is selected:

# Playing Voices

The PSR-292 features a total of 605 authentic voices — all of which have been created with Yamaha’s sophisticated AWM (Advanced Wave Memory) tone generation system. These include 480 XG voices and drum kits.

The PSR-292 also has a Dual Voice or Split Voice function that lets you combine two different voices in a layer, or play from separate areas of the keyboard, play the two together across the keyboard.

## Playing a Voice

**1** Press the [VOICE] button.

**2** Select the desired voice number.

The categories of each voice and their numbers are shown on the panel. A complete voice list of the available voices is given on page 83.

### VOICE

<b>001~006</b> PIANO	<b>039~046</b> BASS	<b>089~095</b> SYNTH LEAD
<b>007~012</b> E.PIANO	<b>047~058</b> STRINGS	<b>096~100</b> SYNTH PAD
<b>013~024</b> ORGAN	<b>059~062</b> CHOIR	<b>101~108</b> PERCUSSION
<b>025~028</b> ACCORDION	<b>063~071</b> SAXOPHONE	<b>109~120</b> DRUM KITS
<b>029~038</b> GUITAR	<b>072~077</b> TRUMPET	<b>121~600</b> XG
	<b>078~083</b> BRASS	<b>601~605</b> DJ
	<b>084~088</b> FLUTE	<b>000</b> OTS

#### NOTE

- Selecting the #000 OTS voice calls up a convenient feature — automatically selecting an appropriate voice to best match the current style or song.

■ Use the CATEGORY [▲]/[▼] buttons, dial or the SELECT [▲]/[▼] buttons.

#### ● Select the voice CATEGORY

Using the CATEGORY [▲]/[▼] button jumps through the voice numbers according to their category divisions.

## ● Select the voice number

Select a voice by using the dial or the SELECT [▲]/[▼] buttons.

## ■ Use the numeric keypad.

There are two ways to select voices: 1) directly entering the voice number with the numeric keypad, or 2) using the [+]/[-] buttons to step up and down through the voice numbers.

### ● Using the numeric keypad

Enter the digits of the voice number as listed on page 83. For example, to select voice #109, press “1” on the numeric keypad, then “0”, “9.” For voice numbers beginning with zeroes (such as #042 or #006), the initial zeroes may be omitted. In this case, there is a short pause before the indication appears.

### ● Using the [+]/[-] buttons

Press the [+] button to select the next voice number, and press the [-] button to select the previous voice. Holding down either button continuously scrolls up or down through the numbers.

#### NOTE

- Each voice is automatically called up with the most suitable octave range setting. Thus, playing middle C with one voice may sound higher or lower than another voice at the same key.

## 3 Play the selected voice.

Since either the Style, Song or M.D.B. mode is active in the background, you can also play styles, songs or M.D.B., respectively, in the Voice mode by simply pressing the [START/STOP] button. The last selected style, song or M.D.B. will be played.

*The following parameters can be set in the Function mode (page 75).*

CATEGORY	SELECT
Main Voice	Volume
	Octave
	Pan
	Reverb Send Level
	Chorus Send Level
	DSP Send Level

### Drum Kit Voice List (voices 109-120)

When one of the 12 Drum Kit voices is selected, you can play different drum and percussion instrument sounds from the keyboard.

• For more details, see page 92.

No.	Name	LCD
109	Standard Kit 1	Std.Kit1
110	Standard Kit 2	Std.Kit2
111	Room Kit	Room Kit
112	Rock Kit	Rock Kit
113	Electronic Kit	Elct.Kit
114	Analog Kit	AnlogKit
115	Dance Kit	DanceKit
116	Jazz Kit	Jazz Kit
117	Brush Kit	BrushKit
118	Symphony Kit	SymphKit
119	SFX Kit 1	SFX Kit1
120	SFX Kit 2	SFX Kit2

● For example, when 109 “Standard Kit 1” is selected:

# Playing Voices

## #000 OTS

This special “voice” is actually a convenient feature which automatically selects a suitable voice for you when you select a style. The voice is selected to best match the style or song you’ve called up.

### Select voice #000 (OTS).

## Dual Voice

The Dual Voice function lets you combine two different voices in a layer — one the Main voice, which is selected normally, and the other the Dual voice, which is selected in the *Function mode* (page 75). You can also set various parameters independently for these voices, such as giving them separate volume, octave, Pan, Reverb, Chorus, and DSP settings. This lets you create an optimum mix for the voices, and enhance the way they blend together.

*The following parameters can be set in the Function mode (page 75).*

CATEGORY	SELECT
Dual Voice	Voice
	Volume
	Octave
	Pan
	Reverb Send Level
	Chorus Send Level
	DSP Send Level

To turn the Dual Voice on or off, press the [DUAL] button.

## Split Voice

The Split Voice function lets you assign two different Voices to opposite areas of the keyboard, and play one Voice with your left hand while your right plays another.

For example, you could play bass with the left hand and play piano with the right. The right-hand (or upper) Voice is selected in the Main Voice mode (page 23), and the left-hand (or lower) Voice is selected in the *Function mode* (page 75), along with the other Split Voice parameters shown below.

*The following parameters can be set in the Function mode (page 75).*

CATEGORY	SELECT
Split Voice	Voice
	Volume
	Octave
	Pan
	Reverb Send Level
	Chorus Send Level
	DSP Send Level

To turn the Split Voice on or off, press the [SPLIT] button.

## Setting the Split Point

The Split Point determines the highest key for the split voice and sets the split point.

**NOTE**

- This setting also affects the split point for the accompaniment area.

*Split Point can be set in the Function mode (page 75).*

## One Touch Setting (Présélection immédiate)

Cette fonction très utile sélectionne automatiquement la voix qui correspond le mieux au style sélectionné, simplement en appuyant sur l'une des deux touches One Touch Setting. Il existe deux sortes de réglages de présélection immédiate. Vous pouvez créer et stocker vos propres réglages de présélection immédiate pour chaque style.

NOTE

- Vous ne pouvez pas utiliser la fonction One Touch Setting dans le mode Song.

### ● Paramètres One Touch Setting

Voix principale	Voice Number (N° de voix)	Effet	DSP Type
	Volume		On/Off
	Octave	Harmonie	Harmony Type
	Pan		Harmony Volume
	Reverb Send Level		
	Chorus Send Level		
	DSP Send Level		
	Duo de voix	ON/Off	
Voice Number			
Volume			
Octave			
Pan			
Reverb Send Level			
Chorus Send Level			
DSP Send Level			

\* L'accompagnement est automatiquement activé.  
La fonction Synchro Start est automatiquement activée (lorsque le style est arrêté).

### ■ Sélection d'un réglage de présélection immédiate.....

#### 1 Sélectionnez le style.

#### 2 Appuyez sur la touche ONE TOUCH SETTING [1] ou [2].

## ■ Creating and Storing a One Touch Setting. •••••

You can also create and store your own custom One Touch Settings for each of the styles.

**1** Select the desired style.

**2** Make the desired settings.

Change the voice and make any other settings you want to use with the selected style and the One Touch Setting buttons.

**3** Press and hold the [MEMORY] button then press the appropriate button — ONE TOUCH SETTING button [1] or [2].

### Restoring the Default One Touch Setting data

Each One Touch Setting can be restored to its default. To do this, simply press and hold the appropriate One Touch Setting button, [1] or [2]. To restore both buttons to their defaults, simultaneously press and hold both the [1] and [2] buttons.

## Transpose and Tuning

You can also adjust the tuning and change the transposition (key) of the entire PSR-292 sound with the Transpose and Tuning functions.

### ■ Transpose •••••

Transpose determines the key of both the main voice and the bass/chord accompaniment. It also determines the pitch of the songs. This allows you to easily match the pitch of the PSR-292 to other instruments or singers, or play in a different key without changing your fingering. The Transpose settings can be adjusted over a range of  $\pm 12$  semitones ( $\pm 1$  octave).

*Transpose can be set in the Function mode (page 75).*

#### NOTE

- The Transpose function has no effect on the Drum Kits voices (#109 - #120) and DJ voices (#601 - #605).

### ■ Tuning •••••

Tuning determines the fine pitch setting of both the main voice and the bass/chord accompaniment. It also determines the pitch of the songs. This allows you to accurately match the tuning with that of other instruments. The Tuning settings can be adjusted over a range of  $\pm 100$  (approx.  $\pm 1$  semitone).

*Tuning can be set in the Function mode (page 75).*

#### NOTE

- The Tuning settings have no effect on the Drum Kit voices (#109 - #120).

## Touch and Touch Sensitivity

The Touch function gives you dynamic, expressive control over the voices, letting you determine how loud or soft the sound is by your playing strength.

**Turn the Touch function on or off as desired by pressing the [TOUCH] button.**

**NOTE**

- To save the Touch on/off status and the Function parameters to internal memory (flash memory), press and hold the [FUNCTION] button. (See page 78.)

Touch Sensitivity lets you set how the PSR-292 responds to your playing strength, allowing you to customize the keyboard to suit your own playing style. The default Touch Sensitivity is 2 (Medium).

*Sensitivity can be set in the Function mode (page 75).*

● **Settings:**

<b>1 (Soft)</b>	This results in limited touch response, and produces a relatively narrow dynamic range, no matter how lightly or strongly you play the keys.
<b>2 (Medium)</b>	This lets you play over a normal dynamic range (soft to loud).
<b>3 (Hard)</b>	This is designed for playing very soft passages, giving you slightly more detailed control in the soft volume range.

When Touch is turned off, a constant volume (corresponding to a velocity value of 80) is produced.

The PSR-292 is equipped with a wide variety of effects that can be used to enhance the sound of the voices. The PSR-292 has four separate effect systems — Harmony, Reverb, Chorus and DSP — and each has many different effect types to choose from.

## Harmony

The Harmony section features a variety of performance effects that enhance the melodies you play when using the accompaniment styles of the PSR-292. A total of twenty-six Harmony types are available. (See page 33.)

Tremolo, Trill and Echo effects can be used even if accompaniment is off. There are five different Harmony Types that automatically create harmony parts (for notes played in the upper section of the keyboard) to match the accompaniment chords.

### Turn on/off the Harmony effect.

Press the [HARMONY] button.

Indicates Harmony effect is on.

#### IMPORTANT

- For the first five Harmony Types (Duet, Trio, Block, Country, and Octave), chords must be played in the Accompaniment area of the keyboard. The Harmony voice(s) change in pitch to best match the chords you play.
- The speed of the Trill, Tremolo, and Echo effects depends on the Tempo setting (page 33).

#### NOTE

- Each voice of the PSR-292 has its own independent Harmony setting.

Harmony type and Harmony Volume (when Harmony Type 1 - 5 is selected) can be set in the Function mode (page 76).

## Reverb

The Reverb effect reproduces the natural ambient “wash” of sound that occurs when a instrument is played in a room or concert hall. A total of eight different Reverb types simulating various different performance environments are available. (See page 33.)

The following parameters can be set in the Function mode (pages 75, 76).

CATEGORY	SELECT
Effect	Reverb Type
Main Voice	Reverb Send Level
Dual Voice	Reverb Send Level
Split Voice	Reverb Send Level

#### NOTE

- Twelve additional Reverb Types are available when controlling the PSR-292 from a MIDI device. (For details, See page 97.)
- Each style of the PSR-292 has its own independent Reverb setting.

## Chorus

The Chorus effect lets you enhance the sound of the voices with the use of pitch modulation. Two basic types are provided: Chorus and Flanger. Chorus produces a thicker, warmer, and more animated sound, whereas Flanger creates a swirling, metallic effect. A total of four Chorus types are available. (See page 34.)

*The following parameters can be set in the Function mode (pages 75, 76).*

CATEGORY	SELECT
Effect	Chorus Type
Main Voice	Chorus Send Level
Dual Voice	Chorus Send Level
Split Voice	Chorus Send Level

## DSP

The DSP effect section provides distortion and chorus effects, plus a wealth of other useful and dynamic effects for enhancing and changing the sound of the voices. Included among these miscellaneous effects are reverse gate reverb, phaser, rotary speaker, tremolo, echo, delay, distortion, equalization, and wah. A total of thirty-eight DSP types are available. (See page 34.)

*The following parameters can be set in the Function mode (pages 75, 76).*

CATEGORY	SELECT
Effect	DSP Type
Main Voice	DSP Send Level
Dual Voice	DSP Send Level
Split Voice	DSP Send Level

### NOTE

- Each voice of the PSR-292 has its own independent DSP setting.
- Fifty-one additional DSP Types are available when controlling the PSR-292 from a MIDI device. (For details, see page 97.)

## ■ Effect Types

### ● Harmony Types

No.	Harmony Type	Display Name	Description
1	Duet	Duet	Harmony types 1 - 5 are pitch-based and add one-, two- or three-note harmonies to the single-note melody played in the right hand. These types only sound when chords are played in the auto accompaniment area of the keyboard.
2	Trio	Trio	
3	Block	Block	
4	Country	Country	
5	Octave	Octave	
6	Trill 1/4 note	Tril1/4	<p>Types 6 - 26 are rhythm-based effects and add embellishments or delayed repeats in time with the auto accompaniment. These types sound whether the auto accompaniment is on or not; however, the actual speed of the effect depends on the Tempo setting (page 41). The individual note values in each type let you synchronize the effect precisely to the rhythm. Triplet settings are also available: 1/6 = quarter-note triplets, 1/12 = eighth-note triplets, 1/24 = sixteenth-note triplets.</p> <ul style="list-style-type: none"> <li>• The Trill effect Types (6 - 12) create two-note trills (alternating notes) when two notes are held.</li> <li>• The Tremolo effect Types (13 - 19) repeat all held notes (up to four).</li> <li>• The Echo effect Types (20 - 26) create delayed repeats of each note played.</li> </ul>
7	Trill 1/6 note	Tril1/6	
8	Trill 1/8 note	Tril1/8	
9	Trill 1/12 note	Tril1/12	
10	Trill 1/16 note	Tril1/16	
11	Trill 1/24 note	Tril1/24	
12	Trill 1/32 note	Tril1/32	
13	Tremolo 1/4 note	Trem1/4	
14	Tremolo 1/6 note	Trem1/6	
15	Tremolo 1/8 note	Trem1/8	
16	Tremolo 1/12 note	Trem1/12	
17	Tremolo 1/16 note	Trem1/16	
18	Tremolo 1/24 note	Trem1/24	
19	Tremolo 1/32 note	Trem1/32	
20	Echo 1/4 note	Echo1/4	
21	Echo 1/6 note	Echo1/6	
22	Echo 1/8 note	Echo1/8	
23	Echo 1/12 note	Echo1/12	
24	Echo 1/16 note	Echo1/16	
25	Echo 1/24 note	Echo1/24	
26	Echo 1/32 note	Echo1/32	

### ● Reverb Types

No.	Reverb Type	Display Name	Description
1	Hall 1	Hall1	Concert hall reverb.
2	Hall 2	Hall1	
3	Room 1	Room1	Small room reverb.
4	Room 2	Room2	
5	Stage 1	Stage1	Reverb for solo instruments.
6	Stage 2	Stage2	
7	Plate 1	Plate1	Simulated steel plate reverb.
8	Plate 2	Plate2	
9	Off	Off	No effect.

# Effects

## ● Chorus Types

No.	Chorus Type	Display Name	Description
1	Chorus 1	Chorus1	Conventional chorus program with rich, warm chorusing.
2	Chorus 2	Chorus2	
3	Flanger 1	Flanger1	Pronounced three-phase modulation with a slight metallic sound.
4	Flanger 2	Flanger2	
5	Off	Off	No effect.

## ● DSP Types

No.	DSP Type	Display Name	Description
1	Hall 1	Hall1	Concert hall reverb.
2	Hall 2	Hall2	
3	Room 1	Room1	Small room reverb.
4	Room 2	Room2	
5	Stage 1	Stage1	Reverb for solo instruments.
6	Stage 2	Stage2	
7	Plate 1	Plate1	Simulated steel plate reverb.
8	Plate 2	Plate2	
9	Early Reflection 1	ER1	Early reflections only.
10	Early Reflection 2	ER2	
11	Gate Reverb	Gate1	Gated reverb effect, in which the reverberation is quickly cut off for special effects.
12	Reverse Gate	Gate2	Similar to Gate Reverb, but with a reverse increase in reverb.
13	Chorus 1	Chorus1	Conventional chorus effect with rich, warm chorusing.
14	Chorus 2	Chorus2	
15	Flanger 1	Flanger1	Pronounced three-phase modulation with slight metallic sound.
16	Flanger 2	Flanger2	
17	Symphonic	Symphony	Exceptionally rich & deep chorusing.
18	Phaser	Phaser	Pronounced, metallic modulation with periodic phase change.
19	Rotary Speaker 1	Rotary1	Rotary speaker simulation.
20	Rotary Speaker 2	Rotary2	
21	Tremolo 1	Tremolo1	Rich Tremolo effect with both volume and pitch modulation.
22	Tremolo 2	Tremolo2	
23	Guitar Tremolo	Guitar Tremolo	Simulated electric guitar tremolo.
24	Auto Pan	AutoPan	Several panning effects that automatically shift the sound position (left, right, front, back).
25	Auto Wah	AutoWah	Repeating filter sweep "wah" effect.
26	Delay Left - Center - Right	DelayLCR	Three independent delays, for the left, right and center stereo positions.
27	Delay Left - Right	DelayLR	Initial delay for each stereo channel, and two separate feedback delays.
28	Echo	Echo	Stereo delay, with independent feedback level settings for each channel.
29	Cross Delay	CrossDly	Complex effect that sends the delayed repeats "bouncing" between the left and right channels.
30	Karaoke	Karaoke	Deep, pronounced echo effect.
31	Distortion Hard	D Hard	Hard-edged, warm distortion.
32	Distortion Soft	D Soft	Soft, warm distortion.
33	Overdrive	Overdrv	Natural distortion, like that of an overdriven amplifier.
34	Amp Simulation	AmpSimu	Characteristic sound of a guitar amplifier/speaker.
35	EQ Disco	EQ Disco	Equalizer effect that boosts both high and low frequencies, as is typical in most disco music.
36	EQ Telephone	EQ Tel	Equalizer effect that cuts both high and low frequencies, to simulate the sound heard through a telephone receiver.
37	3Band EQ	3BandEQ	Equalizer with three separate frequency bands.
38	2Band EQ	2BandEQ	Equalizer with two separate frequency bands.
39	No Effect	Off	No effect

# Selecting and Playing Styles

The PSR-292 provides dynamic rhythm/accompaniment patterns (styles) — as well as voice settings appropriate for each style — for various popular musical categories.

A total of 135 different styles are available, in several different categories. Each style is made up of separate “sections” — Intro, Main A and B, and Ending — letting you call up different accompaniment sections as you perform.

The auto accompaniment features that are built into the rhythms add the excitement of instrumental backing to your performance, letting you control the accompaniment by the chords you play. Auto accompaniment effectively splits the keyboard into two areas: The upper is used for playing a melody line, and the lower (set by default to keys F#2 and lower) is for the auto accompaniment function.

The PSR-292 also features the convenient Dictionary function (page 45). Dictionary provides you with a built-in “chord encyclopedia” that teaches you how to play any chord you specify by showing you the appropriate notes in the display.

## Selecting a Style

**1** Press the [STYLE] button.

Style name and number

**2** Select the desired style number.

The categories of each styles and their numbers are shown on the panel. A complete style list of the available styles is given on page 90.

### STYLE

<b>001~010</b> 8BEAT	<b>071~077</b> COUNTRY
<b>011~018</b> 16BEAT	<b>078~089</b> LATIN
<b>019~026</b> BALLAD	<b>090~100</b> BALLROOM
<b>027~040</b> DANCE	<b>101~111</b> TRADITIONAL
<b>041~047</b> DISCO	<b>112~118</b> WALTZ
<b>048~060</b> SWING & JAZZ	<b>119~123</b> DJ
<b>061~070</b> R & B	<b>124~135</b> PIANIST

■ Use the dial. You can also use the CATEGORY and/or SELECT buttons.

Turn the dial and select the desired style. Select the appropriate category by using the CATEGORY [▲]/[▼] buttons. When you come close to the desired number, use the SELECT [▲]/[▼] buttons to step down and up through the style numbers.

# Selecting and Playing Styles

## ■ Use the numeric keypad.

Style numbers can be selected in the same way as with the voices (page 24). You can use the numeric keypad to directly enter the style number, or use the [+]/[-] buttons to step up and down through the styles.

## Playing the Styles

The panel buttons below function as style controls.

Pressing this button alternately enables and cancels the bass and chord accompaniment. (See below.)

Pressing this button alternately enables and cancels the Sync Stop function. (See page 40.)

Pressing this button alternately enables and cancels the Sync Start function. (See page 37.)

Pressing this button switches between the Main A and Main B sections, automatically adding a fill-in pattern before changing the section. (See page 42.)

Pressing this button alternately starts and stops style playback.

This controls the Intro and Ending sections. (See pages 38, 39.)

**STYLE** ACMP SYNC STOP SYNC START INTRO ENDING MAIN / AUTO FILL START / STOP

### 1 Turn on the auto accompaniment.

Press the [ACMP] button to turn on (enable) the auto accompaniment.

**STYLE** ACMP SYNC STOP SYNC START INTRO ENDING MAIN / AUTO FILL START / STOP

Indicates that auto accompaniment is on.

## 2 Start the style.

You can do this in one of the following ways:

### ■ Pressing the [START/STOP] button

The rhythm starts playing immediately without bass and chord accompaniment. The currently selected Main A or B section will play.

You can select the Main A or B section by pressing the appropriate button — [MAIN A/B] — before pressing the [START/STOP] button. (The display briefly shows the letter of the selected section: “MAIN A” or “MAIN B.”)

### ■ Using Tap Tempo to Start

This useful feature lets you tap out the speed (tempo) of the style and automatically start the style at that tapped speed.

Simply tap the [TEMPO/TAP] button four times (or three times for a 3/4 time style), and the style starts automatically at the tempo you tapped. You can also change the tempo while the style is playing by tapping the [TEMPO/TAP] button twice at the desired tempo.

### ■ Using Sync Start

The PSR-292 also has a Sync Start function that allows you to start the style by simply pressing a key on the keyboard. To use Sync Start, first press the [SYNC START] button (the beat marks all flash to indicate Sync Start standby), then press any key on the keyboard. (When auto accompaniment is on, play a key or chord in the auto accompaniment area of the keyboard.)

# Selecting and Playing Styles

## Starting with an Intro section

Each style has its own two- or four-measure Intro section. When used with the auto accompaniment, many of the Intro sections also include special chord changes and embellishments to enhance your performance.

### To start with an Intro section:

- 1) Press the [MAIN/AUTO FILL] button — to select which section (A or B) is to follow the Intro.

- 2) Press the [INTRO ENDING] button.

To actually start the Intro section, press the [START/STOP] button.

## Using Sync Start with an Intro section

You can also use the Sync Start function with the special Intro section of the selected style.

### To use Sync Start with an Intro section:

- 1) Press the [MAIN/AUTO FILL] button — to select which section (A or B) is to follow the Intro.

- 2) Press the [INTRO ENDING] button.

- 3) Press the [SYNC START] button to enable Sync Start, and start the Intro section and accompaniment by playing any key on the keyboard. (When auto accompaniment is on, play a key or chord in the auto accompaniment area of the keyboard.)

## 3 Change chords using the auto accompaniment feature.

Try playing a few successive chords with your left hand, and notice how the bass and chord accompaniment change with each chord you play. (Refer to page 43 for more information on how to use auto accompaniment.)

HINT

- The [ACMP] button can also be used to turn off and on the bass/chord accompaniment while playing — allowing you to create dynamic rhythmic breaks in your performance.

NOTE

- Chords played in the auto accompaniment area of the keyboard are also detected and played when the style is stopped. In effect, this gives you a “split keyboard,” with bass and chords in the left hand and the normally selected voice in the right.

## 4 Stop the style.

You can do this in one of three ways:

### ■ Pressing the [START/STOP] button

The style stops playing immediately.

### ■ Using an Ending section

Press the [INTRO ENDING] button. The style stops after the Ending section is finished.

NOTE

- To have the Ending section gradually slow down (*ritardando*) as it is playing, press the [INTRO ENDING] button twice quickly.

END<sup>rit.</sup>

### ■ Pressing the [SYNC START] button

This immediately stops the style and automatically enables Sync Start, letting you restart the style by simply playing a chord or key in the auto accompaniment area of the keyboard.

# Selecting and Playing Styles

## Sync Stop

This convenient feature lets you stop (or pause) the style by releasing your fingers from the auto accompaniment area of the keyboard. Playing the chord again restarts the style. This is ideal for putting dynamic breaks in your performance — for example, stopping the rhythm and accompaniment briefly while you play a melodic break or solo with your right hand.

- 1 Press the [ACMP] button.**  
To turn accompaniment on.

- 2 Press the [SYNC STOP] button.**  
Setting Sync Stop to on before starting the style automatically sets Sync Start to on as well.

- 3 Play a chord on the keyboard (in the auto accompaniment area of the keyboard).**  
The style starts as soon as you play a chord.

- 4 Stop the style by releasing the chord.**

- 5 To start the style again, play a chord.**
- 6 To turn Sync Stop off, press the [SYNC STOP] button again.**  
To stop the style completely, press the [START/STOP] button.

## Changing the Tempo

The tempo of style playback can be adjusted over a range of 32 - 280 bpm (beats per minute).

### 1 Call up the Tempo setting.

Press the [TEMPO/TAP] button.

#### NOTE

- When style playback is stopped and a different style is selected, the tempo returns to the default setting of the new style. When switching styles during playback, the last tempo setting is maintained. (This allows you to keep the same tempo, even when changing styles.)

### 2 Change the value.

Use the dial or numeric keypad to set the desired Tempo value, or use the [+] / [-] buttons to increase or decrease the value.

OR

#### Restoring the Default Tempo Value

Each song and style has been given a default or standard Tempo setting. If you've changed the Tempo, you can instantly restore the default setting by pressing both [+] / [-] buttons simultaneously (when Tempo is selected).

You can also restore the default Tempo easily by simultaneously holding the [TEMPO/TAP] button and moving the dial.

#### HINT

- You can also use the convenient Tap Tempo function to change the tempo by "tapping" a new one in real time. (See page 37.)

## Selecting and Playing Styles

### Accompaniment Sections (Main A/B and Fill-ins)

While the style is playing, you can add variation in the rhythm/accompaniment by pressing the [MAIN/AUTO FILL] button. This switches between the Main A and Main B sections, automatically playing a fill-in pattern to smoothly lead into the next section. For example, if the Main A section is currently playing, pressing this button automatically plays a fill-in pattern, followed by the Main B section. (See illustration below.)

You can also select either the Main A or B section to start by pressing the [MAIN/AUTO FILL] button before starting the style.

NOTE

- Rhythm sounds and fill-in sections are not available when one of the Pianist styles (#124 - #135) are selected.

This appears while the fill-in pattern is playing.

Fill A+B

#### About the Fill-in Patterns

If you press the [MAIN/AUTO FILL] button before beat 4...

...a fill-in pattern plays immediately until the end of the measure...

...and the Main A or B section begins here.

If you press the [MAIN/AUTO FILL] button here, after beat 4...

...a fill-in pattern plays from here...

...and the Main A or B section begins here.

### Adjusting the Style Volume

The playback volume of the style can be adjusted in the *Function mode* (page 76). This volume control affects only the Style volume. The volume range is 000 - 127.

NOTE

- Style Volume cannot be changed unless the Style mode is active.

## Selecting and Playing Styles

Chord Name/[Abbreviation]	Normal Voicing	Chord (C)	Display
Major [M]	1 - 3 - 5	C	C
Add ninth [(9)]	1 - 2 - 3 - 5	C(9)	C(9)
Sixth [6]	1 - (3) - 5 - 6	C6	C6

Seventh suspended fourth [7sus4]	1 - 4 - (5) - b7	C7sus4	C7sus4
One plus two plus five [1+2+5]	1 - 2 - 5	C1+2+5	C

### NOTE

- Notes in parentheses can be omitted.
- Playing two same root keys in the adjacent octaves produces accompaniment based only on the root.
- A perfect fifth (1 + 5) produces accompaniment based only on the root and fifth which can be used with both major and minor chords.
- The chord fingerings listed are all in "root" position, but other inversions can be used — with the following exceptions:  
  - m7, m7b5, 6, m6, sus4, aug, dim7, 7b5, 6(9), 1+2+5.
- Inversion of the 7sus4 and m7(11) chords are not recognized if the notes shown in parentheses are omitted.
- The auto accompaniment will sometimes not change when related chords are played in sequence (e.g. some minor chords followed by the minor seventh).
- Two-note fingerings will produce a chord based on the previously played chord.

## Dictionary

The Dictionary function is essentially a built-in “chord book” that shows you the individual notes of chords. It is ideal when you know the name of a certain chord and want to quickly learn how to play it.

### 1 Press the [DICTIONARY] button.

DICTIONARY

### 2 Specify the root of the chord.

Press the key on the keyboard that corresponds to the desired chord root (as printed on the panel).

Pressing this key selects the root G.

### 3 Specify the type of the chord (major, minor, seventh, etc.).

Press the key on the keyboard that corresponds to the desired chord type (as printed on the panel).

Pressing this key selects the major seventh chord type (M7).

#### NOTE

- For a few specific chords, not all notes may be shown in the notation section of the display. This is due to space limitations in the display.
- You can also show the inversion of chord when using [+]/[-] button.

## 4 Play the chord.

Play the chord (as indicated in the display) in the chord area of the keyboard. The chord name flashes in the display when the correct notes are held down. (Inversions for many of the chords are also recognized.)

Indicates notes to be played. Flashes when correct notes are held.

To leave the Dictionary function, press the [DICTIONARY] button again.

### ..... What is a Chord? .....

**The simple answer:** Three or more notes played simultaneously is a chord. (Two notes played together is an “interval” — an interval being the distance between two different notes. This is also referred to as a “harmony.”) Depending on the intervals between the three or more notes, a chord can sound beautiful or muddy and dissonant.

The organization of notes in the example at left — a triad chord — produces a pleasant, harmonious sound. Triads are made up of three notes and are the most basic and common chords in most music.

In this triad, the lowest note is the “root.” The root is the most important note in the chord, because it anchors the sound harmonically by determining its “key” and forms the basis for how we hear the other notes of the chord.

The second note of this chord is four semitones higher than the first, and the third is three semitones higher than the second. Keeping our root note fixed and changing these notes by a semitone up or down (sharp or flat), we can create four different chords.

<p><b>Major chord</b> (ex. C)</p> <p>Minor 3rd   Major 3rd</p>	<p><b>Minor chord</b> (ex. Cm)</p> <p>Major 3rd   Minor 3rd</p>	<p><b>Augmented chord</b> (ex. Caug)</p> <p>Major 3rd   Major 3rd</p>	<p><b>Diminished chord</b> (ex. Cdim)</p> <p>Minor 3rd   Minor 3rd</p>
--	---	---	--

Keep in mind that we can also change the “voicing” of a chord — for example, change the order of the notes (called “inversions”), or play the same notes in different octaves — without changing the basic nature of the chord itself.

#### Inversion examples for the key of C

Beautiful sounding harmonies can be built in this manner. The use of intervals and chords is one of the most important elements in music. A wide variety of emotions and feelings can be created depending on the types of chords used and the order in which they are arranged.

## ••••• Writing Chord Names •••••

Knowing how to read and write chord names is an easy yet invaluable skill. Chords are often written in a kind of shorthand that makes them instantly recognizable (and gives you the freedom to play them with the voicing or inversion that you prefer). Once you understand the basic principles of harmony and chords, it's very simple to use this shorthand to write out the chords of a song.

First, write the root note of the chord in an uppercase letter. If you need to specify sharp or flat, indicate that to the right of the root. The chord type should be indicated to the right as well. Examples for the key of C are shown below.

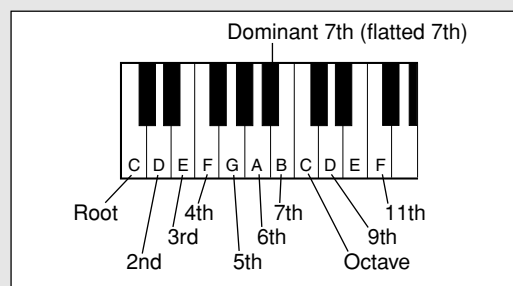

For simple major chords, the type is omitted.

**One important point:** Chords are made up of notes “stacked” on top of each other, and the stacked notes are indicated in the chord name of the chord type as a number — the number being the distance of the note from the root. (See the keyboard diagram below.) For example, the minor 6th chord includes the 6th note of the scale, the major 7th chord has the 7th note of the scale, etc.

### The Intervals of the Scale

To better understand the intervals and the numbers used to represent them in the chord name, study this diagram of the C major scale:

### Other Chords

# Using the Music Database

If you want to play in a certain genre of music but don't know which style and voice settings would be appropriate, simply select the desired genre from the Music Database. The PSR-292 automatically makes all appropriate panel settings to let you play in that music style!

## 1 Press the [M.D.B.] (MUSIC DATABASE) button.

The MUSIC DATABASE menu appears in the display.

### NOTE

- Press the [M.D.B.] (MUSIC DATABASE) button to automatically set the Style mode, turn AUTO ACCOMPANIMENT on, and turn SYNCHRONIZED START on. See page 37 for details.

## 2 Select a Music Database.

The categories of each Music Database and their numbers are shown on the panel. A complete list of the available styles in the Music Database is given on page 91.

### MUSIC DATABASE

Press the M.D.B. button and select.

**001 ~ 024** POP HITS

**025 ~ 049** SWING & JAZZ

**050 ~ 079** EASY LISTENING

**080 ~ 109** ROMANTIC BALLADS

**110 ~ 119** ROCK & FUSION

**120 ~ 130** RHYTHM & BLUES

**131 ~ 140** HIP HOP HOUSE

**141 ~ 153** LATIN NIGHTS

**154 ~ 163** COUNTRY & WESTERN

**164 ~ 176** DISCO & PARTY

**177 ~ 187** BALLROOM

**188 ~ 208** TRADITIONAL

### ■ Use the dial. You can also use the CATEGORY and/or SELECT buttons.

Turn the dial and select the Music Database. Select the appropriate category by using the CATEGORY [▲]/[▼] buttons. When you come close to the desired number, use the SELECT [▲]/[▼] buttons to step down and up through the Music Database numbers.

### ■ Use the numeric keypad.

Music Database numbers can be selected in the same way as with the voices (page 24). You can use the numeric keypad to directly enter the Music Database number, or use the [+]/[-] buttons to step up and down through the Music Database.

In this example, we will select #208 “Xmas Walz” and play the Song “Silent Night”.

♩ = 82 Silent Night

### 3 Play the chords with your left hand and the melody lines with your right hand along with the music.

As soon as you play a chord with your left hand, the style starts.  
For information on how to enter chords, see “Multi Fingering” on page 43.

**NOTE**  
• See pages 35 through 44 for details about the Style.

### 4 When you reach the point in the music indicated by the arrow above, press the [ENDING] button.

The style plays an ending phrase in ritardando.  
When the ending is finished, the style automatically stops.  
You can also stop the style by using the [STOP] button.

### Data stored by the Music Database

Each of the Music Database settings has been specially programmed to match the selected musical style and each features the best suited voice (or combination of voices), style and other settings. Pressing the [M.D.B.] (MUSIC DATABASE) button and selecting a number lets you instantly reconfigure all relevant settings, conveniently allowing you to start playing in the desired genre with all the appropriate sounds — without having to make each setting one by one.

#### ● M.D.B. Parameters

Style	Style Number	Split Voice	ON/Off
	Accompaniment Split Point		Voice Number
	MainA/MainB		Volume
	Style Volume		Octave
Main Voice	Voice Number		Pan
	Volume		Reverb Send Level
	Octave		Chorus Send Level
	Pan		DSP Send Level
	Reverb Send Level		Split Point
	Chorus Send Level		Effect
DSP Send Level	Chorus Type		
Dual Voice	ON/Off	DSP Type	
	Voice Number	Harmony	On/Off
	Volume		Harmony Type
	Octave		Harmony Volume
	Pan	Transpose	Transpose
	Reverb Send Level		Tempo
	Chorus Send Level		
	DSP Send Level		

\* Accompaniment is automatically set to on.  
Synchro Start is automatically set to on (when style is stopped).

# Selecting and Playing Songs

The PSR-292 features a total of 105 songs. These include 100 songs that showcase the rich and dynamic sounds of the instrument, and 99 of these songs can be used with the educational Lesson feature (page 61), a powerful tool that makes learning songs fun and easy. A special Demo song has also been included, and can be played automatically by pressing the [DEMO] button. Moreover, there are five special User songs to which you can record your own performance.

The User songs are “empty” and cannot be played until something has been recorded to them. (For instructions on recording your own songs, see page 56.)

You can also transfer song data from your computer to the PSR-292 for playback. For details, see page 71.

## ● Song Playback Display

### About the Beat Display

The arrow marks in the beat display flash in time with the rhythm of the song or style. The first arrow indicates the first beat of the measure, and the others flash in sequence.

## Selecting a Song

**1** Press the [SONG] button.

Song name and number

## Selecting and Playing Songs

### 2 Select the desired song number.

The categories of each song and their numbers are shown on the panel. A complete list of the available songs is given on page 15.

SONG			
001	DEMO	101~	FLASH
002~006	FAVORITES		MEMORY
007~016	ORCHESTRA	201	USER 1
017~036	PIANIST	202	USER 2
037~066	PRACTICE	203	USER 3
067~080	DUET	204	USER 4
081~100	CHORD LESSON	205	USER 5

#### ■ Use the dial. You can also use the CATEGORY and/or SELECT buttons.

Turn the dial and select the desired song. Select the appropriate category by using the CATEGORY [▲]/[▼] buttons. When you come close to the desired number, use the SELECT [▲]/[▼] buttons to step down and up through the song numbers.

#### ■ Use the numeric keypad.

Song numbers can be selected in the same way as with the voices (page 24). You can use the numeric keypad to directly enter the song number, or use the [+]/[-] buttons to step up and down through the song.

#### Listening to the Flash Memory Song

The PSR-292 can play a song loaded into its internal flash memory. To do this, you'll need to connect the PSR-292 to a personal computer, and use the "Song Filer" software to transmit the song from the computer. For more information on Flash songs and Song Filer, refer to page 71.

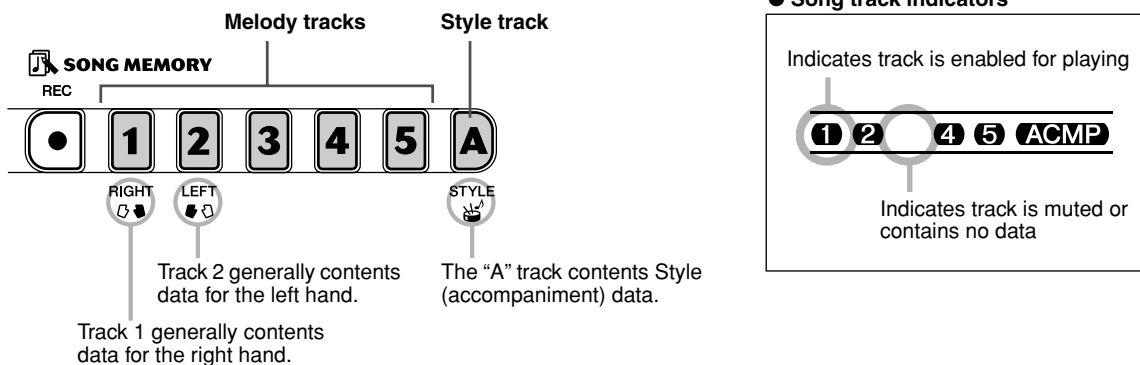

Select the song number 101-199 using the dial or numeric keypad in the same way as preset songs.

## Playing the Songs

The Panel buttons below function as Song controls.

### About the Song Tracks

## 1 Start the selected song.

Press the [START/STOP] button. As the song plays back, the measure number and chords are shown in the display.

### NOTE

- You can play along with the song using the currently selected voice, or even select a different voice for playing along. Simply call up the Voice mode while the song is playing back and select the desired voice. (See page 23.)

## 2 Stop the song.

Press the [START/STOP] button. If playback was started by pressing the [START/STOP] button, the selected song stops automatically.

# Selecting and Playing Songs

## A-B Repeat

The convenient A-B Repeat function is an ideal aid for practicing and learning. It allows you to specify a phrase of a song (between point A and point B) and repeat it — while you play or practice along with it.

### 1 While playing a song, set point A (the start point).

During playback, press the [A-B REPEAT] button once, at the beginning point to be repeated.

#### NOTE

- The A and B points can only be specified at the beginning of a measure (beat 1), and not at any point in the middle of a measure.
- To set the A point to the beginning of a song, press the [A-B REPEAT] button before starting playback.

### 2 Set point B (the end point).

As the song continues playing, press the [A-B REPEAT] button once again, at the ending point to be repeated. The selected phrase repeats indefinitely until stopped.

#### HINT

- If you're repeat practicing a particularly difficult section, try slowing down the Tempo to an appropriate speed to make it easier to play and master the part. You may also want to slow down the Tempo while setting the A and B points; this makes it easier to accurately set the points.
- You can also set the A-B Repeat function when the song is stopped. Simply use the [REW ◀] and [FF ▶] buttons to select the desired measures, pressing the [A-B REPEAT] button for each point, then start playback.

### 3 Pause or stop playback as needed.

Use the [PAUSE] button or [START/STOP] button. Stopping playback does not cancel the set A/B points or the A-B Repeat function.

### 4 Turn off the A-B Repeat function.

Press the [A-B REPEAT] button.

## Melody Voice Change

The PSR-292 lets you play a melody on the keyboard along with each of the songs, either with the original melody voice or one of your own selection. The convenient Melody Voice Change feature takes this one step further — it lets you replace the original voice used for the melody of the song with the panel voice of your own selection. For example, if the current voice selected on the panel is piano but the song’s melody is being played by a flute voice, using Melody Voice Change will change the flute melody voice to piano.

### 1 Select the desired song.

Press the [SONG] button, then use the dial, numeric keypad or [+]/[-] buttons to select the desired song. (See page 51.)

### 2 Select the desired voice.

Press the [VOICE] button, then use the dial, numeric keypad or [+]/[-] buttons to select the desired voice. (See page 23.)

### 3 Press and hold down the [VOICE] button for at least one second.

“MELODY VOICE CHANGE” appears in the display, indicating that the selected panel voice has replaced the song’s original melody voice.

## Adjusting the Song Volume

The playback volume of the song can be adjusted in the *Function mode* (page 76). This volume control affects only the Song volume. The volume range is 000 - 127.

#### NOTE

- Song Volume cannot be changed unless the Song mode is active. (This function becomes Style Volume when the Style mode is active.)

# Enregistrement d'un morceau

Le PSR-292 est doté de fonctions d'enregistrement performantes et faciles à utiliser qui vous permettent d'enregistrer vos propres performances au clavier et ce, en utilisant jusqu'à six pistes différentes (dont une piste pour l'accompagnement) afin de créer des compositions entièrement orchestrées. Vous pouvez enregistrer et sauvegarder jusqu'à cinq morceaux utilisateur.

L'enregistrement de morceaux sur le PSR-292 est semblable à un enregistrement réalisé sur magnétophone. Tout ce que vous interprétez au clavier est enregistré en temps réel. Par ailleurs, au fur et à mesure que vous enregistrez les passages successifs sur les différentes pistes, vous pouvez réentendre les passages déjà enregistrés pendant l'enregistrement des nouveaux.

#### NOTE

##### Capacité de la mémoire de morceau

- Nombre maximum de notes : environ 10 000 (quand seules des pistes de « mélodie » sont enregistrées)
- Nombre maximum d'accords : environ 5 500 (lorsque seule la piste d'accords est enregistrée)

## Enregistrement d'un morceau utilisateur

### Données pouvant être enregistrées sur les pistes normales (mélodie) :

- Note on/off
- Velocity
- Voice Number
- Reverb Type\*
- Chorus Type\*
- DSP Type\*
- Sustain
- Tempo\*, Time Signature\* (s'il n'y a pas de données de ce type sur la piste Chord)

### Données pouvant être enregistrées sur la piste Chord :

- Style Number\*
- Changements et synchronisation d'accords
- Parties de changement (Intro, Main A/B, etc.)
- Style Volume\*
- Tempo, Time Signature\*

\* Ces réglages ne peuvent être enregistrés qu'une seule fois en début de morceau ; les autres réglages peuvent être modifiés en cours d'exécution de morceau.

## 1 Effectuez tous les réglages nécessaires du PSR-292.

Avant de pouvoir réellement commencer à enregistrer, vous devez effectuer différents réglages pour le morceau, tels que sélectionner un style et une voix et régler le tempo. (Reportez-vous aux pages 35, 41 et 23).

Si nécessaire, effectuez également d'autres réglages. Reportez-vous à la liste ci-dessus pour connaître les réglages qui peuvent être enregistrés dans un morceau.

#### NOTE

- Lorsque vous utilisez une voix partagée (Split Voice) pour l'enregistrement, la voix affectée gauche du point de partage ne peut pas être enregistrée.

### Utilisation du métronome

Vous pouvez, si vous le désirez, utiliser la fonction Métronome à la place d'un style. Cela vous permet de garder votre performance dans le rythme, même si vous enregistrez sans style. Pour ce faire, appuyez sur la touche [METRONOME] avant de procéder à l'enregistrement (étape 4 ci-après). Dès que le morceau est entièrement enregistré, il ne vous reste plus qu'à lancer sa reproduction en ayant au préalable désactivé la fonction Métronome. (Voir page 20.)

## 2 Select a User song number for recording.

Use the dial or numeric keypad to select the desired song: 201 - 205. If no song is manually selected, the PSR-292 automatically selects the first available empty song number.

## 3 Select a track number for recording.

While holding down the [REC] button, press the appropriate SONG MEMORY button.

### CAUTION

- Keep in mind that all recording operations “replace” the data. In other words, if you record to a track that already has recorded data, all previous data in the track will be erased and replaced by the newly recorded data.

### Recording to the Chord Track

A special Chord track is provided for recording accompaniment data. This is automatically recorded to the Chord track (track A). Selecting the Chord track automatically turns on the accompaniment.

### NOTE

- If accompaniment has already been turned on before entering the Record mode, the Chord track is automatically selected.

### Recording to a Melody Track (1 - 5)

Five independent Melody tracks are provided for recording your keyboard performance. Normally, you'll want to record these after you've recorded the Chord track. You can also record the Chord track and one of the Melody tracks simultaneously.

## Muting Tracks During Playback

While recording is enabled, you can selectively mute different tracks. This is useful for when you want to clearly hear certain tracks, and not others, during recording. Muting can also be done “on the fly” during playback. To use muting, press the corresponding SONG MEMORY button, repeatedly if necessary, until the desired track number in the display is off.

Each press of a SONG MEMORY button (when playback is stopped) cycles through the following settings:

## 4 Start recording.

When the beat marks and track number start flashing, you can start recording simply by playing the keyboard (or by pressing the [START/STOP] button).

If you want to rehearse your part before recording, press the [SYNC START] button to turn Sync Start off. After rehearsing, press [SYNC START] again to return to the above condition.

### ■ When recording the Chord track

With Sync Start on, play the first chord of the song in the auto accompaniment area of the keyboard. The accompaniment starts automatically and you can continue recording, playing other chords in time with the accompaniment.

## 5 Stop recording.

After you’ve finished playing the part, press the [START/STOP] or [REC] button.

## 6 Record to other tracks as desired.

To do this, simply repeat steps #3 - #5 above. Make sure that when you press the SONG MEMORY button corresponding to the desired track, the track number in the display flashes.

## 7 Listen to your new recording.

To play back the song from the beginning, simply press the [START/STOP] button again. Playback stops when the [START/STOP] button is pressed again.

## Song Clear

The Song Clear operation completely erases all recorded data on all tracks of a selected User song. Use this operation only when you're sure you want to erase a song and record a new one. To erase an individual track of a song while leaving the other tracks intact, use the Track Clear operation (page 60).

### 1 Select the desired song.

Press the [SONG] button, then use the numeric keypad or [+]/[-] buttons to select the desired song (201 - 205).

### 2 While holding down the [A] button, press SONG MEMORY button [1].

All track indications in the display flash, indicating that all tracks are to be erased.

### 3 Press the [+ / YES] button.

### 4 At the "Sure?" prompt, press the [+ / YES] button, or press the [- / NO] button to abort.

Pressing the [+ / YES] button executes the Song Clear operation. Pressing the [- / NO] button aborts.

## Track Clear

The Track Clear operation completely erases all recorded data on a selected track of a selected User song, leaving the other tracks intact. Use this operation only when you're sure you want to erase a track and record a new one. To erase the data of an entire song, use the Song Clear operation (page 59).

### 1 Select the desired song.

Press the [SONG] button, then use the numeric keypad or [+]/[-] buttons to select the desired song (201 - 205).

### 2 Press and hold down the button corresponding to the track to be erased.

Press and hold down the appropriate SONG MEMORY button ([1] - [5], [A]) for at least one second.

### 3 Press the [+ / YES] button.

### 4 At the "Sure?" prompt, press the [+ / YES] button, or press the [- / NO] button to abort.

Pressing the [+ / YES] button executes the Track Clear operation. Pressing the [- / NO] button aborts.

# Song Lesson

The Lesson feature provides an exceptionally fun and easy-to-use way to learn how to read music and play the keyboard. Lesson lets you practice the left- and right-hand parts of each song independently, step by step, until you've mastered them and are ready to practice with both hands together. These practices are divided into four Lesson steps, as described below. Lessons 1 - 3 apply to each hand; press the appropriate button, [L] (left) or [R] (right) to select the desired part for practice.

Naturally, you can also use Song data you've loaded from computer with the Lesson features.

## ■ Lesson 1 — Timing

This lesson step lets you practice just the timing of the notes — any note can be used, as long as you play in rhythm.

## ■ Lesson 2 — Waiting

In this lesson step, the PSR-292 waits for you to play the correct notes before continuing playback of the song.

## ■ Lesson 3 — Minus One

This lesson step plays back the song with one part muted, letting you play and master the missing part yourself — in rhythm and at the proper tempo.

## ■ Lesson 4 — Both Hands

Lesson 4 is a “Minus One” practice essentially the same as Lesson 3, except that both the left- and right-hand parts are muted — letting you play and master both hands at the same time.

## Using the Lesson Feature

### 1 Select one of the Lesson songs.

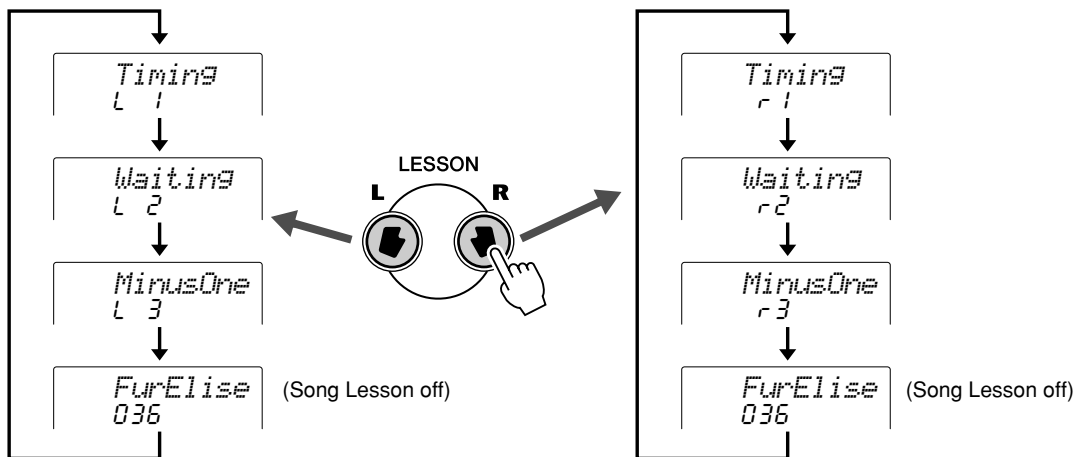

Press the [SONG] button, then use the dial or numeric keypad or [+]/[-] buttons to select the desired song.

The songs are divided into several different categories or music genres.

## 2 Select the part you wish to work on (left or right) and the Lesson step.

If you want to work on the right-hand part, press the [R] button; to work on the left, press the [L] button. Pressing either button repeatedly cycles through the available Lesson steps in order: Lesson 1 → Lesson 2 → Lesson 3 → Off → Lesson 1, etc. The selected Lesson step is indicated in the display.

To select Lesson 4, press both [L] and [R] buttons simultaneously.

## 3 Start the Lesson.

The Lesson and song playback start automatically (following a lead-in count) as soon as the Lesson step is selected. When the Lesson is finished, your performance “grade” is shown in the display (if the Grade function is turned on; page 65). After a short pause, the Lesson begins again automatically.

## 4 Press the [START/STOP] button to stop the Lesson.

The PSR-292 exits from the Lesson feature automatically when the [START/STOP] button is pressed.

## Select the Lesson Track

This function allows you to select the track number of a loaded song from computer (only SMF format 0).

*The track number of the song can be specified in the Function mode (page 76).*

## Lesson 1 — Timing

This lesson step lets you practice just the timing of the notes — any note can be used, as long as you play in rhythm. Pick a note to play. For the left hand, use a note in the auto accompaniment area or play the appropriate left-hand note; for the right, play a note above F#2. Simply concentrate on playing each note in time with the rhythmic accompaniment.

### NOTE

- The melody note does not sound unless your playing is in time with the rhythm.

**1** Select one of the Lesson songs.

**2** Select Lesson 1.

Press the [L] or [R] button (repeatedly, if necessary) until Lesson 1 is indicated.

**3** Play the appropriate melody or chord with the song.

After the lead-in, the song starts automatically, and the appropriate notes appear in the display. In Lesson 1, simply play one note repeatedly in time with the music.

Regarding chords and the use of the left hand, the PSR-292 actually has two different types of songs: 1) songs with normal left-hand chords, and 2) songs in which the left hand plays arpeggios or melodic figures in combination with the right.

In the case of the first type, play the chords with your left hand in the auto accompaniment area of the keyboard.

## Lesson 2 — Waiting

In this lesson step, the PSR-292 waits for you to play the correct notes before continuing playback of the song. This lets you practice reading the music at your own pace. The notes to be played are shown in the display, one after another, as you play them correctly.

**1** Select one of the Lesson songs.

**2** Select Lesson 2.

Press the [L] or [R] button (repeatedly, if necessary) until Lesson 2 is indicated.

**3** Play the appropriate melody or chord with the song.

After the lead-in, the song starts automatically, and the appropriate notes appear in the display. In Lesson 2, play the correct notes at your own pace, until you can master playing them in rhythm.

## Lesson 3 — Minus One

This lesson step lets you practice one part of the song in rhythm at the proper tempo. The PSR-292 plays back the song accompaniment with one part muted (either the left part or the right)— letting you play and master the missing part yourself. The notes you are to play are shown continuously in the display as the song plays back.

**1** Select one of the Lesson songs.

**2** Select Lesson 3.

Press the [L] or [R] button (repeatedly, if necessary) until Lesson 3 is indicated.

### 3 Play the appropriate part with the song.

After the lead-in, the song starts automatically, and the appropriate notes appear in the display. In Lesson 3, listen carefully to the un-muted part, and play the muted part yourself.

## Lesson 4 — Both Hands

Lesson 4 is a “Minus One” practice essentially the same as Lesson 3, except that both the left- and right-hand parts are muted — letting you play and master both hands at the same time. Go on to this lesson step after you’ve mastered each hand’s part in the previous three lesson steps. Practice both hands in time with the rhythm along with the notation in the display.

### 1 Select one of the Lesson songs.

### 2 Select Lesson 4.

Press the [L] and [R] buttons simultaneously, so that Lesson 4 is indicated.

### 3 Play both the left- and right-hand parts with the song.

After the lead-in, the song starts automatically, and the appropriate notes appear in the display. In Lesson 4, both parts (left and right) are muted, letting you play the entire song by yourself.

## Grade

The Lesson feature has a built-in evaluation function that monitors your practicing of the Lesson songs, and just like a real teacher, it tells you how well you did each exercise. Four grades are assigned, depending on your performance: “OK,” “Good,” “Very Good,” and “Excellent.”

- Grade is automatically set to on as the default setting.

*The evaluation function can be set to on/off in the Function mode (page 76).*

# MIDI Functions

The PSR-292 is MIDI-compatible, featuring MIDI IN and MIDI OUT terminals and providing a variety of MIDI-related controls. By using the MIDI functions you can expand your musical possibilities. This section explains what MIDI is, and what it can do, as well as how you can use MIDI on your PSR-292.

## What Is MIDI?

No doubt you have heard the terms “acoustic instrument” and “digital instrument.” In the world today, these are the two main categories of instruments. Let’s consider an acoustic piano and a classical guitar as representative acoustic instruments. They are easy to understand. With the piano, you strike a key, and a hammer inside hits some strings and plays a note. With the guitar, you directly pluck a string and the note sounds. But how does a digital instrument go about playing a note?

Acoustic guitar note production

Pluck a string and the body resonates the sound.

Digital instrument note production

Based on playing information from the keyboard, a sampling note stored in the tone generator is played through the speakers.

As shown in the illustration above, in an electronic instrument the sampling note (previously recorded note) stored in the tone generator section (electronic circuit) is played based on information received from the keyboard. So then what is the information from the keyboard that becomes the basis for note production?

For example, let’s say you play a “C” quarter note using the grand piano sound on the PSR-292 keyboard. Unlike an acoustic instrument that puts out a resonated note, the electronic instrument puts out information from the keyboard such as “with what voice,” “with which key,” “about how strong,” “when was it pressed,” and “when was it released.” Then each piece of information is changed into a number value and sent to the tone generator. Using these numbers as a basis, the tone generator plays the stored sampling note.

### ● Example of Keyboard Information

Voice number (with what voice)	01 (grand piano)
Note number (with which key)	60 (C3)
Note on (when was it pressed) and note off (when was it released)	Timing expressed numerically (quarter note)
Velocity (about how strong)	20 (strong)

### GM System Level 1

“GM System Level 1” is an addition to the MIDI standard which ensures that any GM-compatible music data can be accurately played by any GM-compatible tone generator, regardless of manufacturer. The GM mark is affixed to all software and hardware products that support GM System Level 1. The PSR-292 supports GM System Level 1.

MIDI is an acronym that stands for Musical Instrument Digital Interface, which allows electronic musical instruments to communicate with each other, by sending and receiving compatible Note, Control Change, Program Change and various other types of MIDI data, or messages.

The PSR-292 can control a MIDI device by transmitting note related data and various types of controller data. The PSR-292 can be controlled by the incoming MIDI messages which automatically determine tone generator mode, select MIDI channels, voices and effects, change parameter values and of course play the voices specified for the various parts.

MIDI messages can be divided into two groups: Channel messages and System messages. Below is an explanation of the various types of MIDI messages which the PSR-292 can receive/transmit.

## ● Channel Messages

The PSR-292 is an electronic instrument that can handle 16 channels. This is usually expressed as “it can play 16 instruments at the same time.” Channel messages transmit information such as Note ON/OFF, Program Change, for each of the 16 channels.

Message Name	PSR-292 Operation/Panel Setting
Note ON/OFF	Messages which are generated when the keyboard is played. Each message includes a specific note number which corresponds to the key which is pressed, plus a velocity value based on how hard the key is struck.
Program Change	Voice number (along with corresponding bank select MSB/LSB settings, if necessary).
Control Change	Messages that are used to change some aspect of the sound (modulation, volume, pan, etc.).

## ● System Messages

This is data that is used in common by the entire MIDI system. System messages include messages like Exclusive Messages that transmit data unique to each instrument manufacturer and Realtime Messages that control the MIDI device.

Message Name	PSR-292 Operation/Panel Setting
Exclusive Message	Reverb/chorus/DSP settings, etc.
Realtime Messages	Start/stop operation

The messages transmitted/received by the PSR-292 are shown in the MIDI Implementation Chart on page 94.

### MIDI Terminals

In order to exchange MIDI data between multiple devices, each device must be connected by a cable. The MIDI terminals of the PSR-292 are located on the rear panel.

MIDI IN	Receives MIDI data from another MIDI device.
MIDI OUT	Transmits the PSR-292's keyboard information as MIDI data to another MIDI device.

#### NOTE

- Special MIDI cables (sold separately) must be used for connecting to MIDI devices. They can be bought at music stores, etc.
- Never use MIDI cables longer than about 15 meters. Cables longer than this can pick up noise which can cause data errors.

### Connexion à un ordinateur personnel

Vous pouvez avoir accès à une grande variété de logiciels de musique en raccordant les bornes MIDI du PSR-292 à un ordinateur personnel.

- Lorsque vous utilisez une interface MIDI sur votre ordinateur, raccordez les bornes MIDI de l'ordinateur personnel et du PSR-292.

- Lorsque vous utilisez une interface MIDI avec un ordinateur Macintosh, connectez la borne RS-422 de l'ordinateur (borne du modem ou de l'imprimante) à l'interface MIDI, comme indiqué dans le schéma ci-dessous.

- Pour connecter un ordinateur via une interface USB, utilisez l'interface USB/MIDI UX16 de Yamaha. Connectez l'interface UX16 et l'ordinateur à l'aide d'un câble USB standard, puis effectuez les connexions MIDI appropriées entre le PSR-292 et l'UX16.

#### NOTE

- Lorsque vous utilisez un ordinateur Macintosh, réglez l'horloge de l'interface MIDI dans le logiciel d'application de manière à ce qu'elle corresponde au réglage de l'interface MIDI utilisée. Pour plus de détails, reportez-vous au mode d'emploi du logiciel que vous utilisez.

#### NOTE

##### Affichage de la notation avec le canal MIDI 1

- Le PSR-292 dispose d'une fonction spéciale qui vous permet d'afficher les notes des données MIDI (canal 1 uniquement) à l'écran.

## Local Control

This function lets you enable or disable keyboard control over the PSR-292's voices in the *Function mode* (page 76). This would come in handy, for example, when recording notes to MIDI sequencer. If you are using the sequencer to play back the voices of the PSR-292, you would want to set this to “off” — in order to avoid getting “double” notes, both from the keyboard and from the sequencer. Normally, when playing the PSR-292 by itself, this should be set to “on.”

### CAUTION

- No sound is output from the PSR-292 when Local ON/OFF is set to OFF.

## Using Initial Setup Send with a Sequencer

The most common use for the Initial Setup Send function is in recording a song on a sequencer that is intended for playback with the PSR-292. Essentially, this takes a “snapshot” of the PSR-292 settings and sends that data to the sequencer. By recording this “snapshot” at the start of the song (before any actual performance data), you can instantly restore the necessary settings on the PSR-292 in the *Function mode* (page 76). Provided there is a pause in the song, you could also do this in the middle of a song — for example, completely changing the PSR-292 settings for the next section of the song.

### NOTE

- When the Initial Setup Send operation is completed, the PSR-292 automatically returns to the previous panel condition.

## External Clock

This determines whether the style and song playback functions are controlled by the PortaTone's internal clock (off) or by MIDI clock data from an external sequencer or computer (on).

This should be set to on when you want to have style or song playback follow the external device (such as a rhythm machine or a sequencer). The default setting is off.

*These settings can be made in the Function mode (page 76).*

### CAUTION

- If External Clock is set to ON, style or song playback will not start unless external clock are received.

## Bulk Data Send

This lets you save important PortaTone data and settings to another device (such as a sequencer, computer, or MIDI data filer).

*These settings can be made in the Function mode (page 76).*

### ● Bulk Data Receive

Send the Bulk Data from computer or sequencer to the PSR-292.

### CAUTION

- Keep in mind that all recorded Song data and One Touch Setting data operations replace the data.

### Keyboard Out

This determines whether Keyboard performance data of the Portatone is transmitted via MIDI OUT or not.

*These settings can be made in the Function mode (page 76).*

### Style Out

This determines whether style data is transmitted via MIDI OUT or not.

*These settings can be made in the Function mode (page 76).*

### Song Out

This determines whether Song data is transmitted via MIDI OUT or not.

*These settings can be made in the Function mode (page 76).*

NOTE

- For the Song #001, data is not transmitted.

#### MIDI LSB Receive Cancel

Determines whether the LSB data of Bank Select is received or not. Press and hold the lowest key and turn on the power to change the setting (LSB is ignored).

To restore MIDI LSB Receive Cancel to normal (LSB is recognized), turn on the power again normally.

## ■ Song Filer .....

Après avoir installé Song Filer et connecté le PSR-292 à l'ordinateur, vous pouvez utiliser les deux fonctions décrites ci-dessous.

### ● Transfert de fichiers

Vous pouvez transférer des fichiers de morceaux depuis l'ordinateur vers la mémoire flash du PSR-292.

### ● Gestion de fichiers dans la mémoire flash

Vous pouvez supprimer et renommer des fichiers dans la mémoire flash du PSR-292 depuis votre ordinateur.

#### NOTE

- Reportez-vous à la page 68 pour plus d'informations sur la connexion du PSR-292 à un ordinateur.
- Vous ne pouvez pas utiliser la fonction « Receive Files » (Réception de fichiers) du Song Filer avec le PSR-292.
- Pour plus d'informations sur l'utilisation du Song Filer, reportez-vous au manuel PDF fourni avec l'application Song Filer.

#### ⚠ ATTENTION

- N'essayez jamais de couper le courant lorsqu'une transmission de données de morceaux est en cours. Cela entraînerait l'interruption de la sauvegarde, mais rendrait également la mémoire flash interne instable. En allumant et en coupant le courant, vous risqueriez aussi de supprimer toutes les données de la mémoire flash interne.
- Les données enregistrées dans l'instrument peuvent être perdues à la suite d'un dysfonctionnement ou d'une opération incorrecte. Sauvegardez une copie de vos données importantes sur votre disque dur ou sur une disquette.

### Sélection d'une piste guide pour la main droite/gauche

Vous pouvez sélectionner une piste dans le *mode Function* (page 76) qui guide votre main droite et votre main gauche durant la leçon (page 63).

Cette fonction n'est disponible que lorsque vous sélectionnez un morceau de la mémoire flash (SMF de format 0).

## PC Mode

The PC Mode lets you instantly reconfigure the MIDI control settings for use with a computer or MIDI device.

### ● Default settings

	PC mode is on	PC mode is off
LOCAL ON/OFF	ON	
EXTERNAL CLOCK	OFF	
KEYBOARD OUT	ON	
STYLE OUT	OFF	ON
SONG OUT	OFF	

### ■ To turn the PC mode on or off:

Press the [PC] button and then press the appropriate [+]/[-] button. This switches between the PC Mode on/off settings.

### ■ To store the PC mode parameters:

#### 1 Change the PC mode parameters.

Change the desired MIDI parameters in the Function mode.  
The following PC Mode parameters can be stored to memory.

LOCAL ON/OFF  
EXTERNAL  
KEYBOARD  
STYLE OUT  
SONG OUT

#### ⚠ CAUTION

- No sound is output from the PSR-292 when Local ON/OFF is set to OFF.
- If External Clock is set to ON, style or song playback will not start unless external clock are received.

#### 2 Store the parameters to the PC memory.

Press and hold the [PC] button until “WRITING!” appears in the LCD.

# Function

The PSR-292 has a variety of settings in the Function parameters. These give you detailed control over many of the PSR-292's features.

## Using the Function parameters

### 1 Press the Function button.

FUNCTION

NOTE

- To save the Function parameters and the Touch on/off status to internal memory (flash memory), press and hold the [FUNCTION] button. (See page 78.)

### 2 Select a Function name.

Use the SELECT [▲]/[▼] buttons to select a Function name.

NOTE

- Use the CATEGORY [▲]/[▼] buttons when selecting the category steps.

### 3 Input the appropriate value or use the [+]/[-] buttons to set the selected Function.

You can also use the dial.

OR

## ● Function parameters

CATEGORY	SELECT	Display	Range/ Settings	Description	
Overall	Transpose	<i>TransPos</i>	-12-12	This determines the transposition of the entire PSR-292 sound.	*
	Tuning	<i>Tuning</i>	-100-100	This determines the pitch of the entire PSR-292 sound .	*
	Split Point	<i>SplitPnt</i>	000-127	This determines the highest key for the Split voice and sets the Split "point" — in other words, the key that separates the Split (lower) and Main (upper) voices. (The Split voice sounds up to and including the Split Point key.) The default Split Point is 054 (F#2). The Split Point setting and Accompaniment Split Point setting are automatically set to the same value.	*
	Touch Sensitivity	<i>TouchSns</i>	1-3	A setting of "1" results in limited touch response; this setting produces a relatively narrow dynamic range, no matter how lightly or strongly you play the keys. "2" lets you play over a normal dynamic range (soft to loud), while "3" is designed for playing very soft passages, giving you slightly more detailed control in the soft volume range. When Touch is turned off (page 30), a constant velocity value of 80 is produced (total velocity range = 0-127).	*
Main Voice	Volume	<i>M. Volume</i>	0-127	This determines the volume of the Main voice, letting you create an optimum mix with the Dual or Split voice.	*
	Octave	<i>M. Octave</i>	-2-2 (octave)	This determines the octave range for the Main voice. Use this to set the most suitable range for the Main voice.	*
	Pan	<i>M. Pan</i>	0 (full left)-64 (center) -127 (full right)	This determines the pan position of the Main voice in the stereo image.	*
	Reverb Send Level	<i>M. RevLvl</i>	0-127	This determines how much of the Main voice's signal is sent to the Reverb effect. Higher values result in a louder Reverb effect.	*
	Chorus Send Level	<i>M. ChoLvl</i>	0-127	This determines how much of the Main voice's signal is sent to the Chorus effect. Higher values result in a louder Chorus effect.	*
	DSP Send Level	<i>M. DspLvl</i>	0-127	This determines how much of the Main voice's signal is sent to the DSP effect. Higher values result in a louder DSP effect.	*
Dual Voice	Voice	<i>D. Voice</i>	1-605	This select the dual voice.	*
	Volume	<i>D. Volume</i>	0-127	This determines the volume of the Dual voice, letting you create an optimum mix with the Main voice.	*
	Octave	<i>D. Octave</i>	-2-2 (octave)	This determines the octave range for the Dual voice. Use this to create an octave layer with the Main voice.	*
	Pan	<i>D. Pan</i>	0 (full left)-64 (center) -127 (full right)	This determines the pan position of the Dual voice in the stereo image. For a spacious sounding effect, set this value at or near 0, and set the Main Voice Pan at the opposite positive value.	*
	Reverb Send Level	<i>D. RevLvl</i>	0-127	This determines how much of the Dual voice's signal is sent to the Reverb effect. Higher values result in a louder Reverb effect for the Dual voice.	*
	Chorus Send Level	<i>D. ChoLvl</i>	0-127	This determines how much of the Dual voice's signal is sent to the Chorus effect. Higher values result in a louder Chorus effect for the Dual voice.	*
	DSP Send Level	<i>D. DspLvl</i>	0-127	This determines how much of the Dual voice's signal is sent to the DSP effect. Higher values result in a louder DSP effect for the Dual voice.	*
Split Voice	Voice	<i>S. Voice</i>	1-605	This select the split voice.	*
	Volume	<i>S. Volume</i>	0-127	This determines the volume of the Split voice, letting you create an optimum mix with the Main voice.	*
	Octave	<i>S. Octave</i>	-2-2 (octave)	This determines the octave range for the Split voice. Use this to set the most suitable range for the Split (lower) voice.	*
	Pan	<i>S. Pan</i>	0 (full left)-64 (center) -127 (full right)	This determines the pan position of the Split voice in the stereo image. For a spacious sounding effect, set this value at or near 0, and set the Main Voice Pan at the opposite positive value.	*
	Reverb Send Level	<i>S. RevLvl</i>	0-127	This determines how much of the Split voice's signal is sent to the Reverb effect. Higher values result in a louder Reverb effect for the Split voice.	*
	Chorus Send Level	<i>S. ChoLvl</i>	0-127	This determines how much of the Split voice's signal is sent to the Chorus effect. Higher values result in a louder Chorus effect for the Split voice.	*
	DSP Send Level	<i>S. DspLvl</i>	0-127	This determines how much of the Split voice's signal is sent to the DSP effect. Higher values result in a louder DSP effect for the Split voice.	*

\* The "\*" mark indicates that the setting can be restored to default value by pressing both [+]/[-] buttons simultaneously.

# Function

CATEGORY	SELECT	Display	Range/ Settings	Description	
Effect	Reverb Type	<i>Reverb</i>	1-9	This determines the Reverb type, including "off." (See the list on page 33).	*
	Chorus Type	<i>Chorus</i>	1-5	This determines the Chorus type, including "off." (See the list on page 34).	*
	DSP Type	<i>DSP</i>	1-39	This determines the DSP type, including "off." (See the list on page 34).	*
Harmony	Harmony Type	<i>HarmType</i>	1-26	This determines the Harmony type. (See the list on page 33).	*
	Harmony Volume	<i>HarmVol</i>	0-127	This determines the level of the Harmony effect when Harmony type 1-5 is selected, letting you create the optimum mix with the original melody note.	*
MIDI	Local On/Off	<i>Local</i>	On/Off	This determines the Local on or off. Press the [+]/[-] buttons to set Local Control to on or off.	
	External Clock	<i>ExtClock</i>	On/Off	This determines the External clock or Internal clock. Press the [+]/[-] buttons to set External clock or Internal clock.	
	Bulk Data Send	<i>BulkSend</i>	YES/NO	This lets you save important PortaTone data and settings to another device (such as a sequencer, computer, or MIDI data filer). Use the [YES/+] button to transmit the data. Use the [NO/-] button to stop the transmission.	
	Initial Setup Send	<i>InitSend</i>	YES/NO	This lets you save PortaTone initial data to another device (such as a sequencer, computer, or MIDI data filer). Use the [YES/+] button to transmit the data. Use the [NO/-] button to stop the transmission.	
	Keyboard Out	<i>KbdOut</i>	On/Off	This determines whether Keyboard performance data of the Portatone is transmitted or not. Use the [+]/[-] buttons to change the setting.	
	Style Out	<i>StyleOut</i>	On/Off	This determines whether style data is transmitted via MIDI OUT or not. Press the [+]/[-] buttons to set the Style Out to on or off.	
	Song Out	<i>SongOut</i>	On/Off	This determines whether Song data is transmitted via MIDI OUT or not. Press the [+]/[-] buttons to set Song Out to on or off. (For song #001, data is not transmitted.)	
Volume	Style	<i>StyleVol</i>	0-127	This determines the volume of the style, letting you create an optimum mix with your performance.	*
	Song	<i>Song Vol</i>	0-127	This determines the volume of the Song.	*
Metronome	Volume	<i>Mtr Vol</i>	0-127	This determines the volume of the Metronome.	*
	Time Signature	<i>Time Sig</i>	0-15	This determines the time signature of the Metronome.	*
Lesson	Lesson Track (R)	<i>R-Part</i>	1-16	This determines the track number for your right hand lesson. This setting is effective only loaded song.	*
	Lesson Track (L)	<i>L-Part</i>	1-16	This determines the track number for your left hand lesson. This setting is effective only loaded song.	*
Utility	Grade On/Off	<i>Grade</i>	On/Off	This determines whether Grade function is on or off. Press the [+]/[-] buttons to set Grade to on or off.	
	Demo and DJ Cancel	<i>D-Cancel</i>	On/Off	This determines the Demo and DJ cancel is enabled or not. Press the [+]/[-] buttons to set Demo and DJ Cancel to on or off.	

\* The "\*" mark indicates that the setting can be restored to default value by pressing both [+]/[-] buttons simultaneously.

# Troubleshooting

Problem	Possible Cause and Solution
When the PSR-292 is turned on or off, a popping sound is temporarily produced.	This is normal and indicates that the PSR-292 is receiving electrical power.
When using a mobile phone, noise is produced.	Using a mobile phone in close proximity to the PSR-292 may produce interference. To prevent this, turn off the mobile phone or use it further away from the PSR-292.
There is no sound even when the keyboard is played or when a song is being played back.	Check that nothing is connected to the PHONES/OUTPUT jack on the rear panel. When a set of headphones is plugged into this jack, no sound is output.
	Check the Local Control on/off. (See page 69.)
Playing keys in the right hand area of the keyboard does not produce any sound.	When using the Dictionary function (page 45), the keys in the right hand area are used only for entering the chord root and type.
The sound of the voices or rhythms seems unusual or strange.	The battery power is too low. Replace the batteries. (See page 10.)
The auto accompaniment doesn't turn on, even when pressing the [ACMP] button.	Make sure the Style mode is active before using the auto accompaniment. Press the [STYLE] button to enable style operations.
The style or song does not play back even when pressing the [START/STOP] button.	Check the External Clock on/off. (See page 69.)
The style does not sound properly.	Make sure that the Style Volume (page 42) is set to an appropriate level. Make sure that the Split Point (page 27) is set to an appropriate value.
When playing back one of the Pianist styles (#124 - #135), the rhythm cannot be heard.	This is normal. The Pianist styles have no drums or bass — only piano accompaniment. The accompaniment of the style can only be heard when accompaniment is set to ON and keys are played in the auto accompaniment area of the keyboard.
Not all of the voices seem to sound, or the sound seems to be cut off.	The PSR-292 is polyphonic up to a maximum of 32 notes. If the Dual voice or Split voice is being used and a style or song is playing back at the same time, some notes/sounds may be omitted (or "stolen") from the accompaniment or song.
A strange "flanging" or "doubling" sound occurs when using the PSR-292 with a sequencer. (This may also sound like a "dual" layered sound of two voices, even when Dual is turned off.)	When using the style with a sequencer, set MIDI Echo (or the relevant control) to "off." (Refer to the owner's manual of your particular device and/or software for details.)
The footswitch (for sustain) seems to produce the opposite effect. For example, pressing the footswitch cuts off the sound and releasing it sustains the sounds.	The polarity of the footswitch is reversed. Make sure that the footswitch plug is properly connected to the SUSTAIN jack before turning on the power.
The sound of the voice changes from note to note.	The AWM tone generation method uses multiple recordings (samples) of an instrument across the range of the keyboard; thus, the actual sound of the voice may be slightly different from note to note.

# Data Backup & Initialization

## ■ Data Backup .....

The following data can be stored to internal flash memory as data backup.

Group	Parameter
SONG	User Song Data
ONE TOUCH SETTING	See page 28.
PC	PC Memory
FUNCTION	Tuning Split Point Touch Sensitivity Style Volume Song Volume Metronome Volume Grade On/Off Demo & DJ Cancel
Touch	Touch On/Off

● **About the Internal Flash Memory**  
 The Song, One Touch Setting and PC parameters are automatically stored when each saving operation is done. Function and touch On/Off are stored when Pressing and Holding the Function button.

### ⚠ CAUTION

- Never attempt to turn the power off when a "WRITING!" message is shown in the display. Doing so can damage the internal flash memory and result in loss of data.

## ■ Data Initialization .....

### ● All Data Initialization

All data can be initialized and restored to the factory preset condition by turning on the power while holding the highest (rightmost) white key and highest (rightmost) black key on the keyboard. "All Mem CLr" will appear briefly on the display.

### ⚠ CAUTION

- All data listed above, plus loaded song data, will be erased and/or changed when the All Data Initialization procedure is carried out.
- Carrying out the data initialization procedure will usually restore normal operation if the PSR-292 freezes or begins to act erratically for any reason.

### ● Loaded Song Initializaion

You can erase only the loaded song data by turning on the power while holding the highest (rightmost) black key on the keyboard.

# Voice List / Voice-Liste / Liste des voix / Lista de voces

## ■ Maximum Polyphony

The PSR-292 has 32-note maximum polyphony. This means that it can play a maximum of up to 32 notes at once, regardless of what functions are used. Auto Accompaniment uses a number of the available notes, so when Auto Accompaniment is used the total number of available notes for playing on the keyboard is correspondingly reduced. The same applies to the Split Voice and Song functions.

NOTE

- The Voice List includes MIDI program change numbers for each voice. Use these program change numbers when playing the PSR-292 via MIDI from an external device.
- Some voices may sound continuously or have a long decay after the notes have been released while the sustain pedal (foot-switch) is held.

## ■ Polyphoniekapazität

Das PSR-292 verfügt über eine maximale Polyphonie von 32 Noten. Dies bedeutet, dass das PSR-292, unabhängig von den aktivierten Funktionen, maximal 32 Noten gleichzeitig spielen kann. Eine bestimmte Anzahl der verfügbaren Noten wird von der automatischen Begleitung belegt. Bei der Verwendung der automatischen Begleitung verringert sich somit die Anzahl der für das Spielen auf dem Keyboard verfügbaren Noten entsprechend. Das Gleiche wird auf die Split-Stimmen und Song-Funktion angewendet.

HINWEIS

- In der Voice-Liste sind für jede Stimme Änderungsnummern der MIDI-Programme enthalten. Verwenden Sie diese Änderungsnummern der Programme, wenn Sie das PSR-292 über MIDI von einem externen Gerät aus ansteuern.
- Solange der Sustain-Fußschalter gedrückt ist, ertönen einige Stimmen nach dem Loslassen der Taste eventuell kontinuierlich oder mit einer langen Abklingzeit (Decay).

## ■ Polyphonie maximale

Le PSR-292 dispose d'une polyphonie maximale de 32 notes. Cela signifie que l'instrument peut reproduire un nombre maximal de 32 voix à la fois, indépendamment des fonctions utilisées. L'accompagnement automatique fait appel à un certain nombre de notes disponibles. Il s'ensuit que lorsque l'accompagnement automatique est utilisé, le nombre total de notes disponibles pour l'interprétation au clavier est réduite en conséquence. Cela s'applique également aux fonctions Split Voice (Voix partagées) et Song (Morceau).

NOTE

- La liste des voix comporte des numéros de modification de programmes MIDI pour chaque voix. Utilisez ces derniers pour commander le PSR-292 à partir d'un périphérique MIDI.
- Certaines voix peuvent avoir une sonorité prolongée ou un long déclin après le relâchement des touches, pendant la durée de maintien de la pédale de sustain.

## ■ Polifonía máxima

El PSR-292 tiene una polifonía máxima de 32 notas. Esto significa que puede tocar un máximo de 32 notas a la vez, independientemente de las funciones que se usen. El acompañamiento automático utiliza una parte de las notas disponibles, de forma que cuando se utiliza el acompañamiento automático, el número de notas disponibles se reduce de acuerdo con ello. Lo mismo puede aplicarse a las funciones Split Voice y Song.

NOTA

- La lista de voces incluye números de cambio de programa MIDI para cada sonido. Utilice estos números de cambio de programa cuando toque el PSR-292 mediante MIDI desde un dispositivo externo.
- Algunas voces podrían sonar de forma continuada o presentar una larga caída después de soltar las notas mientras se mantiene presionado el pedal de sostenido (interruptor de pedal).

# Drum Kit List / Drum Kit-Liste / Liste des kits de

- „ ” indicates that the drum sound is the same as “Standard Kit 1”.
- Each percussion voice uses one note.
- The MIDI Note # and Note are actually one octave lower than keyboard Note # and Note. For example, in “109: Standard Kit 1”, the “Seq Click H” (Note# 36/Note C1) corresponds to (Note# 24/Note C0).
- Key Off: Keys marked “O” stop sounding the instant they are released.
- Voices with the same Alternate Note Number (\*1 ... 4) cannot be played simultaneously. (They are designed to be played alternately with each other.)

- „ ” bedeutet, dass der Schlagzeugklang gleich „Standard Kit 1” ist.
- Jede Perkussionsnote belegt eine Note.
- Die MIDI-Note # und Note sind in Wirklichkeit eine Octave tiefer als hier aufgeführt. Beispiel: In „109: Standard Kit 1” entspricht die „Seq Click H” (Note# 36/Note C1) der Note (Note# 24/Note C0).
- Key Off: Mit „O” bezeichnete Tasten hören sofort auf zu klingen, sobald sie losgelassen werden.
- Stimmen mit derselben Alternate Note Number (\*1 ... 4) können nicht gleichzeitig gespielt werden. (Diese Stimmen sind dazu gedacht, wechselweise gespielt zu werden.)

# percussion / Lista de juegos de batería

- « **■** » indique que les sonorités de percussion sont identiques à celles de « Standard Kit 1 ».
- Chaque voix de percussion utilise une note unique.
- Le numéro de note MIDI (Note #) et la note MIDI se situent en réalité à une octave inférieure à celle qui est indiquée dans la liste. Par exemple, dans « 109 : Standard Kit 1 », « Seq Click H » (Note# 36/Note C1) correspond à (Note# 24/Note C0).
- Key Off : pour les touches signalées par « O », l'émission de sons s'arrête instantanément aussitôt que les touches sont relâchées.
- Les voix portant un même numéro de note alternative (\*1 ... 4) ne peuvent pas être jouées simultanément. (Elles sont en effet conçues pour être interprétées en alternance).
- « **■** » indica que el sonido de batería es el mismo que el "Standard Kit 1".
- Cada sonido de percusión utiliza una nota.
- La nota MIDI # y la nota son en realidad una octava menos de lo que aparece en la lista. Por ejemplo, en "109: Standard Kit 1", el "Seq Click H" (Nota# 36/Nota C1) corresponde a (Nota# 24/Nota C0).
- Tecla desactivada: las teclas marcadas con "O" dejan de sonar en el momento en que se sueltan.
- Los sonidos con el mismo número alterno de nota (\*1 ... 4) no pueden tocarse simultáneamente. (Están diseñados para tocarse alternativamente el uno con el otro.)

# Feuille d'implémentation MIDI / Gráfica de implementación MIDI

## NOTE:

- \*1 By default (factory settings) the PSR-292 ordinarily functions as a 16-channel multi-timbral tone generator, and incoming data does not affect the panel voices or panel settings. However, the MIDI messages listed below do affect the panel voices, auto accompaniment, and songs.
- MIDI Master Tuning
  - System exclusive messages for changing the Reverb Type, Chorus Type, and DSP Type.
- \*2 Messages for these control change numbers cannot be transmitted from the PSR-292 itself. However, they may be transmitted when playing the accompaniment, song or using the Harmony effect.
- \*3 Exclusive
- <GM System ON> F0H, 7EH, 7FH, 09H, 01H, F7H
- This message automatically restores all default settings for the instrument, with the exception of MIDI Master Tuning.
- <MIDI Master Volume> F0H, 7FH, 7FH, 04H, 01H, II, mm, F7H
- This message allows the volume of all channels to be changed simultaneously (Universal System Exclusive).
  - The values of "mm" is used for MIDI Master Tuning. (Values for "II" are ignored.)
- <MIDI Master Tuning> F0H, 43H, 1nH, 27H, 30H, 00H, 00H, mm, II, cc, F7H
- This message simultaneously changes the tuning value of all channels.
  - The values of "mm" and "II" are used for MIDI Master Tuning.
  - The default value of "mm" and "II" are 08H and 00H, respectively. Any values can be used for "n" and "cc."
- <Reverb Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 00H, mmH, IIH, F7H
- mm : Reverb Type MSB
  - II : Reverb Type LSB
- Refer to the Effect Map (page 97) for details.
- <Chorus Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 20H, mmH, IIH, F7H
- mm : Chorus Type MSB
  - II : Chorus Type LSB
- Refer to the Effect Map (page 97) for details.
- <DSP Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 40H, mmH, IIH, F7H
- mm : DSP Type MSB
  - II : DSP Type LSB
- Refer to the Effect Map (page 97) for details.
- <DRY Level> F0H, 43H, 1nH, 4CH, 08H, 0mH, 11H, IIH, F7H
- II : Dry Level
  - 0m : Channel Number
- <XG Parameter Change> F0H, 43H, 1nH, 4CH, hh, mm, II, dd, F7H
- hh mm II : address
  - dd : data
- <XG Bulk Dump> F0H, 43H, 0nH, 4CH, aa, bb, hh, mm, II, dd, cc, F7H
- 0n : Device Number n=0 (send), 0 - f (receive)
  - aa bb : Byte Count (aa << 7) + bb
  - hh mm II : address
  - dd : data
- <Sequence Recording Bulk Dump>
- F0H, 43H, 73H, 7FH, mID, 06H, 0AH, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : model ID PSR-292=2BH
  - 06H : Bulk ID
  - 0AH : Bulk No.
  - aa : Byte Count MSB
  - bb : Byte Count LSB
  - cc : amount of valid MSB data
  - dd : amount of valid LSB data
  - hh mm II : address
  - bulk data : Sequence data (1byte, 2byte...7byte, MSB data)
  - sum : Check Sum = 0-sum (bulk data)
- <One Touch Setting Bulk Dump>
- F0H, 43H, 73H, 7FH, mID, 06H, 09H, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : model ID PSR-292=2BH
  - 06H : Bulk ID
  - 09H : Bulk No.
  - aa : Byte Count MSB
  - bb : Byte Count LSB
  - cc : amount of valid MSB data
  - dd : amount of valid LSB data
  - hh mm II : address
  - bulk data : Sequence data (low 4bit, high 4 bit...low 4bit, high 4 bit)
  - sum : Check Sum = 0-sum (bulk data)
- \*4 When the accompaniment is started, an FAH message is transmitted. When accompaniment is stopped, an FCH message is transmitted. When the clock is set to External, both FAH (accompaniment start) and FCH (accompaniment stop) are recognized.
- \*5 Local ON/OFF
- <Local ON> Bn, 7A, 7F
- <Local OFF> Bn, 7A, 00
- Value for "n" is ignored.

## HINWEIS:

- \*1 Im Standardbetrieb (Werksvorgaben) funktioniert das PSR-292 gewöhnlich als multi-timbraler 16Kanal- Klanggenerator, und eingehende Daten haben keinen Einfluß auf die Bedienfeld-Stimmen und die Bedienfeld-Einstellungen. Die im folgenden aufgeführten Befehle verändern jedoch die Bedienfeld-Stimmen, die automatische Begleitung und die Songs:
- MIDI Master Tuning
  - Systemexklusive Befehle zum Ändern von Reverb Type, Chorus Type und DSP Type
- \*2 Befehle für diese Steuerbefehlsnummern können vom PSR-292 selbst nicht gesendet werden. Sie können jedoch gesendet werden, wenn die Begleitung oder Song gespielt oder der Harmonie-Effekt verwendet wird.
- \*3 Exclusive
- <GM System ON> (GM-System AN) F0H, 7EH, 7FH, 09H, 01H, F7H
- Durch diesen Befehl werden automatisch alle Werksvorgaben des Instruments, mit Ausnahme von MIDI Master Tuning, wieder hergestellt.
- <MIDI Master Volume> (MIDI-Gesamtlautstärke)
- F0H, 7FH, 7FH, 04H, 01H, II, mm, F7H
- Mit diesem Befehl kann die Lautstärke aller Kanäle gleichzeitig geändert werden (Universal System Exclusive).
  - Die Werte für „mm“ werden für MIDI Master Tuning verwendet. (Werte für „II“ werden ignoriert.)
- <MIDI Master Tuning> (MIDI-Grundstimmung)
- F0H, 43H, 1nH, 27H, 30H, 00H, 00H, mm, II, cc, F7H
- Durch diesen Befehl wird der Stimmungswert für alle Kanäle gleichzeitig geändert.
  - Die Werte von „mm“ und „II“ werden für MIDI Master Tuning verwendet.
  - Der Standardwert beträgt für „mm“ 08H und für „II“ 00H. Für „n“ und „cc“ können beliebige Werte verwendet werden.
- <Reverb Type> (Reverb-Typ)
- F0H, 43H, 1nH, 4CH, 02H, 01H, 00H, mmH, IIH, F7H
- mm : Reverb Type MSB
  - II : Reverb Type LSB
- Weitere Einzelheiten hierzu finden Sie in der Effekt-Zuordnung (Seite 97).
- <Chorus Type> (Chorus-Typ)
- F0H, 43H, 1nH, 4CH, 02H, 01H, 20H, mmH, IIH, F7H
- mm : Chorus Type MSB
  - II : Chorus Type LSB
- Weitere Einzelheiten hierzu finden Sie in der Effekt-Zuordnung (Seite 97).
- <DSP Type> (DSP-Typ)
- F0H, 43H, 1nH, 4CH, 02H, 01H, 40H, mmH, IIH, F7H
- mm : DSP Type MSB
  - II : DSP Type LSB
- Weitere Einzelheiten hierzu finden Sie in der Effekt-Zuordnung (Seite 97).
- <DRY Level> (DRY-Pegel)
- F0H, 43H, 1nH, 4CH, 08H, 0mH, 11H, IIH, F7H
- II : Dry Level
  - 0m : Channel Number
- <XG Parameter Change> F0H, 43H, 1nH, 4CH, hh, mm, II, dd, F7H
- hh mm II : Adresse
  - dd : Daten
- <XG Bulk Dump> F0H, 43H, 0nH, 4CH, aa, bb, hh, mm, II, dd, cc, F7H
- 0n : Device Number n=0 (Übertragung), 0 - f (Empfang)
  - aa bb : Byte Count (aa << 7) + bb
  - hh mm II : Adresse
  - dd : Daten
- <Sequence Recording Bulk Dump>
- F0H, 43H, 73H, 7FH, mID, 06H, 0AH, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : Model ID PSR-292=2BH
  - 06H : Bulk ID
  - 0AH : Bulk Nr.
  - aa : Byte Count MSB
  - bb : Byte Count LSB
  - cc : Anzahl gültiger MSB-Daten
  - dd : Anzahl gültiger LSB-Daten
  - hh mm II : Adresse
  - bulk data : Sequenzdaten (1byte, 2byte...7byte, MSB-Daten)
  - sum : Prüfsumme = 0-sum (Bulk-Daten)
- <One Touch Setting Bulk Dump>
- F0H, 43H, 73H, 7FH, mID, 06H, 09H, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : Model ID PSR-292=2BH
  - 06H : Bulk ID
  - 09H : Bulk Nr.
  - aa : Byte Count MSB
  - bb : Byte Count LSB
  - cc : Anzahl gültiger MSB-Daten
  - dd : Anzahl gültiger LSB-Daten
  - hh mm II : Adresse
  - bulk data : Sequenzdaten (low 4bit, high 4 bit...low 4bit, high 4 bit)
  - sum : Prüfsumme = 0-sum (Bulk-Daten)
- \*4 Beim Starten der Begleitung wird ein Befehl FAH gesendet. Beim Stoppen der Begleitung wird ein Befehl FCH gesendet. Wurde für die Taktsteuerung „External“ festgelegt, werden sowohl der Befehl FAH (Start der Begleitung) als auch der Befehl FCH (Stopp der Begleitung) erkannt.
- \*5 Local ON/OFF
- <Local ON> Bn, 7A, 7F
- <Local OFF> Bn, 7A, 00
- Der Wert für „n“ wird ignoriert.

## REMARQUE :

- \*1 Le PSR-292 fonctionne par défaut (selon les réglages d'usine) comme un générateur de son multi-timbre à 16 canaux. De ce fait, la réception de données n'affecte ni les voix de panneau ni les réglages de panneau. Cependant, les messages MIDI figurant dans la liste ci-dessous ont des effets sur les voix de panneau, l'accompagnement automatique et les morceaux..
- MIDI Master Tuning (Accord général MIDI)
  - Messages exclusifs au système permettant de modifier respectivement les types d'effets Reverb, Chorus et DSP.
- \*2 Les messages relatifs à ces numéros de modification de commande ne peuvent pas être transmis à partir du PSR-292. Toutefois, il est possible de les émettre pendant la reproduction de l'accompagnement ou le morceau ou en utilisant l'effet Harmony.
- \*3 Exclusif
- <GM System ON> F0H, 7EH, 7FH, 09H, 01H, F7H
- Ce message rétablit automatiquement tous les réglages par défaut de l'instrument, à l'exception de la commande MIDI Master Tuning (Accord général MIDI).
- <MIDI Master Volume> (Volume général MIDI)  
F0H, 7FH, 7FH, 04H, 01H, II, mm, F7H
- Ce message autorise la modification simultanée du volume de tous les canaux (Universal System Exclusive).
  - Les valeurs « mm » sont utilisées pour MIDI Master Tuning. (Les valeurs « ll » sont ignorées).
- <MIDI Master Tuning> (Accord général MIDI)  
F0H, 43H, 1nH, 27H, 30H, 00H, 00H, mm, II, cc, F7H
- Ce message modifie simultanément la valeur de l'accord de tous les canaux.
  - Les valeurs « mm » et « ll » sont utilisées pour MIDI Master Tuning.
  - Les valeurs par défaut de « mm » et « ll » sont respectivement 08H et 00H. Toutes les valeurs peuvent être utilisées pour « n » et « cc ».
- <Reverb Type> (type de réverbération)  
F0H, 43H, 1nH, 4CH, 02H, 01H, 00H, mmH, IIH, F7H
- mm : Reverb Type MSB
  - ll : Reverb Type LSB
- Reportez-vous à la page (97) pour les détails.
- <Chorus Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 20H, mmH, IIH, F7H
- mm : Chorus Type MSB
  - ll : Chorus Type LSB
- Reportez-vous à la page (97) pour les détails.
- <DSP Type> F0H, 43H, 1nH, 4CH, 02H, 01H, 40H, mmH, IIH, F7H
- mm : DSP Type MSB
  - ll : DSP Type LSB
- Reportez-vous à la page (97) pour les détails.
- <DRY Level> F0H, 43H, 1nH, 4CH, 08H, 0mH, 11H, IIH, F7H
- ll : Dry Level
  - 0m : Channel Number (Numéro de canal)
- <XG Parametter Change> (Changement de paramètre XG)  
F0H, 43H, 1nH, 4CH, hh, mm, II, dd, F7H
- hh mm ll : adresse
  - dd : données
- <XG Bulk Dump> (Transfert de blocs de données XG)  
F0H, 43H, 0nH, 4CH, aa, bb, hh, mm, II, dd, cc, F7H
- 0n : Numéro du périphérique n=0 (envoi), 0 - f (réception)
  - aa bb : Nombre d'octets (aa << 7) + bb
  - hh mm ll : adresse
  - dd : données
- <Sequence Recording Bulk Dump>  
(Transfert de blocs d'enregistrements de séquence)  
F0H, 43H, 73H, 7FH, mID, 06H, 0AH, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : ID du modèle PSR-292=2BH
  - 06H : ID du bloc
  - 0AH : N° du bloc
  - aa : Nombre d'octets MSB
  - bb : Nombre d'octets LSB
  - cc : nombre de données MSB valides
  - dd : nombre de données LSB valides
  - hh mm ll : adresse
  - bulk data : données de séquence (1byte, 2byte...7byte, MSB data)
  - sum : Total = 0-sum (bloc de données)
- <One Touch Setting Bulk Dump>  
(Transfert de blocs de présélections immédiates)  
F0H, 43H, 73H, 7FH, mID, 06H, 09H, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : ID du modèle PSR-292=2BH
  - 06H : ID du bloc
  - 09H : N° du bloc
  - aa : Nombre d'octets MSB
  - bb : Nombre d'octets LSB
  - cc : nombre de données MSB valides
  - dd : nombre de données LSB valides
  - hh mm ll : adresse
  - bulk data : données de séquence (low 4bit, high 4 bit...low 4bit, high 4 bit)
  - sum : Total = 0-sum (bloc de données)
- \*4 Lors du lancement de l'accompagnement, un message FAH est transmis. À l'arrêt de l'accompagnement, c'est un message FCH qui est transmis. Quand l'horloge est réglée sur External (externe), les deux types de messages FAH (au lancement de l'accompagnement) et FCH (à l'arrêt de l'accompagnement) sont reconnus.
- \*5 Local ON/OFF  
<Local ON> Bn, 7A, 7F  
<Local OFF> Bn, 7A, 00  
La valeur « n » n'est pas connue.

## NOTA:

- \*1 Con los ajustes iniciales (ajustes de fabricación), el PSR-292 funciona normalmente como un generador de tonos de varios timbres de 16 canales, y los datos de entrada no afectan a los sonidos ni ajustes del panel. En cualquier caso, los mensajes MIDI enumerados a continuación sí afectan a los sonidos del panel, al acompañamiento automático y a las canciones.
- Afinación principal MIDI
  - Mensajes exclusivos del sistema para cambiar el tipo de reverberación, el tipo de coro y el tipo de DSP.
- \*2 Los mensajes para estos números de cambio de control no pueden transmitirse desde el mismo PSR-292. En cualquier caso, podrían transmitirse al tocar el acompañamiento o la canción, o al usar el efecto de armonía.
- \*3 Exclusivo
- <GM System ON> (Sistema GM conectado) F0H, 7EH, 7FH, 09H, 01H, F7H
- Este mensaje restituye automáticamente todos los ajustes iniciales para el instrumento, a excepción de la afinación principal MIDI.
- <MIDI Master Volume> (Volumen principal MIDI)  
F0H, 7FH, 7FH, 04H, 01H, II, mm, F7H
- Este mensaje permite cambiar simultáneamente el volumen de todos los canales (Exclusivo del Sistema Universal).
  - Los valores de "mm" se usan para la afinación principal MIDI. (Los valores para "ll" se ignoran.)
- <MIDI Master Volume> (Afinación principal MIDI)  
F0H, 43H, 1nH, 27H, 30H, 00H, 00H, mm, II, cc, F7H
- Este mensaje cambia simultáneamente el valor de afinación de todos los canales.
  - Los valores de "mm" y "ll" se usan para la afinación principal MIDI.
  - El valor inicial de "mm" y "ll" es de 08H y 00H respectivamente. Puede usarse cualquier valor para "n" y "cc".
- <Reverb Type> (Tipo de reverberación)  
F0H, 43H, 1nH, 4CH, 02H, 01H, 00H, mmH, IIH, F7H
- mm: Reverberación tipo MSB
  - ll: Reverberación tipo LSB
- Para más detalles, consulte la lista de efectos (página 97).
- <Chorus Type> (Tipo de coro)  
F0H, 43H, 1nH, 4CH, 02H, 01H, 20H, mmH, IIH, F7H
- mm: Coro tipo MSB
  - ll: Coro tipo LSB
- Para más detalles, consulte la lista de efectos (página 97).
- <DSP Type> (Tipo de DSP)  
F0H, 43H, 1nH, 4CH, 02H, 01H, 40H, mmH, IIH, F7H
- mm: Tipo de DSP MSB
  - ll: Tipo de DSP LSB
- Para más detalles, consulte la lista de efectos (página 97).
- <Dry Level> (Nivel DRY) F0H, 43H, 1nH, 4CH, 08H, 0mH, 11H, IIH, F7H
- ll: Nivel Dry
  - 0m: Número de canal
- <XG Parametter Change> (Cambio de parámetros XG)  
F0H, 43H, 1nH, 4CH, hh, mm, II, dd, F7H
- hh mm ll : dirección
  - dd : datos
- <XG Bulk Dump> (Transmisión de datos XG por lotes)  
F0H, 43H, 0nH, 4CH, aa, bb, hh, mm, II, dd, cc, F7H
- 0n : número de dispositivo n=0 (enviar), 0 - f (recibir)
  - aa bb : número de bytes (aa << 7) + bb
  - hh mm ll : dirección
  - dd : datos
- <Sequence Recording Bulk Dump>  
(Transmisión de registro de secuencias por lotes)  
F0H, 43H, 73H, 7FH, mID, 06H, 0AH, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : ID modelo PSR-292=2BH
  - 06H : ID lotes
  - 0AH : número lotes
  - aa : número de bytes MSB
  - bb : número de bytes LSB
  - cc : cantidad de datos MSB no válidos
  - dd : cantidad de datos LSB no válidos
  - hh mm ll : dirección
  - bulk data : datos de secuencia (1byte, 2byte...7byte, datos MSB)
  - sum : suma de verificación = 0-sum (datos por lotes)
- <One Touch Setting Bulk Dump>  
(Transmisión de ajuste de una pulsación por lotes)  
F0H, 43H, 73H, 7FH, mID, 06H, 09H, aa, bb, cc, dd, hh, mm, II, bulk data, sum, F7H
- mID : ID modelo PSR-292=2BH
  - 06H : ID lotes
  - 09H : número lotes
  - aa : número de bytes MSB
  - bb : número de bytes LSB
  - cc : cantidad de datos MSB no válidos
  - dd : cantidad de datos LSB no válidos
  - hh mm ll : dirección
  - bulk data : datos de secuencia (4 bit bajo, 4 bit alto...4 bit bajo, 4 bit alto)
  - sum : suma de verificación = 0-sum (datos por lotes)
- \*4 Cuando se inicia el acompañamiento se transmite un mensaje FAH. Cuando se detiene el acompañamiento se transmite un mensaje FCH. Cuando el reloj se ajusta al modo externo, se reconocen tanto el FAH (inicio de acompañamiento) como el FCH (detención de acompañamiento).
- \*5 Local ON/OFF  
<Local ON> Bn, 7A, 7F  
<Local OFF> Bn, 7A, 00  
El valor para "n" se ignora.

## ■ Effect map / Effekt-Zuordnung / Liste des effets / Lista de efectos

- \* If the received value does not contain an effect type in the TYPE LSB, the LSB will be directed to TYPE 0.
- \* The numbers in parentheses in front of the Effect Type names correspond to the number indicated in the display..
- \* By using an external sequencer, which is capable of editing and transmitting the system exclusive messages and parameter changes, you can select the Reverb, Chorus and DSP effect types which are not accessible from the PSR-292 panel itself. When one of the effects is selected by the external sequencer, " - " will be shown on the display.
- \* Wenn der empfangene Wert in TYPE LSB keinen Effekt-Typ enthält, wird für den LSB-Wert TYPE 0 angenommen.
- \* Die Zahlen in Klammern vor den Effektypnamen entsprechen der im Display angezeigten Zahl.
- \* Bei Verwendung eines externen Sequenzers, mit dem systemexklusive Daten und Parameteränderungen spezifiziert und gesendet werden können, lassen sich die Reverb-, Chorus- und Effekt-Typen wählen, die über das Bedienfeld des PSR-292 nicht wählbar sind. Wenn ein solcher Effekt per Sequenzer aufgerufen wurde, wird "-" auf dem Display angezeigt.
- \* Si les valeurs des effets ne contient pas un type d'effet dans TYPE LSB, le LSB sera orienté vers TYPE 0.
- \* Les chiffres entre parenthèses situés en regard des noms de types d'effets correspondent au numéro apparaissant dans l'affichage.
- \* En se servant d'un séquenceur extérieur capable d'éditer et de transmettre les messages exclusifs de système et les modifications de paramètre de réglage, vous pouvez sélectionner le type d'effet Reverb, Chorus et DSP qui ne sont pas accessibles à partir de la console du PSR-292. Le signe " - " apparaît dans l'afficheur dès qu'un des effets est sélectionné par le séquenceur extérieur.
- \* Si el valor recibido no contiene un tipo de efecto en TYPE LSB, LSB se dirigirá a TYPE 0.
- \* Los números entre paréntesis delante de los nombres del tipo de efecto corresponden al número indicado en la pantalla.
- \* Empleando un secuenciador exterior, que sea capaz de editar y transmitir los mensajes exclusivos del sistema y los cambios de parámetros, podrá seleccionar los tipos de efectos de reverberación, coros, y DSP que no son accesibles desde el mismo panel del PSR-292. Cuando se selecciona uno de los efectos con el secuenciador exterior, se indicará "-" en el visualizador.

### ● REVERB

## Keyboards

- 61 standard-size keys (C1 - C6), with Touch Response.

## Display

- Large multi-function LCD display (backlit)

## Setup

- STANDBY/ON
- MASTER VOLUME : MIN - MAX

## Panel Controls

- SONG, VOICE, STYLE, M.D.B., DICTIONARY, DJ, PC, LESSON L, R, METRONOME, PORTABLE GRAND, DEMO, FUNCTION(TRANSPOSE), TOUCH, HARMONY, DUAL, SPLIT, TEMPO/TAP, ONE TOUCH SETTING, [0]-[9], [+](YES), [-](NO), CATEGORY, SELECT, Dial

## Voice

- 108 panel voices + 12 drum kits + 480 XG voices + 5 DJ voices
- Polyphony : 32
- DUAL
- SPLIT

## Style

- 135 styles
- Style Control : ACMP ON/OFF, SYNC STOP, SYNC START, START/STOP, INTRO ENDING, MAIN/AUTO FILL
- Fingering : Multi fingering
- Style Volume

## Music Database

- 208

## Yamaha Educational Suite

- Dictionary
- Lesson 1-4

## One Touch Setting

- Preset A and B (for each style)
- Memory

## Function

- Transpose, Tuning, Split Point, Touch Sensitivity, Main Voice – Volume; Octave; Pan; Reverb Send Level; Chorus Send Level; DSP Send Level, Dual Voice – Voice; Volume; Octave; Pan; Reverb Send Level; Chorus Send Level; DSP Send Level, Split Voice – Voice; Volume; Octave; Pan; Reverb Send Level; Chorus Send Level; DSP Send Level, Reverb Type, Chorus Type, DSP Type, Harmony Type, Harmony Volume, Local On/Off, External Clock, Bulk Data Send, Initial Setup Send, Keyboard Out, Style Out, Song Out, Style Volume, Song Volume, Metronome Volume, Time Signature, Lesson Track (R), Lesson Track (L), Grade On/Off, Demo and DJ Cancel

## Effects

- Reverb : 8 types
- Chorus : 4 types
- DSP : 38 types
- Harmony : 26 types

## Song

- 100 Songs + 5 User Songs + Flash Memory
- Song Clear, Track Clear
- Song Volume

## Recording

- Song  
User Song : 5 Songs  
Recording Tracks : 1, 2, 3, 4, 5, STYLE

## MIDI

- Local On/Off
- Initial Setup Send
- External Clock
- Bulk Data Send
- Keyboard Out
- Style Out
- Song Out

## Auxiliary jacks

- PHONES/OUTPUT, DC IN 12V, MIDI IN/OUT, SUSTAIN

## Amplifier

- 3.0W + 3.0W

## Speakers

- 12cm x 2 + 3cm x 2

## Power Consumption (when using PA-3C power adaptor)

- UL/CSA :14W
- CE :15W

## Power Supply

- Adaptor : Yamaha PA-3C AC power adaptor
- Batteries : Six "D" size, R20P (LR20) or equivalent batteries

## Dimensions (W x D x H)

- 952 x 389 x 140 mm (37-1/2" x 15-1/3" x 5-1/2")

## Weight

- 6.8 kg (15 lbs.)

## Supplied Accessories

- Music Stand
- Owner's Manual
- Song Book

## Optional Accessories

- Headphones : HPE-150
- AC power adaptor : PA-3B/3C
- Footswitch : FC4, FC5
- Keyboard stand : L-2C
